

Environmental study of radioactivity concentrations and potential poisoning levels of heavy metals in Nile delta region

Thesis Submitted for the Degree of Doctor Philosophy in Science
(Biophysics)

BY

Rasha Hassan Mohamed Hassanin
M.Sc. in Biophysics (2013)

Supervised by

Prof. Dr. Samir Y. El-Khamisy

Prof. of Nuclear Physics, Physics Department, Faculty of Science, Ain Shams
University, Cairo, Egypt.

Prof. Dr. Soad A. El-Fiki

Prof. of Radiation Physics, Physics Department, Faculty of Science, Ain Shams
University, Cairo, Egypt.

Prof. Dr. Mona Salah El-Din Hassan Talaat

Prof. of Biophysics, Physics Department, Faculty of Science, Ain Shams University,
Cairo, Egypt.

Dr. Eman Mohamed Saleh

Lecturer of Biochemistry, Biochemistry Department, Faculty of Science, Ain Shams
University, Cairo, Egypt.

Prof. Dr. Ali Salem Hussein

Prof. of Physics, Basic Science Department, Faculty of Engineering, Misr University
for Science and Technology, Giza, Egypt.

Ain Shams University
Faculty of Science

**Environmental study of radioactivity
concentrations and potential poisoning levels of
heavy metals in Nile delta region**

Thesis Submitted for the Degree of Doctor Philosophy in Science
(Biophysics)

BY

Rasha Hassan Mohamed Hassanin

Teaching Assistant, Misr University for Science and Technology
Giza, Egypt

Supervised by

Prof. Dr. Samir Y. El-Khamisy

Physics Department, Faculty of Science,
Ain Shams University, Cairo, Egypt.

Prof. Dr. Soad A. El-Fiki

Physics Department, Faculty of Science,
Ain Shams University, Cairo, Egypt.

Prof. Dr. Mona Salah El-Din Hassan Talaat

Physics Department, Faculty of Science,
Ain Shams University, Cairo, Egypt.

Dr. Eman Mohamed Saleh

Biochemistry Department, Faculty of Science,
Ain Shams University, Cairo, Egypt.

Prof. Dr. Ali Salem Hussein

Basic Science Department, Faculty of Engineering,
Misr University for Science and Technology, Giza, Egypt.

Approved

Department of Physics
Faculty of Science
Ain Shams University
2017

Name: Rasha Hassan Mohamed Hassanine

Degree: Ph.D. (Biophysics)

Department: Physics-Biophysics Group

Faculty: Science

University: Ain-Shams

Graduation Date: 2004 Ain Shams University

Registration Date: 2013

Date of Award: 2017

Acknowledgement

First and foremost cordial thanks to Allah.

No words could express my sincere appreciation and deepest thanks to ***Prof. Dr. Samir Yousha El-Khamisy***, Professor of Nuclear Physics, Faculty of Science, Ain Shams University, for his endless help, fatherly attitude, creative thinking, valuable suggestions and constant advice throughout this work. Without his support, the performance of this work would be difficult.

I am deeply indebted to ***Prof. Dr. Soad El-Fiki***, Professor of Radiation Physics, Faculty of Science, Ain Shams University, for instructive guidance, tremendous concern and care, and invaluable assistance. I am very much honored to have her as my supervisor.

My great thanks to ***Prof. Dr. Mona Salah El-Din Hassan Talaat***, Professor of Biophysics, Faculty of Science, Ain Shams University, for her supervision and valuable assistance during the progress of this work.

I am so grateful to ***Dr. Eman M. Saleh***, Lecturer of Biochemistry, Biochemistry Department, Faculty of Science, Ain Shams University for her spiritual and practical guidance, her enthusiastic encouragement and revision of every detail, as well as profound reading of the manuscript.

I would like to thank with gratitude ***Prof. Dr. Ali Salem Hussein***, Professor of Physics, Faculty of Engineering, Misr University for Science and Technology, for his kind supervision, kind

encouragement, his continuous support and kind guidance throughout the present work.

Also, my deep thanks to **Dr. Hanan Mohamed Diab**, professor of Radiation Physics, Nuclear Safety, Cairo, Egypt, for her cooperation and kind help in experimental techniques of the thesis.

My deep thanks and regards to the Head of Physics Department, staff members of the Biophysics, Nuclear Physics and Biochemistry Department, Faculty of Science, Ain Shams University and Nuclear Safety Center for their support and help.

Last but not least, I would like to thank all my colleagues specially my colleagues **Prof. Dr. Ayman Helmy & Dr. Wafaa Ghareib** for their sincere help and encouragement during the course of this study.

Rasha Hassan

Dedication

No words could express my sincere
appreciation, deepest thanks to

My mother

For her endless help

Very special thanks dedicated to my great son **AMMAR**
ESSAM and my beautiful daughter **JANA ESSAM**
praying to be safe and blessed.

To my father, my sister

My special family

For their love, encouragement, help and prayers that
made studies possible and to them I owe everything.

