ACKNOWLEDGMENT

First, praise to my **ALLAH**, most gracious and most merciful for his ever- present help and guidance.

I wish to express my sincere gratitude to my supervisor, **Prof. Dr A.B. El-Bialy**, for her supervision, valuable advice, fruitful discussions, patient guidance and meticulous suggestions throughout the course of study that definitely stimulated and enhanced the quality of this work.

I would like to express my deepest thanks to **Prof. Dr. A. A. Shabaka**, for his keen interest in the work, continuous supervision, discussion and fruitful advice throughout all stages of the work, providing the excellent research facilities.

The author is greatly indebted to **Dr. R.Seoudi**, for suggesting the point of research encouragement, supervision, and discussions.

My heartfelt thanks to my all my tutors and colleagues in Department of Physics, in the National Research Center (NRC) especially **Badawi Ali Ahmed Anees** and **Dr.Wael Mohamed Hosam El-din Eisa** for they untiring and continued support during my thesis work.

I wish to dedicate this work to **my family**, who give me encouragement and support all the time.

List of Tables	X
Abstract	XII
Summary	XV

CHAPTER 1

GENERAL INTRODUCTION AND LITERATURE SURVEY

1.1. Nanomaterials.....	1
1.2. Classification of Nanostructure Materials.....	3
1.3. Conducting Polymer	6
1.4. Polyaniline(PANI).....	6
1.4.1. Molecular Structure of Polyaniline.....	7
1.4.2. Polymerization Mechanism of Polyaniline..	8
1.4.3. Doping in Polyaniline:Acid Doping.....	10
1.5. Literature Survey	14
1.6. Aim of the Work.....	26

CHAPTER 2

THEORETICAL CONSIDERATION

2.1. Transmission Electron Microscope.....	28
2.1.1. Imaging and Diffraction in Transmission Electron Microscope	28
2.2. X- Ray Diffraction (XRD).....	28
2.2.1 Crystallite Size Determination from Line	29

Broadening.....	
2.3. Origins of Molecular Spectra.....	30
2.3.1. Nature of Infrared Spectra.....	32
2.4. Ultraviolet and Visible Spectra.....	36
2.4.1. Nature of Electronic Excitations.....	36
2.4.2. Types of Ttransitions.....	39
2.4.3. Chromophore.....	40
2.4.4. Effect of Conjugation.....	41
2.5. Types of Electrical Conduction.....	42
2.5.1. Electronic Conduction.....	42
2.5.2. Ionic Conduction.....	43
2.6. D.C. Electrical Conductivity.....	43
2.7. Models of Conduction Mechanisms.....	44
2.7.1. The Tunneling Model.....	44
2.7.2. The Hopping Model.....	46

CHAPTER 3

EXPERIMENTAL TECHNIQUES AND INSTRUMENTATION

3.1. Materials.....	48
3.2. Preparation of the Investigated Samples.....	48
3.2.1. Ultrasonic Irradiation Methods.....	49
3.2.1. a. Preparation of Polyaniline Nanoparticles.....	49
3.2.1. b. Preparation of Polyaniline Nanotubes...	50
3.2.2. Preparation of Polyaniline Nanofibers by Chemical Polymerization Method.....	51
3.3. Characterization Techniques.....	51
3.3.1. Transmission Electron Microscope (TEM) Measurement.....	52
3.3.2. X-Ray Diffraction (XRD).....	52

3.3.3. FTIR Measurements.....	54
3.3.3.a. Advantages of FTIR Instruments.....	56
3.3.3.b. Sample Preparation for IR Measurements.....	58
3.3.4. Ultraviolet Visible Spectrophotometer.....	60
3.3.4.a. Sample Preparation for UV-Vis Measurements.....	60
3.3.5. D.C. Electrical Measurements.....	61

CHAPTER 4

RESULTS AND DISCUSSION

4.1. Transmission Electron Microscopy (TEM)	65
4.1.a. TEM of PANI Nanoparticles Prepared by Ultrasonic Irradiation Method.....	65
4.1.b. TEM of PANI Nanofibers Prepared by Chemical Polymerization Method.....	67
4.1.c. TEM of PANI Nanotubes Prepared by Ultrasonic Irradiation Method.....	69
4.2. X-Ray Diffraction Pattern	71
4.2.1.a. X-Ray Diffraction of PANI Nanoparticles Prepared by Ultrasonic Irradiation Method.....	71
4.2.1.b. Effect of Oxidation Time on the Crystallinity of PANI Nanoparticles.....	72
4.2.2. X-Ray Diffraction of PANI Nanofibers Prepared by Chemical Polymerization Method.....	78
4.2.3. X-Ray Diffraction of PANI Nanotubes Prepared by Ultrasonic Irradiation Method	79
4.3. FTIR Spectra of PANI Nanostructures.....	81

4.3. 1.a. FTIR Spectrum of PANI Nanoparticles...	81
4.3.1.b. FTIR Spectra of PANI Nanoparticles at Different Oxidation Times.....	86
4.3.2. FTIR Spectra of PANI Nano-Fibers and Tubes.....	90
4.4. UV-Visible Spectroscopy	97
4.4.1. UV-Vis Spectroscopic Studies of Aniline Monomer.....	97
4.4.2.a. UV-Vis Spectra of PANI Nano-Particles, Fibers and Tubes.....	99
4.4.2.b. The UV-Vis Spectra of PANI Nanoparticles at Different Oxidation Times.....	100
4.4.3. Effect of Solvent on the UV-Vis Spectra of PANI Nano-Particles, Fibers and Tubes...	105
4.4.3.a. Effect of Solvent on the UV-Vis Spectra of PANI Nanoparticles at Different Oxidation Times.....	105
4.4.3.b. Effect of Solvent on the UV-Vis Spectra of PANI Nano-Fibers and Tubes.....	112
4.4.4. Calculation of the Optical Band Gap of PANI Nano-Particles, Fibers and Tubes.....	119
4.5. Electrical Conductivity	125
4.5.1. Current-Voltage Characteristics.....	125
4.5.2. D.C. Electrical Conductivity	128
Conclusion	140
References.....	147
Arabic Abstract.....	162
