# **AN OVERVIEW ON THE PATHOGENESIS OF GALLSTONES IN CHRONIC CALCULAR CHOLECYSTITIS.**

A THESIS IN FULFILMENT OF THE M.D.  
GENERAL SURGERY

BY

**MOHAMED WAEL MAHMOUD MOSTAFA**

MB, B.CH., M.SC.

**UNDER SUPERVISION OF**

PROF. DR. **AHMED FAWZY BAHNASSY**

PROFESSOR OF GENERAL SURGERY

FACULTY OF MEDICINE AIN SHAMS UNIVERSITY

PRO. DR. **ABD EL RAZEK FADEL MASOUD**

PROFESSOR OF GENERAL SURGERY

FACULTY OF MEDICINE CAIRO UNIVERSITY

PROF. DR. **EMAM EL SAYED EZZAT FAKHR**

PROFESSOR OF GENERAL SURGERY

FACULTY OF MEDICINE AIN SHAMS UNIVERSITY

PRO. DR. **MOHAMED SHAARAWY M. METWALLI**

PROFESSOR OF CLINICAL BIOCHEMISTRY

FACULTY OF MEDICINE CAIRO UNIVERSITY

**I DEDICATE THIS WORK  
TO MY FATHER AND  
MOTHER .  
ALSO TO MY WIFE WHO  
SUPPORTED ME TO  
OFFSPRING THIS THESIS  
TO LIGHT .**

## **ACKNOWLEDGMENT**

I wish to express my deep thanks and great appreciation to Prof. Dr. **AHMED FAWZY BAHNASSY** , Professor of General Surgery , Faculty of Medicine, Ain Shams University , for his continuous encouragement and kind help in planning, supervising, and revising this thesis .

To Prof. Dr. **ABD EL RAZEK FADEL MASOUD** , Professor of General Surgery , Faculty of Medicine , Cairo University . I wish to express many great thanks and appreciation to his huge support and continuous advise , suggestion and guidance . His remarkable attitude and valuable experience were behind this thesis .

Also, I wish to express my sincere gratitude to Prof. Dr. **EMAM EL SAYED EZZAT FAKHR**, Professor of General Surgery , Faculty of Medicine , Ain Shams University, for his help and encouragement throughout this thesis .

I must also acknowledge the great help and remarkable effort and support , I have received from Prof. Dr. **MOHAMED SHAARAWY M. METWALLY**, Professor of Clinical Biochemistry , Faculty of Medicine , Cairo University , throughout the whole Laboratory Investigations in fulfilling this thesis .

# **CONTENTS**

	<i>PAGE</i>
<b>I - INTRODUCTION AND AIM OF WORK:</b>	<b>1</b>
<b>II - LITERATURE REVIEW :</b>	<b>3</b>
<b>A/ HISTO-ANATOMICAL BACKGROUNDS:</b>	<b>3</b>
<b>B/ PHYSIOLOGY OF BILE &amp; PATHOGENESIS OF GALLSTONES:</b>	<b>20</b>
<b>C/ BIOCHEMICAL &amp; CLINICAL ASPECTS OF PROSTAGLANDIN:</b>	<b>48</b>
<b>D/ MUCIN AND GALLSTONE FORMATION :</b>	<b>71</b>
<b>E/ ROLE OF MEDICAL MANAGEMENT OF GALLSTONES:</b>	<b>77</b>
<b>III - MATERIALS AND METHODS:</b>	<b>85</b>
<b>IV - RESULTS:</b>	<b>93</b>
<b>V - DISCUSSION:</b>	<b>119</b>
<b>VI - ENGLISH SUMMARY:</b>	<b>133</b>
<b>VII- REFERENCES:</b>	<b>136</b>
<b>VIII-ARABIC SUMMARY:</b>	

=====

## **LIST OF FIGURES**

	<b><u>Page</u></b>
FIG.(1): Visceral surface of the liver .	5
FIG.(2): Ant. surface of the liver .	5
FIG.(3): The structure of the normal human liver.	7
FIG.(4): Normal hepatic histology.	7
FIG.(5): Columns of hepatocytes between hepatic vein and portal tract.	9
FIG.(6): Normal portal tract .	9
FIG.(7): Blood supply of the simple liver acinus.	9
FIG.(8): The Organelles of the liver cell.	13
FIG.(9): Electron microscopic appearance of a normal human liver cell .	13
FIG.(10): Transmission electron micrographs of isolated human sinusoidal liver cells .	17
FIG.(11): The wall of the human gallbladder .	18
FIG.(12): The structures of the major prostaglandins .	52
FIG.(13): The structure of prostanoic acid .	52
FIG.(14): The synthesis of E and F prostaglandins from fatty acid precursors .	55
FIG.(15): The Cyclo-oxygenase reaction .	56
FIG.(16): The conversion of PGG <sub>2</sub> to PGH <sub>2</sub> .	56
FIG.(17): Major routs of prostanoid biosynthesis .	56
FIG.(18): The synthesis of TXB <sub>2</sub> from PGH <sub>2</sub> .	59
FIG.(19): Site of action of inhibitors of Pgs synthesis .	59
FIG.(20): Metabolism of PGE <sub>2</sub> , PGF <sub>2</sub> $\alpha$ , and TXA <sub>2</sub> .	59
FIG.(21): Mechanisms of bile formation .	23
FIG.(22): Bile formation and transport system .	23
FIG.(23): A possible mechanism for intrahepatic cholestasis.	25

