**A study on the Protective Role of
Isoflavones Against the Toxicity of
Pyrethriod (cypermethrin) in Mammals**

Thesis

Submitted in partial fulfillment
for the degree of
M. Sc. In Environmental Studies

By

Khaled Salem Al-Salhen
B. Sc. (Chemistry), 1993

Department of Environmental Studies
Institute of Graduate Studies and Research
University of Alexandria

2003

**A study on the Protective Role of Isoflavones
Against the Toxicity of Pyrethriod
(cypermethrin) in Mammals**

Approved

Date / / 2003 Alexandria, Egypt.

Supervisors

Dr. Mokhtar Ibrahim Yousef

Associate Prof. of Environmental Animal Physiology,
Department of Environmental Studies,
Institute of Graduate Studies and Research,
University of Alexandria.

Dr. Fatma Mohamady El-Demerdash

Associate Prof. of Biochemistry,
Department of Environmental Studies,
Institute of Graduate Studies and Research,
University of Alexandria.

Acknowledgment

I would like to express my great appreciation to **Dr. Makhtar Ibrahim Yousef**, Associate professor of Environmental Animal Physiology, Department of Environmental Studies, Institute of Graduate Studies and Research, University of Alexandria, for sharing the suggestion of the research subject and sharing the ideas. Supervises closely the design of the experiments. Also for his devoting much of his time and effort in supervision of this thesis, guidance, generous spirit, useful criticism during preparation of this work, and reviewing of the manuscript.

I wish to express my sincere thanks to **Dr. Fatma Mohamady El-Demerdash**, Associate professor of Biochemistry, Department of Environmental Studies, Institute of Graduate Studies and Research, University of Alexandria, for her great support supervision, advice, help throughout this study, and reviewing of the manuscript.

I would like also thanks **Dr. Kamel Ibrahim Kamel**, Animal Production Research Institute, Dokki, Giza, Egypt, for his great help, and assistance throughout this work

I am indebted and grateful to my **parent** for their guidance, and advice during my study.

I wish to express my gratitude to my **wife**, for her understanding and great help she has given me throughout my life during my study.

List of Figures	vii
CHAPTER I: INTRODUCTION.....	1
1. Introduction to the study.....	1
2. Effects of pesticides on body weight, feed and water intakes...	3
3. Effects of pesticides on organ weights and slaughter performance.....	4
4. Effects of pesticides on biochemical constituents.....	5
4.1. Blood lipids.....	6
4.1.1. Total lipids.....	6
4.1.2. Cholesterol.....	6
4.1.3. Lipoproteins and Triglycerides.....	7
4.2. Blood glucose and bilirubin.....	8
4.3. Blood urea and creatinine.....	9
4.4. Serum protein.....	10
4.5. Enzyme activities.....	11
4.5.1. Serum aspartate aminotransferase (AST) and alanine aminotransferase (ALT) activities.....	11
4.5.2. Alkaline phosphatase (ALP).....	13

4.5.3	Glutathione S-transferase (GST).....	13
4.5.4	Acetylcholinesterase (AChE) activity.....	14
4.6.	Effect of pesticides on mammalian reproduction.....	16
4.6.1	Libido, ejaculate volume and sperm concentration.....	20
4.6.2	Dead and abnormal spermatozoa.....	22
4.6.3.	Semen initial fructose and initial hydrogen ion concentration (pH).....	23
4.6.4.	Testosterone.....	25
4.7.	Free Radicals.....	28
4.7.1	Free Radicals and Reproduction.....	29
4.7.2	The correlation between pesticides and free-radical	31
5.	Soy Isoflavones.....	32
5.1.	Definition.....	32
5.2.	Sources of Isoflavones.....	34
5.3.	Chemistry of isoflavones and their derivatives.....	35
5.4.	Composition of isoflavones in soy-based infant formulas.....	36
5.5..	Biological actions.....	37

