### LIST OF FIGURES

### LIST OF TABLES

### LIST OF LIST OF ABBREVIATIONS

### AIM OF THE WORK

### ABSTRACT

### INTRODUCTION

### CHAPTER (1) LITRATURE RAVIEW

<i>1.1 DIESEL FUEL</i> .....	1
1.1.1 Composition of Diesel Fuels .....	1
1.1.2 Specification Requirements of Diesel Fuels .....	3
1.1.3 Environmental Problems and Health Hazards Caused by Sulfur in Diesel Fuel .....	9
<i>1.2 DESULFURIZATION PROCESSES</i> .....	11
1.2.1 Conventional Desulfurization (Hydrodesulfurization) .....	11
1.2.2 Alternative Processes for Deep Desulfurization of Diesel Fuel .....	15
1.2.2.1 Oxidative Desulfurization .....	15
1.2.2.2 Ultrasound-Assisted Oxidative Desulfurization .....	17
1.2.2.3 Desulfurization by Adsorption .....	17
1.2.2.4 Extractive Desulfurization .....	18
1.2.2.5 Biodesulfurization (BDS).....	20
1.2.2.6 Photocatalytic Oxidative Desulfurization .....	21
<i>1.3 PHOTOCATALYSIS</i> .....	22
1.3.1 Types of Photocatalysis .....	22
1.3.2 Electronic and Optical Properties of Heterogeneous Semiconductors.....	25
1.3.3 The Electronic Structure of Semiconductors .....	29
1.3.4 Ultraviolet and Visible Spectrometry .....	33
1.3.5 Radiation Sources .....	34
<i>1.4 PHOTOCATALYSIS IN THE DESULFURIZATION     APPLICATION</i> .....	36
<i>1.5 PHOTOCATALYTIC METAL OXIDES</i> .....	38
<i>1.6 IMPROVEMENT PHOTOCATALYTIC EFFICIENCY Of     METAL OXIDES BY NANOSTRUCTURE GROWTH     TECHNIQUES</i> .....	46

### CHAPTER (2) EXPERIMENTAL

<i>2.1 PLAN OF EXPERIMENTS</i> .....	48
--------------------------------------	----

---

## CONTENTS

---

2.2 <i>FEEDSTOCK</i> .....	50
2.3 <i>MATERIALS</i> .....	51
2.4 <i>PREPARATION OF DIFFERENT METAL OXIDES</i> .....	52
2.4.1 Preparation of CdO & ZnO Nanoparticles by Precipitation Method.....	52
2.4.2 Preparation of CdO & ZnO Nanoparticles by Auto-ignition Method .....	53
2.4.3 Preparation of TiO <sub>2</sub> Nanoparticles.....	54
2.5 <i>CHARACTERIZATION OF THE PREPARED SAMPELS</i> .....	57
2.5.1 Thermal Gravimetric Analysis.....	57
2.5.2 X-Ray Diffraction Analysis (XRD).....	57
2.5.3 BET Surface Area Analysis .....	58
2.5.4 Scanning Electron Microscope (SEM).....	59
2.5.5 Transmission Electron Microscope (TEM).....	59
2.5.6 UV/Vis Spectrophotometer.....	59
2.5.7 Spectrofluorophotometer.....	59
2.5.8 Fourier Transform Infrared Spectroscopy (FTIR) .....	60
2.6 <i>PHOTOCATALYTIC ACTIVITY OF THE PREPARED     SAMPELS</i> .....	60
2.7 <i>SOLVENT EXTRACTION PROCESS</i> .....	62
2.7.1 Determination of Critical Solution Temperature (C.S.T).....	62
2.7.2 Solvent Extraction procedure.....	62
2.8 <i>ANALYSIS</i> .....	64
2.8.1 Hydrocarbon Component Analysis.....	64
2.8.2 Hydrogen Peroxide Concentration .....	65
2.8.3 Sulfur Content .....	65
2.9 <i>RADIATION SOURCES</i> .....	65
<b>CHAPTER (3) RESULTS AND DISCUSSION</b>	
3.1 <i>THERMAL GRAVIMETRIC ANALYSIS</i> .....	68
3.2 <i>X-RAY DIFFRACTION ANALYSIS</i> .....	73
3.3 <i>SURFACE IDENTIFICATION</i> .....	78
3.4 <i>MORPHOLOGICAL STRUCTURES</i> .....	82
3.5 <i>UV-VISIBLE ABSORPTION</i> .....	90
3.6 <i>CATALYST PHOTOLUMINESCENCE (PL)</i> .....	95
3.7 <i>CATALYST PHOTOCATALYTIC ACTIVITY</i> .....	98
3.7.1 Influence of The Radiation Source.....	99
3.7.2 Influence of Catalyst Dosage .....	101
3.7.3 Effect of Reaction Time .....	103
3.7.4 Sulfur Removal Via Catalytic Photochemical Reaction....	104
3.8 <i>SOLVENT EXTRACTION PROCESS</i> .....	110

