Title of Thesis: (ANALYSIS OF SPRAYABLE POLYDIMETHYL SILOXANE
THERMAL INSULATION FOR HIGH TEMPERATURE APPLICATIONS)

Key Words:(sprayable coating, Mechanical Fillers, thermal Fillers,
Degradation Kinetics, Heat transfer)

Summary:

In recent years, there has been a large increase in employing polymers in engineering applications. Modified Polysiloxanes are generally recognized as the newest generic class of high performance protective sprayable coating. For this reason, understanding the mechanical, thermal and flammable properties of blended PDMS under high temperature and different loading rates has become important to study. In this thesis, storage modulus, loss modulus and stiffness, Tan Delta, thermal degradation at different heating rates (5, 10,15and 20°C/min) have been measured, kinetics of thermal degradation, thermal conductivity, heat capacity, thermal expansion ratio, flammable properties and mathematical heat transfer models programs for PDMS mixtures samples were thoroughly investigated by using several techniques (DMA, TGA, TMA, DSC, LOI%-UL94V, SEM, Pull-Off Test, MATLAB, FORTRAN).

Acknowledgments

In the name of **ALLAH**. All glory is to **ALLAH**, the only one who granted me health, patience, and willpower to accomplish this research.

I would like to sincerely thank my supervisor **Dr. Ehab Fouad Abadir - Professor of Chemical Engineering-Chemical Engineering Department -Faculty of Engineering - Cairo University** for helping and supporting me all along the experimental work of this study. **Dr. Abadir** devoted a great part of his time to the supervision of this thesis and without his valuable guidance and assistance; this work would have never been completed.

Deepest gratitude and thanks to **Dr. Sahar M. EL-Marsafy Professor of Chemical Engineering - Chemical Engineering Department - Faculty of Engineering. Cairo University** for her keen support during the course of work. **Dr. EL-Marsafy** has suggested the scheme of the work and has continually offered support and encouragement.

As well express my sincere gratitude to my Examining Committee **Dr. Shadia Aggour Professor of Chemical Engineering Department and Dr. Ahmed Esmael Hussein Professor of Polymer Technology-National Research Center – Cairo.**

In addition, I would like to express my sincere gratitude to **Dr. Zakaria El. Beheery and Dr. Khaled Shokry Ghith** for supervision and guidance during the course work.

I definitely wish to thank **Dr. Abd El-Fattah Mahmoud Eissa, Dr. Mohamed EL Samanody and Dr. Mohamed EL Montaser** for their continuous support and encouragement.

Appreciation is also due to all staff of the **Chemical Eng. Dept.- Faculty of Eng. - Cairo University**, for their unfailing encouragement and tolerance. Many thanks to **Science and Technology center of Excellence**, for helping me to finish my experimental work.

I am indebted to my **father, mother and wife** for supporting and encouraging me during my thesis work.
