

**EFFECT OF NURSING INSTRUCTIONS ON PATIENTS  
WITH LIVER TUMOR UNDERGOING  
RADIOFREQUENCY ABLATION**

*Thesis*

*Submitted for Partial Fulfillment of the Requirements of  
the Doctorate in Nursing Science Degree  
(Medical- Surgical Nursing)*

*By*

**Salwa Mahmoud Abd Elwahab Awad**  
*(M.Sc. Nursing)*

*Faculty of Nursing  
Ain Shams University  
2013*

**EFFECT OF NURSING INSTRUCTIONS ON PATIENTS  
WITH LIVER TUMOR UNDERGOING  
RADIOFREQUENCY ABLATION**

*Thesis*

*Submitted for Partial Fulfillment of the Requirements of  
the Doctorate in Nursing Science Degree  
(Medical - Surgical Nursing)*

*Under Supervision of*

**Prof. Dr. Tahany El Senousy**

Professor of Medical-Surgical Nursing  
*Faculty of Nursing - Ain Shams University*

**Assist. Prof. Dr. Hanan Sobeih Sobeih**

Assistant Professor of Medical-Surgical Nursing  
*Faculty of Nursing - Ain Shams University*

*Faculty of Nursing  
Ain Shams University*

**2013**

# *Dedication*

✚ *To the soul of my father*

✚ *To my lovely mother*

✚ *To all my friends*

*I dedicate this work*

*Salwa Mahmoud*

## *Acknowledgement*

*First and foremost, I feel always indebted to GOD, the most kind and the most merciful,*

*I am deeply grateful to **Prof. Dr. Tahany Elsenousy** Professor of Medical Surgical Nursing, Faculty of Nursing, Ain Shams University, I am indebted to her constructive criticism, expertise, continuous, unlimited help and giving me the privilege to work under her supervision. I appreciate her active participation in providing me with a lot of knowledge.*

*I am deeply grateful to **Assist. Prof. Dr. Hanan Sobeih Sobeih**, Assistant professor of Medical-Surgical Nursing, Faculty of Nursing, Ain Shams University, for her meticulous supervision, efforts, fruitful guidance, valuable support and instructions throughout this work all are deeply and heartily appreciated.*

*I would like to express my deep thanks to all those who contributed by giving their time, effort, and encouragement to the fulfillment of this work.*

***Salwa Mahmoud***

## **List of Abbreviations**

- **ASA:** American Society of Anesthesiologists
- **AV:** Atrio-Ventricular
- **BUN:** Blood Urea Nitrogen
- **CBC:** Complete Blood Count
- **CEA:** Carcino-Embryonic Antigen
- **CLD:** Chronic Liver Disease
- **Cm:** Centimeter
- **CPR:** Cardio-Pulmonary Resuscitation
- **CRC:** Colorectal Carcinoma
- **CT:** Computed Tomography
- **ECG:** Electrocardiogram
- **FDG:** Flurodeoxyglucose
- **GSV:** Great Saphenous Vein
- **HBV:** Hepatitis B Virus
- **HCV:** Hepatitis C Virus
- **HCC:** Hepatocellular Carcinoma
- **HRQOL:** Health-Related Quality of Life

- **IV:** Intravenous
- **Kg:** Kilogram
- **KHz:** Kilo Hertz
- **L:** Liter
- **LITT:** Laser-Induced Thermal Therapy
- **MAR:** Medication Administration Record
- **MCT:** Microwave Coagulation Therapy
- **Mg:** milligram
- **MRI:** Magnetic Resonance Imaging
- **PEI:** Percutaneous Ethanol Injection
- **PET:** Positron Emission Tomography
- **PDT:** Photodynamic Therapy
- **PT:** Prothrombin Time
- **PTT:** Partial Prothrombin Time
- **RFA:** Radiofrequency Ablation
- **RN:** Registered Nurse
- **SRMs:** Small Renal Masses
- **SAR:** Specific Absorption Rate
- **USA:** United State of American
- **WHO:** World Health Organization

