**The USE OF RADIATION
GRAFT COPOLYMERS IN
SOME INDUSTRIAL
WASTES**

B 4 869

A Thesis
Submitted to
**University Collage for Girls
Ain Shams University**

By
Ghada Adel Mahmoud

For
The Degree of Ph.D. in Chemistry

**National Center for Radiation Research and
Technology
Atomic Energy Authority
2001**

The Use of Radiation Graft Copolymers in Some Industrial Wastes

Supervisors

Approved

Prof. Dr. Abo El-Khair B. Mostafa

Professor of Physical Chemistry
Deputy University Collage for Girls
Ain Shams University

A. Khair
7

Prof. Dr. El-Sayed A. Hegazy

Professor of Radiation Chemistry
Chairman of Industrial Irradiation Division
National Center for Radiation Research and
Technology - Atomic Energy Authority

E. A. Hegazy

Dr. Hanaa K. Mohamed

Ass. Professor of Radiation Chemistry
Polymer Chemistry Department
National Center for Radiation Research and
Technology - Atomic Energy Authority

H. Kamal

Acknowledgment

ACKNOWLEDGEMENT

First of all, thanks to God for the infinite helps and persistent supply with patience and efforts to accomplish this work successfully.

*The author would like to express her gratitude to **Prof. Dr. Abo. El-Khair B. Mostafa** (Prof. of Polymer Chemistry Deputy University Collage for girls Ain Shams University) for his sponsorship, valuable advice and fruitful discussion throughout this work.*

*She is cordially indebted of **Prof Dr. El-Sayed A. Hegazy** (Prof. of Radiation Chemistry Deputy Chairman, Industrial Irradiation Division, National Center for Radiation Research and Technology-Atomic Energy Authority) for his close supervision and for suggesting the topics of this work, fruitful guidance and helpful discussions. The support given by him was indispensable to the completion of this work.*

*Deepest thanks and sincere gratitude are to **Dr. Hanaa K. Mohamed** (Ass. Prof. of Radiation Chemistry, Polymer Chemistry Department, National Center for Radiation Research and Technology-Atomic Energy Authority) for her keen supervision, generous guidance, scientific and practical support throughout this work.*

Many thanks are also for all the staff members and colleagues of National Center for Radiation Research and Technology-Atomic Energy Authority, for their interest and facilities provided throughout this work.

List of Tables	
Abstract	i
Aim of the Work	ii

CHAPTER I INTRODUCTION

I.1. Radiation - Induced Grafting	1
I.2. Factors Affecting Radiation Grafting	3
I.2.1 Monomer Concentration	3
I.2.2. Deactivation	4
I.2.3. Cross-Linker	4
I.2.4. Influence of Dose and Dose Rate	5
I.3. Applications	5
I.3.1. Reverse Osmosis	5
I.3.2. Ultra-filtration	6
I.3.2.1. Biological Product	6
I.3.2.2. Food and Beverage Products	7
I.3.2.3. Waste Treatment	7
I.3.3. Dialysis	7
I.3.4. Gas Separation	8
I.3.5. Micro-filtration	9
I.3.5.1. Dyes	9
I.3.5.2. Metal ions	11

CHAPTER II LITERATURE SURVEY

RADIATION- INDUCED GRAFT POLYMERIZATION	13
II.1. Methyl Methacrylate (MMA)	13
II.2. 4-Vinyl Pyridine (4-VP)	17
II.3. Styrene (Sty)	21

II.4. Acrylonitrile (AN)	32
II.5. Vinyl Acetate (VAc)	34
II.6. Other Monomer Systems	36

CHAPTER III EXPERIMENTAL

III.1. MATERIALS	51
III.1.1. Polymer Substrate	51
III.1.2. Monomers	51
III.1.3. Chemicals	51
III.2. APPARATUS AND METHODS	51
III.2.1. Gamma Radiation Source	51
III.2.2. Graft Copolymerization	52
III.2.3. Sulfonation of the Grafted Films	52
III.2.4. Alkaline Treatment of the Grafted Films	53
III.2.5. Quaternization of the Grafted Films	53
III.2.6 Swelling Measurements	53
III.2.7. Mechanical Properties Measurements	54
III.2.8. (FTIR) Measurements	54
III.2.9. Scanning Electron Microscope (SEM)	55
III.2.10. Thermal Analysis	55
III.2.10.1. Thermal Gravimetric Analysis (TGA)	55
III.2.10.2. Differential Scanning Calorimetry (DSC)	55
III.2.1.1. Metal Uptake Measurements	55
III.2.12. Dye Uptake Measurements	57

CHAPTER IV RESULT AND DISCUSSION

IV.1. INTRODUCTION	59
IV.2. RADIATION INDUCED GRAFT COPOLYMERI- ZATION OF (MMA/Vac) (Sty/VAc) AND 4-VP	60
IV.2.1. Effect of Solvent	60
IV.2.2. Effect of Additives	62