FIG.(24): Structure of cholesterol and pigment stones.	29
FIG.(25): Factors in cholesterol gallstone formation .	32
FIG.(26): Structure of mixed micelles and cholesterol /phospholipid vesicles .	32
FIG.(27): Pathway for cholesterol crystallization in bile.	33
FIG.(28): The natural history of gallstones .	33
FIG.(29): Technique of percutaneous trans-hepatic gall- bladder catheter placement for MBTE dissolution of cholesterol gallstones .	80
FIG.(30): Extracorporeal shock-wave lithotripsy .	80
FIG.(31): Regression line equation and correlation coefficient “r” between the individual values of each of PGE2 and Muco. P. in calc. disease .	107
FIG.(32): Regression line equation and correlation coefficient “r” between the individual values of each of PGE2 and cholesterol in calc. disease .	107
FIG.(33): Regression line equation and correlation coefficient “r” between the individual values of each of PGE2 and Alk. phosph. in calc. disease .	108
FIG.(34): Regression line equation and correlation coefficient “r” between the individual values of each of PGE2 and SGPT in calc. disease .	108
FIG.(35): Regression line equation and correlation coefficient “r” between the individual values of each of PGE2 and SGOT in calc. disease .	109
FIG.(36): Regression line equation and correlation coefficient “r” between the individual values of each of PGE2 and Albumin in calc. disease .	109
FIG.(37): Regression line equation and correlation coefficient “r” between the individual values of each of Muco.P. and cholesterol in calc. disease .	110

FIG.(38): Regression line equation and correlation coefficient “r” between the individual values of each of Muco.P. and Alk. phosph. in calc. disease .	110
FIG.(39): Regression line equation and correlation coefficient “r” between the individual values of each of Muco.P. and SGPT in calc. disease.	111
FIG.(40): Regression line equation and correlation coefficient “r” between the individual values of each of Muco.P. and SGOT in calc. disease.	111
FIG.(41): Regression line equation and correlation coefficient “r” between the individual values of each of Muco.P. and Albumin in calc. disease.	112
FIG.(42): Regression line equation and correlation coefficient “r” between the individual values of each of Muco.P. and T. protein in calc. disease.	112
FIG.(43): Regression line equation and correlation coefficient “r” between the individual values of each of Cholesterol and Alk. phosph. in calc. disease.	113
FIG.(44): Regression line equation and correlation coefficient “r” between the individual values of each of Cholesterol and SGPT in calc. disease.	113
FIG.(45): Regression line equation and correlation coefficient “r” between the individual values of each of cholesterol and SGOT in calc. disease .	114
FIG.(46): Regression line equation and correlation coefficient “r” between the individual values of each of T.bilirubin and T. protein in calc. disease .	114
FIG.(47): Regression line equation and correlation coefficient “r” between the individual values of each of Alk. phosph. and SGPT in calc. disease .	115
FIG.(48): Regression line equation and correlation coefficient	115

**“r” between the individual values of each of Alk.Phosph.  
and SGOT in calc. disease .**

**FIG.(49): Regression line equation and correlation coefficient 116**

**“r” between the individual values of each of Alk.phosph.  
and Albumin in calc. disease .**

**FIG.(50): Regression line equation and correlation coefficient 116**

**“r” between the individual values of each of SGPT  
and SGOT in calc. disease .**

**FIG.(51): Regression line equation and correlation coefficient 117**

**“r” between the individual values of each of SGPT  
and Albumin in calc. disease .**

**FIG.(52): Regression line equation and correlation coefficient 117**

**“r” between the individual values of each of Albumin  
and T. protein in calc. disease .**

**FIG.(53): A galldladder infested by Schistosoma Mansoni . 128**

**FIG.(54): Another site for the Bilharzia Ova within the gallbladder. 128**

## **LIST OF TABLES**

	<u><b>PAGE</b></u>
TABLE (1): Possible mechanisms of cholestasis	27
TABLE (2): Frequency of Gallstone Occurrence in Selected Groups and Countries .	40
TABLE (3): Classification of Pigment Stones.	43
TABLE (4): Results of clinical study.	94
TABLE (5): Results of Cholesterol & Liver function tests in Serum, for Ch. Calcular cholecystitis ptns.	95
TABLE (6): Results of Cholesterol & Liver function tests in Serum, for Ch. non-calc. cholecystitis ptns.	97
TABLE (7): Mean values $\pm$ SEM of Cholesterol (mg/dl), T.proteins (g/dl) & Albumin (g/dl) in different studied groups.	98
TABLE (8): Mean values $\pm$ SEM of SGOT (u/l), SGPT,(u/l), Alk. phosph. (u/l), and Total Bilirubin (mg/dl) in different studied groups .	99
TABLE (9): Mean values $\pm$ SEM of different studied parameters in the subgroups of calcular cholecystitis group (Pigment stone and cholesterol stone).	100
TABLE (10): Results of PGE2 and Mucoproteins in bile of the calcular cholecystitis group .	101
TABLE (11): Results of PGE2, and Micoproteins in bile for the chronic non-cacular cholecystitis group .	101
TABLE (12): Mean values $\pm$ SEM of PGE2 (pg/ml) and Muco- proteins (mg/dl) in the bile of different stidied grps.	103
TABLE (13): The correlation co-efficient "r" between the individual values of different parameters in calcular disease subjects .	104
