# Acknowledgement

First of all, my heartiest thanks to our Lord God, the most kind, most merciful and the most beneficent.

I heartily and cordially utter all the expressive and impressive words of indebtedness and thankfulness to our honorable Prof. Dr. Abdel Aziz Abbas Taalab, Professor of General Surgery, Faculty of Medicine, Menoufiya University for his patience, valuable guidance cooperative supervision, continuous encouragement, sincere help and tremendous efforts throughout this work that were the cornerstone in building up of this thesis and without him, this work could never have been completed.

I am also deeply so much obliged and can hardly express my hardless and limitless thanks to Dr. Mohamed Leithy Alam El-Din, Assistant Professor of General Surgery, Faculty of Medicine, Menoufiya University for his precious remarks, assistance comments, kind encouragement, moral support, continuous advice and sincere assistance for completion of this thesis.

It gives me a great pleasure to express my sincere gratitude and deep appreciation to Dr. Ashraf Mohamed Nour El-Din, Assistant Professor of General Surgery, Faculty of Medicine, Menoufiya University for his continuous encouragement and supervision throughout the completion of this work.

I would like to express my deepest gratitude to Dr. Magdi Ahmed Lolah, Lecturer of General Surgery, Faculty of Medicine, Menoufiya University for his great help, close supervision, continuous advice, enthusiastic encouragement and sincere follow up.

✍ *Medhat Samy*

# List of Figures

Figure		Page
<b>Fig. 1</b>	(a) Jejunum, partially opened, (b) Ileum, showing Peyer's patches	7
<b>Fig. 2</b>	Posteroinferior aspect of the caecum	12
<b>Fig. 3</b>	Sigmoid colon and mesocolon	13
<b>Fig. 4</b>	A slide showing transsection pathological view of the intussusception	21
<b>Fig. 5</b>	Target sign. Plain radiograph	30
<b>Fig. 6</b>	Meniscus sign. Plain radiograph shows the meniscus sign	30
<b>Fig. 7</b>	Meniscus and coiled spring signs.	32
<b>Fig. 8</b>	Meniscus and coiled spring signs.	30
<b>Fig. 9</b>	US scan obtained at the apex of an intussusception	39
<b>Fig. 10</b>	US scan obtained near the apex	39
<b>Fig. 11</b>	Use of Doppler US to evaluate intussusception.	41
<b>Fig. 12</b>	A male patient; 6 months old with intussusception of ileo-caecal type, transectional US showed this image (the target sign) which is diagnostic. This was before doing hydrostatic reduction.	89
<b>Fig. 13</b>	The same patient mentioned above; a longitudinal axis US done during hydrostatic reduction.	89
<b>Fig. 14</b>	A male patient; 4 months old with intussusception of ileo-caecal type, this image was taken during hydrostatic reduction and target sign began to disappear	90
<b>Fig. 15</b>	A female patient; 3 months old with intussusception of ileo-caecal type, perforation was done during doing hydrostatic reduction and this image was taken after perforation.	90
<b>Fig. 16</b>	A female patient, 5 months with intussusception of ileo-caecal type. This image was taken before reduction showing target sign.	91
<b>Fig. 17</b>	A male patient; 6 months with intussusception of ileo-caecal type, target sign is obvious in this image with beginning of reduction pneumatically.	91
<b>Fig. 18</b>	The same patient mentioned above, this image was taken showing successive reduction of intussusception pneumatically as the target sign is beginning to disappear.	92