5.	Statistical Analyses.....	55
CHAPTER III:	RESULTS AND DISCUSSION.....	57
1.	Effect of isoflavone, cypermethrin and their combination on body weight, feed and water intakes of male rabbits.....	57
1.1	Body weight.....	57
1.2.	Feed intake.....	59
1.3.	Water intake.....	61
2.	Effects of isoflavone, cypermethrin and their combination on relative organ weights and slaughter performance of male rabbits	65
3.	Effect of isoflavone, cypermethrin and their combination on some clinical chemistry of male rabbits	71
3.1	Plasma glucose.....	71
3.2	Total bilirubin.....	73
3.3	Urea and creatinine.....	75
3.4.	Total lipids.....	80
3.5.	Cholesterol.....	83
3.6.	Triglycerides.....	86
3.7.	High density lipoproteins (HDL), low-density lipoproteins (LDL) and very low- density lipoproteins (VLDL)	88
3.8.	Plasma and tissues proteins.....	96

3.9.	Thiobarbituric acid-reactive substances in plasma and tissues	107
3.10.	Enzymatic activities.....	115
3.10.1.	Plasma and tissues glutathione S-transferase (GST)	115
3.10.2.	Plasma and tissues transaminases	121
3.10.3.	Plasma and liver alkaline phosphatase	128
3.10.4.	Plasma and brain acetylcholinesterase	133
3.10.5.	Plasma testosterone.....	137
4.	Effects of isoflavone, cypermethrin and their combination on semen characteristics.....	142
4.1.	Semen ejaculate volume, sperm concentration and total sperm output	142
4.2.	Sperm motility grade, sperm motility (%), sperm motility index and total motile sperm.....	149
4.3.	Abnormal and dead sperm, and semen initial fructose.....	157
4.4.	Semen packed sperm volume (PSV), initial hydrogen ion concentration (pH) and reaction time.....	163
	SUMMARY AND CONCLUSIONS.....	171
CHAPTER IV:	REFERENCES.....	175
	ARABIC SUMMARY	

Table (11).	Analysis of variance for the effect of isoflavone, cypermethrin and their combination on plasma glucose, bilirubin urea, and creatinine in male rabbits	79
Table (12).	Biweekly average of plasma total lipids (mg/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	81
Table (13).	Biweekly average of plasma cholesterol (mg/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	85
Table (14).	Biweekly average of plasma triglycerides (mg/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	87
Table (15).	Biweekly average of plasma high-density lipoproteins (mg/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	90
Table (16).	Biweekly average of plasma low-density lipoproteins (mg/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	91
Table (17).	Biweekly average of plasma very low-density lipoproteins (mg/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	92
Table (18).	Analysis of variance for the effect of isoflavone, cypermethrin and their combination on plasma total lipids (TL), cholesterol (Cho.), triglycerides (TG), high density lipoproteins (HDL), low density lipoproteins (LDL) and very low density lipoprotein (VLDL) in male rabbits	95
Table (19).	Biweekly average of plasma total protein (g/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	98
Table (20).	Biweekly average of plasma albumin (g/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	99
Table (21).	Biweekly average of plasma globulin (g/dl) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	100

Table (22).	Biweekly average of albumin/globulin ratio of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	101
Table (23).	Analyses of variance for the effect of isoflavone, cypermethrin and their combination on plasma total protein (TP), albumin (A), globulin(G) and A/G ratio in male rabbits	103
Table (24).	Liver, testis and brain protein of male rabbits treated with isoflavone, cypermethrin and their combination (means $\pm$ SE)	104
Table (25).	Analysis of variance for the effect of isoflavone cypermethrin and their combination on liver, testis and brain protein	106
Table (26).	Biweekly average of plasma thiobarbituric acid-reactive substances (nmol/ml) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	109
Table (27).	Analysis of variance for the effect of isoflavone, cypermethrin and their combination on plasma glutathione S-transferase (GST) and thiobarbituric acid-reactive substances (TBARS) in male rabbits	111
Table (28).	Liver, testis and brain thiobarbituric acid-reactive substances (TBARS) of male rabbits treated with isoflavone, cypermethrin and their combination (means $\pm$ SE)	112
Table (29).	Analysis of variance for the effect of isoflavone, cypermethrin and their combination on liver, testis and brain thiobarbituric acid-reactive substances (TBARS) in male rabbits	114
Table (30).	Biweekly average of plasma glutathion-S-transferase (GST; μ mol/hr) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	117
Table (31).	Liver, testis and brain glutathione-S-transferase (GST) of male rabbits treated with isoflavone, cypermethrin and their combination (means $\pm$ SE)	118
Table (32)	Biweekly average of plasma aspartate aminotransferase (AST; U/l) of male rabbits treated with isoflavone, cypermethrin and their combination (mean $\pm$ SE)	123
