CLINICAL DIAGNOSIS OF OCULAR INFECTION OF CHLAMYDIA TRACHOMATIS BY POLYMERASE CHAIN REACTION, MOLECULAR APPROACH

Master thesis

by

Mohamad Sharaf El-Din Zaky Badr

Bs.c. 1984

Under Supervision of

Prof. Dr. Mohamad Ramadan Abo Shady

Professor and Head of Microbiology Department

Faculty of Science

Ain Shams University

Prof. Dr. Mahmoud Imam Nasr

Ex Dean of Genetic Engineering and Biotechnology Research Institute
(GEBRI)

El-Menoufiya University

Dr. Mohammad Sayed Salama

Professor of Molecular Biology

Faculty of Science

Ain Shams University

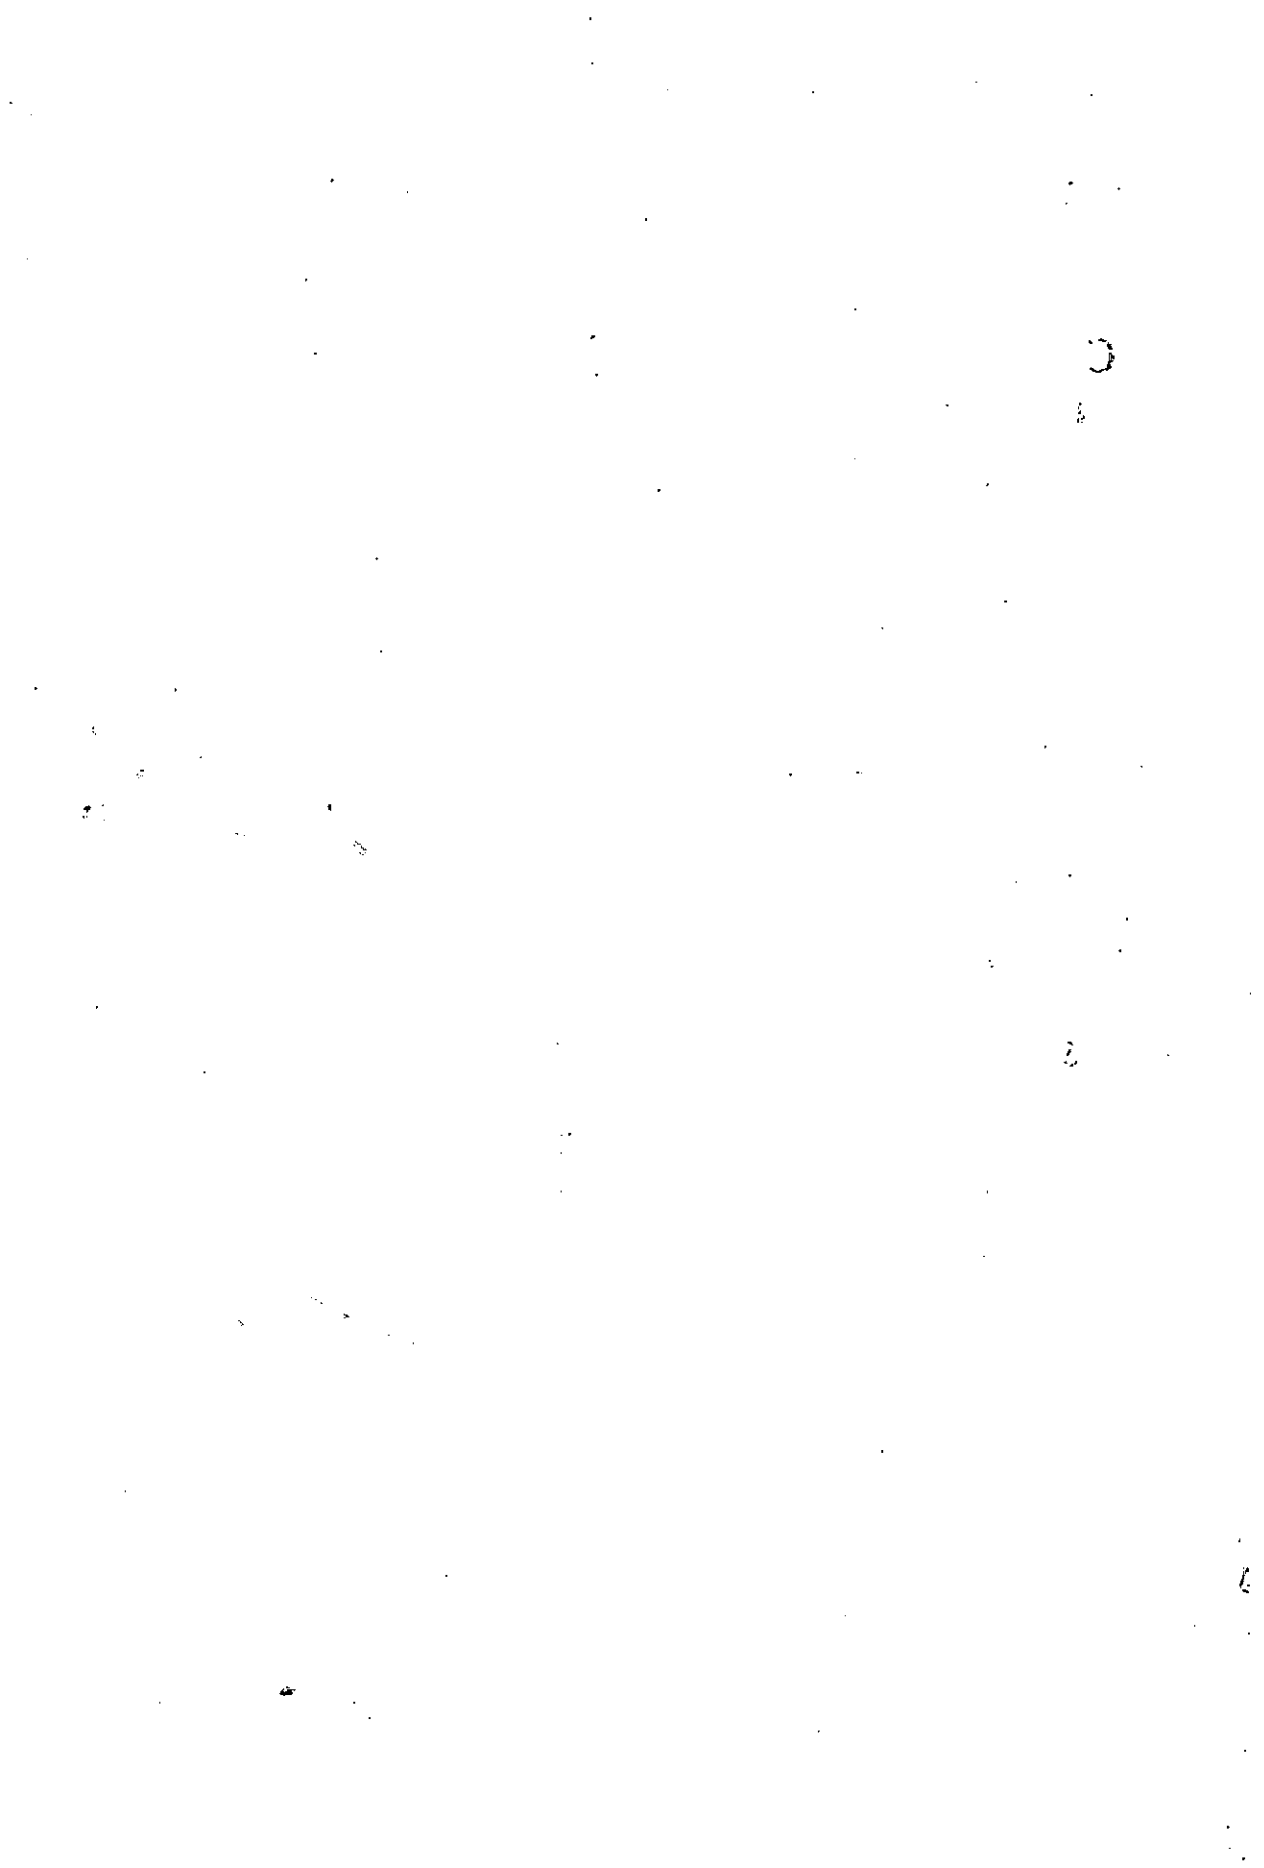

Microbiology

Approval Sheet

Title of Thesis: Study on clinical diagnosis of ocular infection of *Chlamydia trachomatis* by polymerase chain reaction, a molecular approach.