---

## CONTENTS

---

3.8.1 Direct Solvent Extraction Process of Feedstock .....	113
3.8.2 Cross-Current Solvent Extraction Process.....	116
3.8.3 Regeneration of the Used Solvent.....	119
3.9 <i>EFFECT OF THE OPERATIONAL TIME OF IRRADIATION ON SULFUR REMOVAL% AT OPTIMUM CONDITIONS</i> .....	119
3.10 <i>MECHANISM OF DESULFURIZATION PROCESS</i> .....	121
3.11 <i>SPENT CATALYST</i> .....	126
3.11.1 Characterization.....	126
3.11.2 Catalyst Sustainability and Regeneration .....	127
3.12 <i>PROCESS ECONOMIZATION UNDER SUN IRRADIATION</i> .....	130
3.13 <i>COMPARATIVE DESULFURIZATION RATES BY CATALYST A-F</i> .....	131
3.14 <i>EFFECT OF AROMATIC CONTENT ON THE DESULFURIZATION PROCESS UNDER UV IRRADIATION</i> .....	134
<b>SUMMARY AND CONCLUSION</b> .....	144
<b>REFERENCES</b> .....	147
<b>APPENDIX</b>	
<b>ARABIC SUMMARY</b>

<b>Figure (41c):</b> FTIR spectrum of diesel fuel after catalytic photochemical process followed by solvent extraction.....	125
<b>Figure (42):</b> The structural and morphological characteristics of the spent catalyst.....	127
<b>Figure (43):</b> XRD patterns of the regenerated catalyst.....	129
<b>Figure (44):</b> Sulfur removal% by catalysts (A-F) under different radiation sources at optimum conditions after Catalytic photochemical process followed by solvent extraction.....	132
<b>Figure (45):</b> Effect of catalysts type under UV irradiation on the sulfur removal%.....	136
<b>Figure (46):</b> Effect of TiO <sub>2</sub> -to-Feed dosage on the sulfur removal%...	137

---

## LIST OF FIGURES

---

<b>Figure (47):</b> Effect of operational time of irradiation using TiO <sub>2</sub> (catalyst E) on sulfur removal% .....	<b>138</b>
<b>Figure (48):</b> Effect of oxidizing agent using TiO <sub>2</sub> (catalyst E) on sulfur removal% .....	<b>139</b>
<b>Figure (49):</b> Effect of Solvent/Feed ratio on the sulfur removal%. (UV lamps, TiO <sub>2</sub> dosage 5g/L second feed, 2h, second feed:H <sub>2</sub> O <sub>2</sub> :AcOH 1:1:1).....	<b>140</b>
<b>Figure (50):</b> ASTM distillation curve of diesel fuel and final product obtained by using TiO <sub>2</sub> and second feed under UV-lamps at optimum conditions .....	<b>143</b>

---

## **LIST OF TABLES**

<b>Table number</b>	<b>Page</b>
<b>Table (1):</b> Band gap energies corresponding to radiation wavelength required for excitation of various semiconductors.....	40
<b>Table (2):</b> General characteristics of the diesel fuel fraction.....	50
<b>Table (3):</b> Chemical reagents.....	51
<b>Table (4):</b> Symbols of the prepared metal oxides nanoparticles.....	57
<b>Table (5):</b> Surface characteristics and particles sizes values of the Prepared catalysts.....	78
<b>Table (6):</b> Effect of solvent extraction on the desulfurization of diesel fuel before and after oxidation under LHL using acetonitrile at S/F ratio 4/1.....	117
<b>Table (7):</b> General characteristics of the modified diesel fuel.....	135
<b>Table (8):</b> Physico-Chemical Characteristics of the diesel fuel and the final product obtained by using TiO <sub>2</sub> under UV-lamps at optimum conditions.....	142

---

## ACKNOWLEDGMENT

---

### ***ACKNOWLEDGMENT***

*First of all, I should express my deep thanks to Allah, with his grace this work was accomplished.*

*The author wishes to express her deepest gratitude to Prof. Dr. Ahmed Ismail Hashem, Professor of Organic Chemistry, Faculty of Science, Ain Shams University for his kind supervision, guidance and sponsoring the thesis to the university.*

*I would like to express my special appreciation and thanks to my advisor Prof. Dr. Omar Ibrahim Sif El-din, Professor of Petroleum refining, Refining Department, Egyptian Petroleum Research Institute (EPRI). He has been a tremendous mentor for me. I would like to thank him for encouraging my research and for allowing me to grow as a research scientist. I have learned many things since I became Dr. Omar's student. He spent time instructing me how to think, write thesis and how to search literature. Also for his valuable discussion that made this work possible outcome in this form. His fatherhood guidance helped me throughout the time of research and in writing this thesis. I could not have*
