

Fracture strength and marginal adaptation of all ceramic restoration for endodontically treated upper teeth using two different techniques

A master thesis submitted to Crown and Bridge department
Ain-shams University for partial fulfillment of the requirement
Of the MDS degree in fixed prosthodontics
2010

Presented by

Abouthar El-ghifari Mohamed Gebril

BDS Sc faculty of dentistry El Tahade University
The Great Socialist People's Libyan Arab Jamahiriya
(2005)

**Faculty of dentistry
Ain-shams University
2010**

Supervised by:

Dr. Jihan Farouk Mohamed Younis

Assistant Professor of crown and bridge

Crown and bridge department

ACKNOWLEDGMENT

First and for most, thanks to ALLAH who is the most Gracious and most Merciful.

*I would like to express my deepest thanks, gratitude and profound respect to **Dr. Amina Hamdy** Assistant Professor of Fixed Prosthodontics, Head of Crown and Bridge Department, Faculty of Dentistry, Ain-Shams University. For her endless encouragement, great help, extreme patience, valuable guidance, and immeasurable support, will always be sincerely remembered.*

*My deepest thanks and sincere gratitude as well as appreciation to **Dr. Jihan Farouk M. Younis** Assistant Professor of Fixed Prosthodontics, Crown and Bridge Department, Faculty of Dentistry, Ain-Shams University. For her valuable advice, devoted effort, and unique cooperation, will always be deeply remembered. This work could have never been completed without her extraordinary assistance and sincere guidance.*

*I am also deeply grateful thankful to **Dr. Mohamed Adel El-Damalawy**, Assistant Professor of crown and bridge ,Ain Shams University. For his continuous guidance which was of paramount importance for the initiation, progress and completion of this work.*

Dedication

This thesis is dedicated to the persons I admire most, to my father and mother who offered me unconditioned support throughout the course of my life. Also, this thesis is dedicated to my wife who has been a great source of motivation and inspiration, and to my beautiful angel my daughter nour.

List of tables

Table №	title	Page №
1	Various endocrown preparations.	31
2	Materials used in this study.	44
3	Sample grouping.	48
4	Descriptive statistics of marginal discrepancy results of different groups.	81
5	Student t-test comparison between vertical marginal adaptation mean values of A1 and A2 groups.	83
6	Student t-test comparison between marginal adaptation mean values of B1 and B2 groups.	85
7	Student t-test comparison between vertical marginal gap mean values of A1 and B1 groups.	87
8	Student t-test comparison between vertical marginal adaptation mean values of A2 and B2 groups.	89

9	Group ranking from lower to higher vertical marginal adaptation by Tukey's post-hoc statistics.	90
10	Two way analysis of variance ANOVA test of significance comparing variables affecting marginal discrepancy mean values.	91
11	Descriptive statistics of fracture resistance results of different groups.	92
12	Student t-test comparison between fracture resistance mean values of A1 and A2 groups.	93
13	Student t-test comparison between fracture resistance mean values of B1 and B2 groups.	95
14	Two way analysis of variance ANOVA test of significance comparing variables affecting fracture resistance mean values.	96
15	Fracture pattern (%) in all groups.	101
