Etiology of Carotid Ischemic Cerebrovascular Stroke

Thesis submitted for partial fulfillment of the Master Degree in Neuropsychiatry

Presented by

Mariam Zakaria

Under the supervision of

Prof. Dr. Magd Zakaria

Professor of Neurology

Faculty of Medicine - Ain Shams University

Dr. Mahmoud Hemeda

Assistant Professor of Neurology

Faculty of Medicine - Ain Shams University

Dr. Nevine El Nahas

Lecturer of Neurology

Faculty of Medicine - Ain Shams University

FACULTY OF MEDICINE

AIN SHAMS UNIVERSITY

2001

Acknowledgment

First and foremost, I would like to express my thanks and feelings of gratitude to Prof. Dr. ***Magd Zakaria****, Professor of Neurology, Ain Shams University, for suggesting the topic of this thesis and his kind support, tremendous understanding, kind heartedness, inspiring guidance and valuable supervision. To whom I am deeply indebted for encouraging me to develop this subject and words could never be enough to say thank you.*

My deep sincere thanks and appreciation goes to Dr., ***Mahmoud Hemada****, Assistant Professor of Neurology, Ain Shams University, for his constructive ideas, valuable comments, intensive effort, hard work and guidance.*

I'm profoundly grateful to Dr. ***Nevine El Nahas****, Lecturer of Neurology, Ain Shams University, for her great help and assistance, valuable time she's given me, her understanding and endless support and encouragement.*

I would like to express my thanks to, Dr. ***Hany Aref****, Assistant Professor of Neurology, Ain Shams University, for sparing lots of precious time and effort to perform TCD for patients included in this study.*

I'm deeply grateful to Dr. ***Ahmed Hazou*** *and Dr.* ***Hani Zaki****, Assistant Lecturers of Neurology, Ain Shams University for their continuous support and encouragement as their valuable assistance has made this work possible.*

Special thanks goes to all my Professors and colleagues who have provided me with lots of encouragement and support through all this work.

Special thanks goes to Dr. ***Mohsen Gad Allah****, Professor of Community, Ain Shams University for his valuable guidance and assistance in the Statistics and for Dr.* ***Nahla Fouzy****, Assistant Lecturer of Community Department, Ain Shams University, for her meticulous statistical analysis and great effort done in this work.*

Last but not least, I would like to express my love and sincere appreciation to my family and friends for their unfailing support and endurance through this work.

Mariam Zakaria
2001

List of Contents

	Page No.
Introduction and Aim of the Work	1
Chapter I: Vascular Anatomy	2-5
Chapter II: Risk Factors for Cerebrovascular Ischemic Stroke	6-20
Chapter III: Heart Disease and Ischemic Cerebrovascular Stroke	21-39
Chapter IV: Atherosclerosis	40-67
Chapter V: Investigations	68-83
Materials and Methods	84-86
Results	87-116
Summary and Conclusion	127-131
References	132-157
Arabic Summary	

List of Figures

	Page No.
Figure (1): Johann Jacob Wepfer.	2
Figure (2): Arterial supply to the brain.	3
Figure (3): Coronal section of brain of an infant.	19
Figure (4): Common sources of cardiogenic embolism	23
Figure (5): Aggregate estimates from recent clinical studies for the distribution of variable cardioembolic sources.	28
Figure (6): Carotid angiogram showing moderate internal carotid stenosis and large ulcer.	49
Figure (7): Internal carotid artery siphon.	82
Figure (8): Exhibit IA, TCD in a case of intracranial atherosclerosis.	107
Figure (9): Exhibit IIA, TCD in a case of extracranial carotid atherosclerosis.	109
Figure (10): Exhibit IIB, Carotid Duplex in a case of extracranial carotid atherosclerosis.	111
Figure (11): Exhibit IIIA, TCD in a cardioembolic stroke.	113
Figure (12): Exhibit IIIC, TEE in a case of cardioembolic stroke.	115

List of Tables

	Page No.
Table (1): Frequency of cardioembolic strokes in recent prospective studies.	*21*
Table (2): Sources of cardiogenic embolism.	*22*
Table (3): Common cardioembolic sources: risk stratification.	*24*
Table (4): Echocardiographic detection of common cardioembolic sources.	*26*
Table (5): Plaque morphology.	*48*
Table (6): Racial difference in the distribution of cerebrovascular atherosclerosis.	*58*
Table (7): Character of watershed infarcts.	*64*
Table (8): Normal velocities of Circle of Willis arteries as per Hennerichi.	*79*
Table (9): Criteria for the diagnosis of stenosis in the main stem of middle cerebral artery.	*80*
Table (10): Clinical evaluation.	*87*
Table (11): Relation between different sex and the 4 major investigations used.	*88*
Table (12): Group I.	*90*
Table (13): Group II.	*92*
Table (14): Group III.	*93*
Table (15): Group IV.	*94*
Table (16): Causes of ischemic cerebrovascular strokes in carotid domain in Egyptian patients.	*95*
Table (17): Etiology and sex.	*95*
Table (18): Etiology and age.	*96*
Table (19): Sex by age frequencies.	*98*
Table (20): Risk factors for stroke.	*98*

Table (21): DM association with intracranial and extracranial atherosclerosis. 99
Table (22): HTN association with intracranial and extracranial atherosclerosis. 100
Table (23): LDL association with intracranial and extracranial atherosclerosis. 101
Table (24): Cholesterol association with intracranial and extracranial atherosclerosis. 101
Table (25): Smoking association with intracranial and extracranial atherosclerosis. 102
Table (26): Percentage of cardiac abnormalities by Echocardiography. 103
Table (27): Percentage of cardiac abnormalities in 12 cases by Echo and history, EEG. 104
Table (28): Frequency of AF in different age groups. 104
Table (29): Prevalence of AF in different sex groups. 105
Table (30): AF association of age with sex. 105
Table (31): Comparison of incidence rate of first ever ischemic stroke subtypes among Blacks in Greater Cincinnati and Whites in Rochester, Minnesota. 123
