بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
﴿إِنْ أُرِيدُ إِلَّا إِلَّا صِلَاحَ مَا اسْتَطَعْتُ
وَمَا تُوفِّقُنِي إِلَّا بِاللَّهِ
عَلَيْهِ تَوَكَّلْتُ وَإِلَيْهِ أُنِيبُ﴾

صدق الله العظيم
سورة هود (آية ٨٨)

ACKNOWLEDGEMENT

First of all greatest thanks and grateful to **ALLAH** who gave me the help, knowledge and ability to start, continue and complete this study

I would like to express my deep gratitude to Dr. **Etezzaz M. Nafie**, Assist. Prof. of Plant physiology, Faculty of Women for Arts, Science and Education, Ain Shams University for his guidance supervision, encouragement, and valuable help during the study period.

I would like to express my sincere and deepest gratitude to **Dr. Mohamed K. EL-Bahr**, Prof. of Plant Biotechnology Dept. Genetic Engineering Division National Research Center for his supervision, continuous support, guidance kind remarks and the great efforts during the preparation of this thesis.

Sincere thanks are to **Dr. Hussein S. Taha**, Prof. of Plant Biotechnology Dept. Genetic Engineering Division National Research center for his kind and endless encouragement during his supervision period, constructive criticism, guidance during the preparation of this work, valuable ideas and basic editing.

As I am also thankful to Dr. **Ahmad A. Khalfallah**, Lecture of Plant Ecology, Faculty of Women for Arts, Science and Education, Ain Shams University for his continues support and cooperation throughout the different progress of this thesis.

I am also grateful to **Prof. Maha A. Hewady** present head of Botany Depart., and extended to the staff members of Botany Depart. Faculty of Women.

Dedication

I dedicate this work to

My great mother,

My father's soul,

My lovely husband Nory,

My daughter Donia,

My handsome son's yones and Ahmed.

Contents

Subject	Page
Introduction	
Part I	
Part II	
Material and methods	
Material	
Methods	
Preparation of culture media	
Sterilization and germination	
Explants preparation	
Callus induction	
Plant regeneration <i>via</i> somatic embryogenesis and organogenesis	
<i>Somatic embryos induction</i>	
<i>Plantlets regeneration</i>	
<i>Organogenesis</i>	
<i>Rooting</i>	
Part II	
Effect of 24-Epi in alleviating salt stress <i>in vitro</i> derived plantlets	
Salt stress treatments	
Sample preparation	
Physiological, biochemical, endogenous hormone, and molecular analyses	
Estimation of photosynthetic pigment contents	
Extraction and estimation of soluble sugars, sucrose, and starch	

Estimation of nucleic acids (DNA and RNA).....	
Estimation of total soluble proteins.....	
Estimation of proline content.....	
Enzymes extraction and assay.....	
Enzymes extraction.....	
Enzymes assay	
<i>Superoxide dismutase (SOD; EC 1.15.1.1)</i>	
<i>Catalase (CAT; EC 1.11.1.6).....</i>	
<i>Ascorbate peroxidase (APX; EC 1.11.1.11).....</i>	
<i>Glutathione reductase (GR; EC 1.6.4.2).....</i>	
<i>Ascorbic acid oxidase (AAO; EC 1.10.3.3).....</i>	
<i>Peroxidase (POD; EC 1.11.1.7).....</i>	
<i>Polyphenol oxidase (PPO; EC 1.14.18.1).....</i>	
<i>Nitrate reductase (NR; EC. 1.6.6.1).....</i>	
Determination of hydrogen peroxide (H₂O₂) content.....	
Determination of lipid peroxidation.....	
Estimation of minerals.....	
Endogenous hormones analyses.....	
<i>Estimation and determination of jasmonic acid.....</i>	
SDS-protein electrophoresis.....	
Native potein electrophoresis.....	
Random amplified polymorphic DNA (RAPD) analysis	
.....	
<i>DNA extraction.....</i>	
<i>DNA amplification.....</i>	

Statistical analysis.....

Results

Part 1.....

Seed germination.....

Callus induction.....

Plant regeneration via somatic embryogenesis and organogenesis.....

Somatic embryos induction.....

Plantlets regeneration.....

Organogenesis.....

Rooting.....

Part II.....

Changes in photosynthetic pigments.....

Changes in soluble sugars, sucrose and starch contents.....

Changes in nucleic acid.....

Changes in nitrate reductase activity.....

Changes in soluble protein

Changes in proline.....

Changes in antioxidant enzymes activities.....

Changes in superoxide dismutase (SOD; EC 1.15.1.1).....

Changes in catalase (CAT; EC 1.11.1.6).....

Changes in ascorbate peroxidase (APX; EC 1.11.1.11).....

Changes in glutathione reductase (GR; EC 1.6.4.2).....

Changes in ascorbic acid oxidase (AAO; EC 1.10.3.3).....

Changes in peroxidase (POD; EC 1.11.1.7).....

Changes in polyphenol oxidase (PPO; EC 1.14.18.1).....

Changes in minerals contents.....

Changes in the endogenous hormones.....

Protein electrophoretic pattern.....

Isozymes banding pattern.....

Identification based on molecular RAPD analysis.....

Primer OP-K2.....

Primer OP-K4.....

Primer OP-K5.....

Discussion.....

Summary

الملخص العربي.....

List of Abbreviations

Abbrev.	The name
PTC	Plant tissue culture
PGR	plant growth regulator
BRs	Brassinosteroids
BL	Brassinolide
24- Epi	24- Epibrassinolide
28-homoBL	28-homobrassinolide
2, 4- D	2, 4- dichlorophenoxy acetic acid
Kin	Kinetin
TDZ	Thidiazuron
IAA	Indole acetic acid
NAA	1-Naphthalene acetic acid
GA ₃	Gibberellic acid
CK	Cytokinin
ABA	Absciscic acid
JA	Jasmonic acid
IAAO	Indole acetic acid oxidase
C, E, M, S and R	Callus, Embryos, Maturation, Shooting and Rooting media
ASC-GSH	Ascorbate-glutathione (ASC-GSH) cycle
SDS-PAGE	Sodium dodecyl sulfate polyacryl amide gel electrophoresis
Native-PAGE	Native polyacryl amide gel electrophoresis
RAPD	Randomly amplified polymorphic DNA
PCR	polymerase chain reaction
SOD	Superoxide dismutase
CAT	Catalase
APX	Ascorbate peroxidase
GR	Glutathione reductase
AAO	Ascorbic acid oxidase
POD	Peroxidase
PPO	Polyphenol oxidase
NR	Nitrate reductase
DMSO	Dimethyl sulfoxide
PCA	Perchloric acid