Degree: Master in Microbiology.

Name of Students: *Mohamad Sharaf El-Din Zaki Badr.*

This thesis for Master degree has been approved by :

Date: / / 2000

ACKNOWLEDGMENT

Thanks to God who allowed and helped me to accomplish this work.

*I would like to express my deepest gratitude and most sincere thanks to **Prof. Dr. Mohamed Ramadan Abu-Shady**, Professor and Chairman of Microbiology Department, Faculty of Science, Ain Shams University, for his continuous guidance, encouragement and directions through out this work.*

*My grateful thanks to **Prof. Dr. Mahmoud Imam Nasr**, Ex Dean of Genetic Engineering and Biotechnology Research Institute (GEBRI), El-Menoufiya University, for his illuminating advice, close supervision, kind care and continuous encouragement.*

*I wish to convey my appreciation to **Dr. Mohammad Sayed Salama**, Assistant Professor of Molecular Biology, Faculty of Science, Ain Shams University, for his helpful guidance, kind care, unfailing advice, assistance, valuable continuous support and patience in revising the whole work.*

*I would like to convey my appreciation to **Prof. Dr Adel El-Mesairy**, Professor of parasitology, and Director of the Medical Research Center, Faculty of Medicine, Ain Shams University, for allowing me to work in the center and use the well selected instruments, and for his patience on work troubles till I finished the research.*

*I am greatly indebted to **Dr. Ra'iifa Mohamed Hasaneen**, Professor of plant Physiology, Department of Botany, Faculty of Science, Ain Shams University, for advising, encouraging and helping me to start this work.*

*Great thanks are due to **Prof. Dr. Khaleel El-Halafawy**, Dean of Genetic Engineering and Biotechnology Research Institute (GEBRI), El-Menoufiya University, who selected the point and started this work with me.*

*I would like to express my deepest thanks to **Dr. Maher Shehata**, Lecturer of Genetics, Department of Botany, Faculty of Science, Ain Shams*

University, who offered me great help and spent a lot of time and effort to fulfill this work.

*Special thanks are due to **Prof. Dr. Ali Sa'ad** Professor of Ophthalmology, Faculty of Medicine, Ain Shams University, for his great help in sample collection and helping understanding medical data.*

*Many thank for **Dr. Mohamed El-Zayat**, Clinical Pathology Specialist, **Dr. Ra'afat Fawazy**, Management Assistant in Medical Research Center, and **Dr. Amany Saleh Awad**, Lecturer in Microbiology and Immunology, Faculty of Medicine, for their help.*

Special thanks are to the staff members of both Microbiology Department, Faculty of Science, and Medical Research Center, Faculty of Medicine, Ain Shams University.

*Many thanks for the Roche Diagnostic office, **Dr. Ahmad Ezzat**, **Dr. Raghad Safwat**, **Eng. Emad El-Gindy**, for giving good information and papers that helped me in this work.*

Table of Contents

Serial No.	Title	Page No.
1	Introduction	1
2	Literature Review	3
3	Historical Background	3
4	Chlamydiae	6
5	Trachoma	23
6	Conjunctival Flora and Conjunctivitis	47
7	Laboratory diagnosis of trachoma	49
8	Materials and Methods	78
9	Patients	78
10	Sequence analysis and selection of PCR primer	79
11	Primer synthesis and purification	80
12	Extraction of nucleic acids from eye swabs	86
13	DNA isolation from plasmid vectors	95
14	PCR amplification protocol	98
15	Detection of the amplified product and DNA analysis by agarose gel electrophoresis	101
16	Measurement of the sensitivities of different primer pairs	104
17	Quantitative PCR	105
18	Results	109
19	DNA extraction methods	109
20	Evaluation of PCR primers	114
21	Sensitivity of primers	118
22	PCR results using different primer pairs	123
23	PCR results using different methods of plasmid extraction	125
24	Quantitative PCR	126
25	Semi - Quantitative method	130
26	Gel document system method	132
27	Quantification making use of the equation	134
28	Discussion	138
29	Recommendation	146
30	Summary	148
31	References	151
32	Arabic Summary	--