Rasha Hassan

List of Tables.....	iv
List of Figures.....	ix
List of Photos.....	xii
List of Abbreviations.....	xv
Abstract.....	xvii

Chapter one:

Introduction and Literature Review

I Radioactivity and Environment.....	1
1.1 Natural sources of radiation.....	1
1.1.1 Terrestrial radiation.....	1
1.1.2 The radioactivity in water.....	1
1.1.3 Air born radioactivity.....	1
1.1.4 Cosmic radiations.....	2
1.2 Man-Made radiation sources.....	2
1.2.1 Nuclear test.....	2
1.2.2 Nuclear power plants.....	2
1.2.3 Medical uses of radiation.....	3
1.3 Pathways of radionuclides.....	3
1.4 Health effect of radionuclides.....	3
1.5 Overview of specific natural radioactivity.....	3
II Heavy Metals and Environment.....	4
1.6 Overview of the heavy metals and hazard on blood, liver and kidney.....	4

Chapter Two

Theoretical Aspects

2.1 Biological Effects of Radiation.....	7
2.2 Radiation Exposure.....	7
2.2.1 Internal Exposure.....	7
2.2.2 External Exposure.....	7
2.3 Interaction of Gamma-ray With Matter.....	7
2.4 Gamma Rays Attenuation.....	8
2.5 Radiation Dose.....	9

2.6 Radiation Detectors.....	10
2.6.1 Germanium Detector.....	10
2.7 Biological effects of heavy metals.....	14
2.7.1 Cadmium Toxicity.....	14
2.7.2 Chromium Toxicity.....	14
2.7.3 Copper Toxicity.....	14
2.8 Usage of complementary natural antioxidant supplements in the treatment of heavy metal toxicity.....	13
2.8.1 Aloe vera.....	15

Chapter three

Materials and methods

3.1 General Features of the Studied Area.....	16
3.2 Efficiency Calibration	16
3.2.1 Energy and Relative Efficiency Calibration Method	16
3.2.2 Absolute Efficiency Calibration Method	18
I Radioactivity Measurements and methods.....	20
3.3 Sample collection and preparation.....	20
3.3. A Water samples.....	20
3.3. B Soil and sediment samples.....	21
3.4 Devices and Methodology.....	22
3.5 Absorption Spectrometry for heavy metals analysis.....	23
3.6 Statistical analysis in biology.....	24
II Measurements of biochemical parameters in biological tissues.....	27
3.7 Chemicals.....	27
3.8 Experimental animals.....	27
3.9 Experimental work design.....	27
3.10 Biochemical analyses.....	28
3.10.1 Blood studies.....	28
3.10.2 Brain study.....	31
3.11 Histopathological study	31

Chapter four

Results and Discussion

4.1 Radionuclides measurements.....	32
4.1.1 ^{226}Ra , ^{228}Ra and ^{40}K Activity Concentrations in Rashid and Damietta water Samples.....	32
4.1.2 ^{238}U (^{226}Ra), ^{232}Th and ^{40}K Activity Concentrations in Soil and Sediment Samples in Rashid branch.....	34
4.1.3 ^{238}U (^{226}Ra), ^{232}Th and ^{40}K Activity Concentrations in Soil and Sediment Samples in Damietta branch.....	34
4.1.4 Absorbed Dose Rate.....	41
4.1.5 The Annual Effective Dose Equivalent (AEDE).....	43
4.1.6. Radium Equivalent (Ra_{eq}).....	44
4.1.7 Hazard Indices (H_{in} , H_{ex}).....	51
4.1.8 Gamma Index (I_{γ}).....	51
4.1.9 Annual gonadal dose equivalent (AGDE)	52
4.1.10 Excess life time cancer risk (ELCR).....	52
4.2 Heavy metals Analysis.....	57
4.3 Toxic effect of heavy metals in drinking water.....	57
4.3.1 Quantitative measurements of serum total antioxidant capacity....	58
4.3.2 Quantitative measurements of malondialdehyde (MDA).....	59
4.3.3 Kidney function tests.....	60
4.3.4 Liver testes.....	62
4.3.5 Lipid profile tests.....	68
4.4 Brain analysis.....	72
4.5 Histopathological Examination.....	73
4.5.1 Liver Histopathology.....	73
4.5.2 Kidney Histopathology.	77
Conclusion.....	81
References.....	88
الملخص العربي.....	أ

List of Tables

No.	Title	Page
3.1.	Relative intensities of gamma-rays emitted by ^{226}Ra in equilibrium with its daughters.	17
3.2.	Minimum detection limits, applied wavelength, slit width, fuel, oxidant and used apparatus for several elements.	26
4.1.	The activity concentrations of ^{226}Ra , ^{228}Ra and ^{40}K given in (Bq/Kg) for Rashid water samples.	33
4.2.	The activity concentrations of ^{226}Ra , ^{228}Ra and ^{40}K given in (Bq/Kg) for Damietta water samples.	34
4.3.	The activity concentrations of ^{238}U (^{226}Ra), ^{232}Th and ^{40}K given in (Bq/Kg) for Rashid soil samples.	35
4.4.	The activity concentrations of ^{238}U (^{226}Ra), ^{232}Th and ^{40}K given in (Bq/Kg) for Rashid sediment samples.	36
4.5.	The activity concentrations of ^{238}U (^{226}Ra), ^{232}Th and ^{40}K given in (Bq/Kg) for Damietta soil samples.	37
4.6.	The activity concentrations of ^{238}U (^{226}Ra), ^{232}Th and ^{40}K given in (Bq/Kg) for Damietta sediment samples.	38
4.7.	Ra_{eq} , dose rates and AEDE for Rashid soil samples.	45

4.8.	Ra_{eq} , dose rates and AEDE for Rashid sediment samples.	46
4.9.	Ra_{eq} , dose rates and AEDE for Damietta soil samples.	47
4.10.	Ra_{eq} , Dose rates and AEDE for Damietta sediment samples.	48
4.11.	Hazards indices H_{in} , H_{ex} , I_{γ} and ELCR for Rashid soil samples.	53
4.12.	Hazards indices H_{in} , H_{ex} , I_{γ} and ELCR for Rashid sediment samples.	54
4.13.	Hazards indices H_{in} , H_{ex} , I_{γ} and ELCR for Damietta soil samples.	55
4.14.	Hazards indices H_{in} , H_{ex} , I_{γ} and ELCR for Damietta sediment samples.	56
4.15.	The heavy metal concentrations along the studied region.	57
