Chemistry Department

Synthesis of Energy Harvesting Nanocomposite Materials for Enhancing Solar Cell Efficiencies

A Thesis Submitted by

Hanaa Selim Ali Selim

Master of Science (Chemistry-2013)

**A Dissertation Submitted for the Degree of
Doctor of Philosophy of Science in Chemistry**

To

**Department of Chemistry, Faculty of Science,
Ain Shams University
Cairo, Egypt
(2018)**

Faculty of Science
Chemistry Department

Approval Sheet

Name of candidate: **Hanaa Selim Ali**

Degree: Ph.D. Degree in Chemistry

**Thesis Title: Synthesis of Energy Harvesting
Nanocomposite Materials for
Enhancing Solar Cell Efficiencies**

This Thesis has **been approved by:**

- 1- Prof. Dr. Eglal Myriam Raymond Souaya**
- 2- Prof. Dr. Sc. Mohamed F. Kotkata**
- 3- Prof. Dr. Mona El-Sayed**
- 4- Dr. Amr Ahmed Nada**

Approval

Chairman of Chemistry Department

Prof. Dr. Ibrahim Badr

I do appreciate

*My god for giving me wonder-fully parents
who are enlightening and always supporting me
in all my Life.*

*I also thank my brother, sisters and my future
husband for listening and for always being
there through everything.*

Hanaa Selim

*First and last thanks to **Allah** who give me the power to go forward in a way illuminated with his merciful guidance.*

*I would like to express my thanks to **Prof. Dr. Sc. M. F. Kotkata**, Professor of Material Science, Physics Department and **Prof. Dr. Eglal Myriam Raymond Souaya**, Professor of Inorganic, Faculty of Science, Ain Shams University, for giving me the chance to be one of their students and for their guidance support, and constructive criticism.*

*I am so grateful to **Prof. Dr. Mona El-sayed** Professor of Petroleum chemistry, Egyptian Petroleum Research Institute and **Dr. Amr Ahmed Nada**, Researcher of Materials Science, for suggesting the subject of this work, their kind Supervision, cooperation.*

*Special thanks to **Prof. Dr. Magda Osman**, Head of Analysis & Evaluation Department, **Dr. Amal Hamdy aoud-allah**, Assoc. Professor of physical chemistry, **Dr Raad Hegazey** and **Dr Omnia El-Shamy** in Egyptian Petroleum Research Institute and for their kind cooperation and **Prof. Dr. Mikhael Bechelany** in Institut Européen des Membranes, Université Montpellier France .*

I would also like to thank my Colleagues in the Spectroscopy Laboratory, Analysis & Evaluation Department, Egyptian Petroleum Research Institute and Institut Européen des Membranes, Université Montpellier France for their help.

List of Tables	i
List of Figures	ii
List of Abbreviations	vii
Abstract	viii
Aim of work	x
<i>Chapter 1: Introduction and literature survey</i>	
1.1. Solar cell	2
1.2. Types of solar cells	2
1.2.1. Organic Solar Cells	3
1.2.2. Hybrid Solar cells	5
1.2.3. Quantum Dot Solar Cells	7
1.2.4. Dye Sensitized Solar Cells	9
1.3. DSSC structure and working principle	11
1.4. DSSC components	12
1.4.1. Transparent Conductive Oxide (TCO)	12
1.4.2. Semiconductor Oxide Material	12
1.4.3. Dye Sensitizer	14
1.5. Metal Oxides	15
1.5.1. Zinc oxide	16
1.5.2. Nickel oxide	19
1.5.3. Cupper oxide	21
1.5.4. Titanium Dioxide	23
1.6. Improving the efficiency of solar cell via doping ZnO NPs.	26
1.6.1. Doping NiO on ZnO nanoparticles	30
1.6.2. Doping CuO on ZnO nanoparticles	36

1.6.3. Doping TiO ₂ on ZnO nanoparticles	42
---	----

Chapter II: Experimental Work

2.1. Materials	47
2.2. Preparations	47
2.2.1. Preparation of ZnO nanoparticles	47
2.2.2. Preparation of NiO doped ZnO nanoparticles	48
2.2.3. Preparation of CuO doped ZnO nanocomposites	49
2.2.4. Preparation of TiO ₂ doped ZnO nanoparticles	50
2.2.5. Preparation of nano-composites thin films as photo-Electrodes	51
2.3. Characterization of prepared samples	52
2.3.1. High Resolution Transmission electron microscope (HR-TEM)	52
2.3.2. X-Ray diffraction (XRD) analysis	53
2.3.3. Fourier transform infrared spectroscopy (FT-IR)	53
2.3.4. Dispersive Raman spectroscopy	54
2.3.5. Thermal analysis	54
2.3.6. UV/vis Spectrophotometer	54
2.3.7. Photoluminescence (PL)	55
2.3.8. Current–Voltage measurements	55

Chapter III: Results & Discussion

3.1. Thermal Analysis	57
3.2. Morphology and Structural Characterizations	59
3.2.1. X-Ray Diffraction (XRD) Analysis	59
3.2.2. Transmission Electron Microscope (TEM)	68
3.2.3. Fourier transform infrared spectroscopy	71
3.2.4. Raman spectroscopy	75
3.3. Optical analysis	80
3.3.1. The optical absorbance spectrum	80

3.3.4. Photoluminescence spectroscopy	90
3.4. Current-Voltage characteristics	93