## LIST OF TABLES

---

Table	Title	Page
1	Demographic characteristics of the studied nurses (n=15)	76
2	Demographic characteristics of studied patients in both groups study and control (n=100)	78
2	Continue demographic characteristics (medical history) of the studied patients in both groups study and control (n=100)	80
3	Nurses level of knowledge pre/post nursing instructions as regards Radio Frequency Ablation (RFA) procedure (n=15)	81
4	Total Satisfactory level of studied nurses` knowledge pre/post nursing instructions as regards RFA procedure (n=15)	83
5a	Role of nurse before RFA procedure pre/post nursing instructions (n=15)	84
5b	Continue role of nurse before RFA procedure as regards drugs and infection control measures pre/post nursing instruction(n=15)	86
5c	Continue role of nurse before RFA procedure as regards	88

---

	patient preparation pre/post nursing instructions (n=15)	
6	Role of nurses during RFA procedure pre/post nursing instructions (n=15)	90
6	Continued role of nurse during RFA procedure pre/post nursing instructions (n=15)	92
7a	Role of nurse after RFA procedure as regards patient care pre/post nursing instructions (n=15)	94
7b	Continue role of nurse after RFA procedure as regards to procedure related to room environment pre/post nursing instructions (n=15)	96
7c	Continue role of nurse after RFA procedure as regards nursing discharge instructions for patient pre/post nursing instructions (n=15)	98
8	Total score of studied nurses` performance pre/post nursing instructions (n=15)	100
9	Patients` level of anxiety in both groups (study & control) pre/post nursing instructions (n=100)	101
10	Total patients` level of anxiety (study & control groups) pre/post nursing instructions (n=100)	103
11	Part (A) Level of patients` satisfaction in both group (study &	104

	control) as regards technical competence of nursing care quality (n=100)	
12	Part (B) Level of patients' satisfaction in both groups (study& control) as regards information giving(n=100)	106
13	Part (C) Level of patients' satisfaction in both groups (study & control) as regards assurance (n=100)	108
14	Part (D) Level of patients' satisfaction in both groups (study & control) as regards empathy (n=100)	110
15	Total Satisfactory level of patient among the study and control group (n=100)	111
16	Level of patients satisfaction for both patients group (study & control) (n=100)	112
17a	Complications of RFA procedure among the study and control groups	114
17	Continue complications of RFA procedure among the study and control groups.	115
18	Correlations between level of patients' satisfaction and level of anxiety (study & control groups)	116
19	Correlation between level of nurses knowledge and performance pre /post nursing instructions	117

## List of Figure

<b>Figure</b>	<b>Title</b>	<b>Page</b>
1	Comparison between total nurses` knowledge pre and post nursing instructions	82
2	Relation between total nurses` performance pre and post nursing instructions	101
3	Relation between number of patients` satisfaction among study and control group	115

## INTRODUCTION

Liver cancer has a high prevalence among cancers in general and is the third most common cause of death worldwide. Liver cancer kills almost all patients who have it within a year. It was estimated that there were about 564,000 new cases of liver cancer worldwide, and a similar number of patients died as result of this disease (**Gervais & Arellano, 2011**).

HCC is a peculiar malignant tumor that is completely different from other solid tumors because of its high recurrence rate after curative treatment about 80% at 5 years. HCC arises in chronically damage liver, i.e., in patients with chronic hepatitis or liver cirrhosis caused by viral hepatitis B or C or with nonalcoholic steatohepatitis related cirrhosis (**Yang & Roberts, 2010**).

Radiofrequency ablation (RFA) is one of the emerging therapeutic modalities used for the minimally invasive treatment in the management of early-stage of HCC when liver transplantation or surgical resection are not suitable options. In addition, RFA is considered a viable alternate to surgery; for inoperable patients with limited hepatic metastatic disease, especially from colorectal cancer, and for patients deemed ineligible for surgical resection because of extent and location of the disease or concurrent medical conditions (**Choi & Lee, 2010**).

Radiofrequency Ablation has become the standard of care for the treatment of primary and metastasis tumors. The goal of this treatment is to produce necrosis by raising local tissue temperatures, while limiting the collateral damage to adjacent healthy tissue (**Chan; Chiu; Cho; Poon; Luk et al., 2010**) .

Regarding to advantages of RFA, it is safe, ease to use, effective and requires a minimal hospital stay or can be performed to an outpatient basis. Radiofrequency ablation has shown promise in treating selected solid tumors, particularly those involving the liver, kidney, lungs, rectum,
