مدرس علاج الجذور، قسم علاج الجذور. كلية طب الاسنان جامعة مصر الدوليه 2015

الملخص العربي

المقدمة

يعتبر علاج الجذور من حجر الزاوية و من المطتلبات المهمة في مجال طب الاسنان. يتم تحديد نسبة نجاح وبقاء الأسنان المستديمة بعد العلاج من القدرة على ضمان إزالة الأنسجة الميتة كاملة من القنوات من دون أية عوائق قد تؤثر على النتيجة العامة.

والسؤال هنا هو ما إذا كان هذا العلاج يف بالمقتضيات المقترحة ام لا. قد يواجه الطبيب العديد من الصعوبات وتلعب دورا هاما في تحديد نسبة النجاح للعلاج المقدم.

كسر أداة يعوق الطبيب من القيام بالعلاج الأمثل فإنه يجعله عاجزعن ما يتعين عليه القيام به للتغلب على هذا الخطأ. من الواجب عليه القيام باعادة ترتيب الافكار و طرق التغلب على الموقف ليكون قادرا على تقيم الاعلاج الامثل بالنسبة للحالة.

لا توجد طريقة موحدة و امنة لازالة المبرد المكسور داخل القنوات النتيجة دائما ترجع الى مهارات الطبيب و الادوات المتاحة المستخدمة في العلاج.

الغرض من البحث:

مقارنة بين ثلاث طرق لازالة المبرد المكسور داخل قنوات العصب تأثير هذه الطرق على عاج الجذر.

الطريقة المستخدمة

تم اختيار 60 ضرس ادمي مخلوع ثنائي الجذر. وتنقسم الي 3 مجموعات (الجدول 1) وفقا للتقنية المستخدمة لاسترجاع المبرد. وتنقسم كل مجموعة من المجموعات الثلاثة الي مجموعتين وفقا للأداة الدوارة التي تستخدم لتنظيف وتشكيل القناة و سيتم كسرها داخل القناة. ويتم عمل حفر في المبرد عند المستوي الذي سيتم كسر المبرد عنده و ذلك لضمان تكرار النتائج وانه سيتم قطع كل مبرد في نفس النقطة. يتم إدراج الملفات داخل قناة MB مع سرعة دوران وعزم دوران المعروف من قبل الشركة المصنعة، حتى يحدث الكسر. يتم استخدام تقنيات الاسترجاع الثلاثة في محاولة لإزالة المبرد المكسور و الوقت المطلوب لكل تقنية لانجاز المهمة ويتم كتابة النتائج. بعد ذلك يتم تحديد مدي سلامة القناة عن طريق الاشعة ثم يتم قطع الأسنان أفقيا وفحصها تحت الميكروسكوب المجسم لتحديد تأثير محاولات الإزالة على سمك عاج وتحديد ما هي التقنية الأقل ضررا.

To my Parents,

One and Only Brother

For believing in me

To my grandmother "may she rests in peace"

To my Special group of Friends

For their endless Support

Love you all Unconditionally

My deepest gratitude to

GOD

My mentor

My Deepest thanks and appreciation to Professor Doctor Ihab El-Sayed Hassanein Professor of Endodontics, Head of Endodontic Department, Ain Shams University, for all his help, collaborations, and guidance along the way till this thesis got completed.

I would like to thank Doctor Ahmed Moustafa ghobashy Lecturer of Endodontics, Endodontic Department, Misr International University, for offering me time, support throughout the whole work.

Deepest thanks and gratitude to all my Second Family at the **Endodontic Department**, Misr International University, for their endless support.
