ANTIOXIDANTS AND BRONCHIAL ASTHMA

Thesis

Submitted for Partial Fullfillment of
Master Degree of Chest Disease & Tuberculosis

Presented by

MOSTAFA SHAWKI AHMED
M.B B.ch.

Under Supervision

PROF. SAMIHA SAYED AHMED ASHMAWY

Professor of Chest Diseases
Faculty of Medicine, Ain Shams University

PROF. MANAL HOSNI AHMED

Professor of Chest Diseases
Faculty of Medicine, Ain Shams University

DR. MONA MANSOUR AHMED

Lecturer of Chest Diseases
Faculty of Medicine, Ain Shams University

Faculty of Medicine
Ain shams University
2001

Acknowledgment

Thanks God for helping me to finish this work.

I would like to express my supreme gratitude and respect to **Prof. Samiha Sayed Ahmed Ashmawi**, Professor of Chest diseases, Ain Shams University, for her supervision and valuable instructions throughout this thesis.

I would also, like to express my deep thanks, and supreme gratitude to **Prof. Manal Housny Ahmed**, Professor of Chest disease, Ain Shams University, for her continuous guidance and close observation throughout this work.

I would also, like to express my deepest gratitude to **Dr. Mona Mansour Ahmed**, Lecturer of Chest disease, Ain Shams University, for her kind help and useful advice.

I am deeply thankful to **Dr. Maha Mohamed Salaam**, Lecturer of Biochemistry, Ain Shams University, for helping me in processing the samples of this work and for her valuable advice and instructions.

Also I would like to express my supreme gratitude and respect to **Prof. Mohamed Awad Tag El Din** Vice-president of Ain Shams University & professor of Chest diseases & **Prof. Ibrahim El Sayed Radwan** Professor of Chest diseases El Azhar University for accepting the attendance for the discussion of this study.

List Of Contents

Introduction	1
Aim of the work	2
Review of literature	3
* Definition	3
* Airway hyperresponsivness	4
* Classification of Bronchial asthma	5
* Classification of asthma severity	9
* Pathophysiology of asthma	11
* Role of inflammatory cells in asthma	24
Oxygen Free Radical and Tissue	
* Injury	29
* Pathogenesis	29
* Free radicals	29
* Generation of oxygen free radicals	30
* Sources and effects of oxidants	31
* Mechanism of free radicals in pathological states	33
* Significance of R.O.S. with some applications.....	43
Oxygen Radicals and Human Diseases	44
* Inflammatory immune injury	44
* Ischemia reflow	45
* Drug toxicty	45
* Iron overload	46

List of Contents

* Aging and cancer	46
* Erythrocytes	47
* cardiovascular system	48
* Kidney	49
* Oxygen free radicals and the lung	50
Antioxidant	59
* What is an antioxidant	59
* The antioxidant system	59
* Antioxidant defense	60
* Antioxidant could act against lipid peroxidation .	61
* What are antioxidants presents in extracellular fluid	63
Antioxidant vitamins	70
* Vitamin A	70
* Vitamin C	75
* Vitamin E	78
N-Acetylcysteine	84
* Glutathione system	89
* Function of glutathione	91
* Glutathione peioxidase (G.P) and vitamins relations to the diseases.	92
* Glutathione redox cycle	94
* Antioxidant assessment	95
Patients and Methods	97
* Measurement of spirometric function test	100
* Measurement of arterial blood gases	100

List of Contents

* Determination of Vitamin A	101
* Determination of Vitamin C	106
* Determination of Vitamin E	109
Result	111
Discussion	123
Summary	134
Conclusion	136
Recommendation	137
References	138
Appendix	182
Arabic Summary	

List of figures

Figure	Subject	Page
1	Dose/concentration response curve to methacholine	
2	Summary mechanisms of free radicals in pathological status.	35
3	Causes of consequence of tissue damage.	43
4	Retional (vitamins A)	71
5	Molecular structure of ascorbic acid and dehydro ascorbic acid	75
6	Tocopherol (Vitamin E)	79
7	Cooperative effect of ascorbic acid (vitamin C) and alpha tocopherol (Vitamin E)	83
8	Molecular structure of N-acetylcysteine	84
9	Synthesis of glutathione	90
10	Glutathione antioxidant enzymes	92
11	Standard curve of vitamin C	108
12	Standard curve of vitamin E	110
