NOTE

This thesis is submitted to the Faculty of Science, Ain Shams University in partial fulfilment of the requirements of the Master's Degree of Science in Geology. In addition to the research work materialized in this dissertation, the candidate has attended and successfully passed examination in the following M. Sc. courses:

- 1- Field geology.
- 2- Geostatistics and Computer.
- 3- Micropaleontology.
- 4- Sedimentology.
- 5- Lithostratigraphy.
- 6- Biostratigraphy.
- 7- Advanced structural geology.
- 8- Geotectonics.

Besides, the student has also passed the final examination of a course in the English Language.

Head of geology department

AKNOWLEDGEMENTS

The author wishes to express his gratitude to **Prof. Wagih M. Abdel Malek** Geology Department, Faculty of Science, Ain Shams University for his kind help, significant comments, reading the manuscript and continuous support through the term of this research.

The author is deeply indebted to **Dr. Ahmad Sewedan** Chairman of the Egyptian Geological Survey and Mining Authority for his kind help and critical discussions.

The author is particularly indebted to **Prof. Abdel Galil A. Hewaidy** Geology Department, Faculty of Science, Al Azhar University for checking the field work, supervising the work, reviewing the foraminiferal identifications, reading the manuscript, stimulating lectures and continuous encouragement.

The author is deeply thankful to Dr. Omar El Halaby Egyptian Geological Survey and Mining Authority for his continuous encouragement during the work.

Special word of gratitude is due to my colleagues Geologists Adel Galal, Mohamed Khalifa and Mohamed Zorik for their help. Also my thanks are to E. Moustafa and A. Ramadan for their assistance.

Finally, I wish to express my deepest gratitude and thanks to my parents, my wife and brothers for their encouragement and support.
