"سورة النساء"
جزء من الآية (١١٣)

Effect of Non-Fluoride and Fluoride-Containing Bleaching Agents on Surface Topography of Enamel

Thesis

Submitted to Faculty of Oral and Dental Medicine, Cairo
University

In partial fulfillment of the requirements of the Master
degree in Dental surgery

(Operative Dentistry)

By

Shahenda Samir Abd-el Latif Khedr

B.D.S. (Misr University for Science and Technology) 2004

2010

Supervisors

Prof. Dr. Mohamed Riad Farid

Professor of Operative Dentistry

Faculty of Oral and Dental Medicine

Cairo University

Prof. Dr. Randa Mohamed Hafez

Professor of Operative Dentistry

Faculty of Oral and Dental Medicine

Cairo University

Dr. Hala Ali Maher

Lecturer of Operative Dentistry

Misr University for Science and Technology

Dedication

This work is dedicated to my dear family whom were with me in every moment of life, who saw my moments of depression, sadness and happiness, whom gave me the deep and true love.

Acknowledgment

First, I am so grateful to **GOD** for any success in my life and for giving me the patience to accomplish this work.

I would like to express my deepest gratitude to **Dr. Mohamed Riad Farid**, Professor and head of Operative Dentistry department, Faculty of Oral and Dental Medicine, Cairo University, for his continuous motivation and encouragement since I was a student and until I accomplished my work .It has been a great honor for me to work under his supervision.

I would like to acknowledge and express my deepest appreciation to **Dr. Randa Mohamed Hafez** Professor of Operative Dentistry, Faculty of Oral and Dental Medicine, Cairo University, for her continuous help, care, support, valuable scientific contribution and guidance during the whole course of this research.

Further, I would like to express my fruitful thanks to **Dr. Hala Ali Maher**, Lecturer of Operative Dentistry, Misr University for Science and Technology, for her kind supervision, caring, guidance, unlimited help and her meticulous effort in completing this work.

Additionally, I am very indebted and grateful to **Dr. Mona Riad**, Professor of Operative Dentistry, Faculty of Oral and Dental Medicine, Cairo University, for her valuable advice and help.

Many thanks to my colleagues at Misr University for Science and Technology, especially **Dr. Abeer Abo El Naga** for her help and support.

Finally, I extend my thanks to all members of Operative Department, Faculty of Oral and Dental Medicine, Cairo University.

List of Tables

LIST OF TABLES

Table (1):	Active ingredient and manufacturer of the materials used.....	29
Table (2):	Variables of the study.....	32
Table (3):	Statistical analysis comparing the effect of different bleaching agents on the microhardness of the enamel surface of different groups.....	39
Table (4):	Statistical analysis comparing the effect of different bleaching agents on the microhardness of enamel surface at day 7 and day 14.....	40
Table (5):	Statistical analysis comparing the effect of different bleaching agents on the Ra of the enamel surface of different groups.....	42
Table (6):	Statistical analysis comparing the effect of different bleaching agents on the Ra of the enamel surface at day 7 and day 14.....	43
Table (7):	Statistical analysis comparing the effect of different bleaching agents on the E of the enamel surface of different groups between day 7 and day 14.....	45
Table (8):	Statistical analysis comparing the effect of different bleaching agents on the L of the enamel surface of different groups between different time intervals...	46
