Supervisors

Prof. Dr. Hany Halim Nasr

Professor And Chairman Of Crown and Bridge Prosthodontics
Department Faculty Of Oral and Dental Medicine,
Cairo University

Prof. Dr. Badawy AbouEl-Mahassen Badawy

Professor of Crown and Bridge Prosthodontics
Faculty of Oral and Dental Medicine,
Cairo University

Prof. Dr. Mohamed Bahgat El-Kholi

Professor of Chemistry and Technology of Ceramic Materials,
National Research Center

ACKNOWLEDGEMENTS

I would like to express my deepest appreciation, enormous thanks, and sincere gratitude to Dr. Hany Halim Nasr, Professor and Chairman of Crown and Bridge Prosthodontics Department, Faculty of Oral and Dental Medicine, Cairo University, for guiding me kindly, supporting me willingly, correcting me patiently, and teaching me how precision, honesty, and sincerity are needed in work as in life.

Words can never express how grateful I am to Dr. Mohamed Bahgat El-Kholi, Professor of Chemistry and Technology of Ceramic Materials, National Research Center, for his great help and encouragement, valuable advices and orientation, continuous effort, and kind care he expanded throughout the investigation.

Special thanks are due to Dr. Badawy Abou El-Mahassen Badawy, Professor of Crown and Bridge Prosthodontics, Faculty of Oral and Dental Medicine, Cairo University, for his kind supervision and the facilities he offered me.

My thanks are due to Professor Dr. Samir El Kalla, Faculty of Agriculture Mansoura University for his assistance in the statistical evaluation of the data of this investigation.

Special appreciation is dedicated to Dr. Fattouh Abdallah Ramadan, Professor and former Chairman of Crown and Bridge Prosthodontics Department, Faculty of Oral and Dental Medicine, Cairo University. Also thanks are due to all the staff members of Crown and Bridge Prosthodontics Department for their help and assistance.

Special thanks are due to Dr. Adel El khoudary professor of Biomaterials, faculty of oral and dental medicine Cairo University for his kind advices and great help.

Appreciation and gratitude are also extended to Professor Dr. Abdel Hamid Hussein, Professor of metallurgy Faculty of Engineering Cairo University for his assistance in placing the facilities of his department at my disposal.

I wish also to express my deep gratitude and thanks to Dr. Mostafa El-Sherif, Professor and chairman of Photometry, National institute for standards, for his tremendous guide in the spectrophotometric study.

My thanks are due to the members of my family for their encouragement and help.

Finally, I wish to express my thanks to all those who have helped me to make this work possible.

LIST OF TABLES

Tables No		Page No.
1	Etching conditions of the different porcelains.	52
2	Treatment conditions of porcelain samples used for shear bond strength test.	61
3	Grouping of porcelain samples used for optical tests.	74
4	Guide values for the constituting oxides of the three porcelain systems.	78
5	Mean and standard deviation (SD) of the shear bond strength (MPa) of composite resin luting cement bonded to Mirage porcelain (M) after different surface treatments.	95
6	Mean and standard deviation (SD) of the shear bond strength (MPa) of composite resin luting cement bonded to Vitadure porcelain (V) after different surface treatments.	98
7	Mean and standard deviation (SD) of the shear bond strength (MPa) of composite resin luting cement bonded to Duceram porcelain (D) after different surface treatments.	101
8	Mean Fracture toughness (MPa/m ^{1/2}) of Mirage porcelain (M) after being etched differently.	109
9	Mean Fracture toughness (MPa/m ^{1/2}) of Vitadure porcelain (V) after being etched differently.	111
10	Mean Fracture toughness (MPa/m ^{1/2}) of Duceram porcelain (D) after being etched differently.	113

11	Translucency ($T_d\%$) and color difference (ΔE) of Mirage porcelain (M) after being etched differently.	117
12	Translucency ($T_d\%$) and color difference (ΔE) of Vitaduer porcelain (V) after being etched differently.	119
13	Translucency ($T_d\%$) and color difference (ΔE) of Duceram porcelain (D) after being etched differently.	121
