***Theoretical Study for Negative and Positive
Charges in Semiconductor Quantum Dots***

Presented by

Safwan Saleh Abd El-Mwla Soliman

A Thesis Submitted

To

Faculty of Science

In Partial Fulfillment of the

Requirements for the Degree of

Ph.D of Science

(Theoretical physics)

Physics Department

Faculty of Science

Cairo University

(2010)

100

APPROVAL SHEET

**Thesis Title: Theoretical Study for Negative and Positive Charges
in Semiconductor Quantum Dots**

Name of candidate: Safwan Saleh Abd El-mwla Soliman

This thesis has been approved for submission by the supervisors:

1- Prof. Dr. Tharwat Mahmood El-Sherbini

Physics Department, Faculty of Science, Cairo University

2- Prof. Dr. Nagwa Ahemed El-Meshad

Theoretical Physics Department, National Research Center

3- Prof. Dr. Sami Hanafi Allam

Physics Department, Faculty of Science, Cairo University

4- Dr. Assma Abd El-Rahman Saleh

Theoretical Physics Department, National Research Center

Prof. Dr. Gamal A. Madbouly

Chairman of Physics Department

Faculty of Science – Cairo University

ACKNOWLEDGEMENT	I
ABSTRACT	II
LIST OF FIGURES	III
LIST OF TABLES	IV
LIST OF ABBREVIATIONS	V

CHAPTER 1: INTRODUCTION

1.1- Historic Overview	1
1.2- Semiconductor and Semiconductors nanostructures	1
1.3- Quantum confinement and size effect (dimensionality)	2
1.4- Quantum Dot	6
1.5- Fabrication techniques of quantum dots	10
1.5.1- Natural quantum dots	10
1.5.2- Self-assembled quantum dots	11
1.5.3- Growth on Strongly Patterned substrates	12
1.5.4- Cleaved edge overgrowth	12
1.6- Theoretical treatment of quantum dot	13
1.6.1- Effective mass approximation (EMA)	14

Contents

1.6.2- Pseudo-potential Approximation-----	15
1.6.3- Tight binding approximation -----	18
1.6.4- Strain-----	19
1.7-Charges in quantum dot-----	20
1.7.1- Electrons and Holes in quantum dot-----	20
1.7.2- Excitons in quantum dot-----	22
1.8- Applications of Quantum dot-----	24
1.8.1- Quantum dot laser-----	24
1.8.2- Quantum Dot Infrared Photo-detectors-----	25
1.8.3- Quantum dot solar cell-----	26
References-----	28

CHAPTER 2: Negative and Positive Charged Excitons in a Semiconductor Quantum Dot

2.1- Introduction-----	34
2.2- Theoretical Model-----	35
2.2.1- Negative Trion-----	35
2.2.2- Positive Trion-----	40
2.3- Results and Discussion -----	40
2.4- Conclusions-----	50
References -----	51

Contents

CHAPTER 3: Neutral and Negative Donor Impurity in a Semiconductor Quantum Dot

3.1- Introduction	53
3.2-Theoretical Model	54
3.2-1- Neutral donor impurity	54
3.2.2- Negative donor impurity on and of- center	58
3.3- Results and Discussion	60
3.4- Conclusions	71
References	71

CHAPTER 4: The Positive Donor Impurity in Quantum Dot, Quantum Well Limit and Quantum Wire Limit

4.1- Introduction	74
4.2- Theoretical Model	76
4.2.1- The positive donor center	78
4.3- Results and Discussion	80
4.4- Conclusions	89
References	90

CHAPTER 5: Electric-Field Effects on a Semiconductor

Quantum Dot

5.1- Introduction-----	92
5.2- Theoretical Model-----	93
5.2.1- Lateral -Electric field in(x-y) direction-----	93
5.2.2- Electric field in z direction-----	98
5.2.3- Neutral donor (D^0) Hamiltonian-----	100
5.3- Results and Discussion -----	101
5.4- Conclusions-----	114
References -----	115

APPENDICES

Appendix 1: Variational method-----	117
Appendix 2: Proof of equation (2-8) -----	120
Appendix 3: Program to calculate the energy of negative Trion (X^-)--	123
Appendix 4: Program to calculate the energy of neutral donor impurity (D^0) -----	128
Appendix 5: Program to calculate the ground state energy and the binding energy for positive donor impurity (D^+) on and off-center and in QW, and QWW-----	131

Contents

Appendix 6: Program to calculate the ground state energy for the
electron in the presence of lateral electric field -----135

Appendix 7: Program to the ground state energy of the electron in the
presence of normal electric field-----137

List of publications -----138
