Biochemistry department

Monitoring Circulating Regulatory T Cells during the Early Post transplant Period in Kidney Transplantation in Egypt

Thesis

**Submitted for the requirements of The Master Degree
of Science (M.Sc.) in partial fulfillment
In biochemistry**

Presented by

Samar Mohamed Samir Mohamed Saad
(B.Sc. Biochemistry, 2007)

Under Supervision of

Prof Dr.

Ahmed Osman Egiza

Professor of Biochemistry
Faculty of Science,
Ain Shams University

Prof. Dr.

Essam Mohamed Khedr

professor of Nephrology
Faculty of Medicine,
Ain Shams University
Major of Egyptian society
for urology and kidney
transplantation

Dr. Abdel-Rahman B. Abdel-Ghaffar

Lecturer of Biochemistry, Faculty of Science,
Ain Shams University

2014

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ

الْحَكِيمُ ﴿٣٢﴾

صدق الله العظيم

سورة البقرة آية: ٣٢

Acknowledgments

First and foremost thanks to "**ALLAH**" who is the most great and most merciful.

I would like to express my sincere appreciation and gratitude to

Prof. Dr. **Ahmed Osman Egiza**, Professor of Biochemistry, Faculty of Science, Ain Shams University, for his effective helps, careful comments and kind supervision throughout this work.

I wish to express my especial thanks and great honored gratitude to Prof. Dr. **Essam Mohamed Khedr**, Major of Egyptian society for urology and kidney transplantation and Professor of Kidney, Faculty of Medicine, Ain Shams University. He gave me much of his time, experience, meticulous valuable advice, support and strict criticism.

I wish to express my gratitude to Dr. **Abdel Rahman Badr Abdel Ghaffar**, Lecturer of Biochemistry, Faculty of Science, Ain Shams University. He did not spare any effort in guiding me throughout this work.

Words fail to express my greatest appreciation to all members of the Molecular Immunology Unit (**MIU**) at Al-Azhar University for their help and support.

Dedication

I would like to dedicate this work to:

Every member of my faithful family:

My mother

My sisters Marwa Mohamed Samir

&

Reem Mohamed Samir

And my brother

Eng/Shreef Mohamed Samir

My lovely husband

Eng/Osama Abdel Rahman

For their endless love, support and encouragement

And finally to my lovely sons Ahmed &

*Foussef they are the most beautiful thing in my
whole life.*

Finally I would like to dedicate this work to

My Dad`s soul

Declaration

*This thesis has not been submitted for a degree at
this or any other university.*

*Samar Mohamed Samir Mohamed Saad
Eldeen Hassanin*

Biography

Name : Samar Mohamed Samir Saad EL-Din

Date of Graduation : May 2007, Faculty of Science,
Biochemistry Department,
Ain Shams University.

Degree of Awarded :B.Sc. in Biochemistry,
Good

Table of Contents

Table of Contents	i
List of tables	iv
List of figures	vi
List of abbreviations	viii
Abstract	xii
Introduction	1
Aim of work	4
Review of literature	5
• Chronic Renal failure	5
• Pathophysiology	6
• End stage renal disease in Egypt	10
• Renal Replacement Therapy	12
• Kidney Transplantation	13
• Transplant Immunology	15
▪ Transplantation Antigens	15
• MHC gene complex and protein	16
• HLA Human Leukocyte Antigen	17
• Human Leukocyte Antigen typing	20
• Anti-HLA alloantibody	21
• Non-HLA antibody	22
• Anti-HLA antibody detection	23
• 1. Antigen non-specific assay	23
• Cytotoxicity assays	23
• Flow cytometry	24
• 2. Antigen specific assays	24
• Enzyme Linked Immunosorbent assays	24
• Flow cytometry	25
• Luminex assays	25
• Humoral (antibody mediated) Rejection	27
• Molecular mechanisms of T-cell activation	30
• Effector stage	32

Table of contents

• Apoptosis	33
• Clinical stages of rejection	34
○ Acute rejection	34
○ Accelerated and hyperacute rejection	35
○ Chronic rejection	36
• Role of natural killer cell	38
• Dendritic cells	39
• B-cells	40
• T-cells	41
• A. T helper cells	41
• B. Cytotoxic T lymphocytes	42
• C. T-regulatory cell	42
• Natural Tregs	44
• Adaptive Trigs	46
• Regulatory CD4+ cells in transplantation	50
• Mode of action for immunosuppression	54
• Potential surrogate markers	63
• Preferred characteristics of a renal biomarker	63
• A. Blood sample	64
• B. urine sample	64
• C. biopsy sample	65
• Complications of biopsies	66
• I. Standard marker for kidney damage	66
1. Serum creatinine	67
• Creatinine disadvantages	68
2. Creatinine clearance	68
3. Histoimmunological marker	69
4. Chronic Allograft Damage Index CADI	69
• BNAFF criteria	70
	70

Table of contents

Subjects and Methods	73
○ Subject	73
○ Exclusion Criteria	74
○ Immunosuppressive regimens	76
○ Samples	76
○ Methods	77
○ Detection of anti-HLA antibody	77
○ Determination of CD4+ CD25+ T regulatory cells counts by flow cytometry	81
○ Statistical Analysis of Results	91
Results	102
Discussion	113
Summary	127
References	131
Arabic summary	i
