**GEOLOGY AND PETROLOGY OF THE METACONGLOMERATE
AND HAMMAMAT CONGLOMERATE IN THE QIFT-QUSEIR
ROAD DISTRICT, EASTERN DESERT, EGYPT**

**Thesis
Submitted for the Degree of
Doctor of Philosophy in Science
'Geology'**

**By
Gaafar Abd El-Alim El-Bahariya
B. Sc., M. Sc.**

**Geology Department
Faculty of Science
Tanta University**

1995

8 55 12

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قال تعالى:

ومن الجبال جُدَدٌ بَيَضٌ وَحُمْرٌ مُخْتَلِفٌ أَلْوَانُهَا وَغَرَابِيبُ سُودٍ * ومن الناسِ والدوابِ والأنعامِ مُخْتَلِفٌ أَلْوَانُهُ كَذَلِكَ * إِنَّمَا يَخْشَى اللَّهَ مِنْ عِبَادِهِ الْعُلَمَاءُ *

صدق الله العظيم

To my kids:
Mohammad and Kareim

SUPERVISORS

Prof. Dr.M.K. Akaad: Past-president of Tanta University. Professor of Geology, Geology Department. Faculty of Science. Tanta University, Tanta. Egypt.

Prof.Dr. A.M. Noweir: Professor of Geology, Geology Department. Faculty of Science, Tanta University, Tanta. Egypt.

Prof. Dr. H. Blatt : Professor of Geology, School of Geology and Geophysics. Oklahoma University. Norman. Oklahoma. U.S.A.

Prof. Dr. A. Abu El Ela: Assistant Professor of Geology. Geology Department. Faculty of Science. Tanta University. Tanta. Egypt.

Head of Geology Department

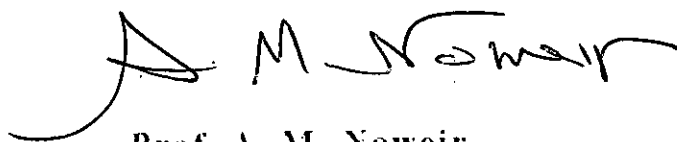

A handwritten signature in black ink, appearing to read 'A.M. Noweir', with a long horizontal flourish extending to the right.

Prof.Dr. A.M. Noweir

CURRICULUM VITAE

Name : Gaafar Abd El-Alim El-Bahariya
Date of Birth : 11/08/1960
Place of Birth : Neshil, Kottor, Gharbia, Egypt
Nationality : Egyptian
Marital Status : Married
Qualifications : B.Sc. (1982), Faculty of Science, Tanta University
M.Sc.(1988), Faculty of Science, Tanta University
Experience : Demonstrator of Geology (1982-1988)
Assistant Lecturer of Geology (1988- present)

Head of Geology Department

A handwritten signature in black ink, appearing to read 'A. M. Noweir', with a large, stylized initial 'A'.

Prof. A. M. Noweir

ACKNOWLEDGEMENTS

I would like to express my profound appreciation to my supervisors Professor Dr. M.K Akaad, Professor Dr. A.M. Noweir and Professor Dr. A. Abu El Ela, University of Tanta and Professor Dr. H. Blatt, University of Oklahoma (U.S.A), for their kind supervision, help and patience during the progress of this work. Professor Akaad, Professor Noweir and Professor Abu El Ela suggested the present point, helped during field work, and finally revised the different phases of the manuscript. Professor Blatt kindly provided all the instrumental facilities, helped during experimental analyses and finally reviewed the initial manuscript during my visit to his department.

I would like to thank my friends Drs. A.L. Abdeldayem and M. M.Abu Anbar for their co-operation, encouragement and help throughout the the work in this thesis.

Many thanks are also due to staff members and my colleagues in the Geology Department, Faculty of Science, Tanta University for their co-operation and cordial relations.

CONTENTS

	Page
CHAPTER ONE: INTRODUCTION	
1.1. The Pan-African Belt of Egypt.....	1
1.2. The Sedimentary Rocks and Melanges of Egypt.....	3
1.2.1. The older metasediments.....	3
1.2.2. The Hammamat sediments.....	5
1.3. Location and Geomorphic Setting of the Studied Area.....	7
1.4. Previous Work on the Rock Units Under study.....	7
1.5. Aim and Scope of the Present Study.....	12
1.6. Methods of Study.....	12
CHAPTER TWO: GEOLOGICAL SETTING	
2.1. Introduction.....	14
2.2. Outline of the Field Occurrence of Units I to III.....	14
CHAPTER THREE: UM ESH OLISTOSTROMAL MELANGE	
3.1. Introduction.....	18
3.2. Field Relations and Observations.....	18
3.2.1. The matrix.....	18
3.2.2. Enclosed clasts.....	20
3.3. Petrography.....	21
CHAPTER FOUR: PETROCHEMISTRY AND GEOCHEMISTRY OF THE OLISTOSTROMAL MELANGE.	
4.1. Introduction.....	42
4.2. Petrochemistry of the Volcaniclastic Metagreywackes.....	42
4.2.1. Chemical classifications.....	42
4.2.2. Behaviour and distribution of elements.....	43
4.2.3. Tectonic setting.....	44
4.2.4. Source characteristics.....	45
4.3. Petrochemistry of the Metavolcanic Clasts.....	55
4.3.1. Classification and nomenclature.....	55
4.3.2. Magma type.....	56
4.3.3. Origin of schistose amphibolites.....	56
4.3.4. Tectonomagmatic environments.....	57
4.4. Petrochemistry of the Granitic Clasts.....	76
4.4.1. Chemical classification.....	76
4.4.2. Chemical characteristics.....	76
4.4.3. Effect of alteration and weathering.....	77
4.4.4. Tectonic settings.....	78
CHAPTER FIVE: THE MUWEILIH CONGLOMERATE	
5.1. Introduction.....	91
5.2. Field Relations.....	91

5.3. Field Observations.....	92
5.3.1. The lower chaotic facies.....	92
5.3.2. The upper interbedded facies.....	92
5.4. Petrography.....	93
5.5. Geochemistry.....	102
5.5.1. Petrochemistry of the greywackes.....	102
5.5.2. Petrochemistry of the volcanic clasts.....	110
5.5.3. Petrochemistry of the granitic clasts.....	120
5.5.4. Petrochemistry of the metagabbros.....	130
5.6. Concluding remarks.....	141

CHAPTER SIX: HAMMAMAT MOLASSE

6.1. Introduction.....	142
6.2. Field Relations of Hammamat Molasse Belt with Adjacent Rock Units.....	142
6.3. Inter-relations of the Subunits of Hammamat Molasse.....	142
6.4. Field Observations.....	143
6.5. Petrography.....	145

CHAPTER SEVEN: PETROCHEMISTRY AND GEOCHEMISTRY OF THE HAMMAMAT MOLASSE

7.1. Introduction.....	167
7.2. Petrochemistry of the Greywackes.....	167
7.2.1. Chemical classification.....	167
7.2.2. Tectonic setting.....	167
7.2.3. Source characteristics.....	168
7.2.4. Comparison between the different greywackes of the present study.....	169
7.3. Petrochemistry of the Dokhan Volcanic Clasts.....	182
7.3.1. Chemical classifications.....	182
7.3.2. Variation in chemical composition.....	182
7.3.3. Magma type.....	183
7.3.4. Tectonic setting.....	184
7.4. Petrochemistry of the Granitic Clasts.....	197
7.4.1. Chemical classification.....	197
7.4.2. Abundance and distribution of elements.....	197
7.4.3. Chemical characteristics.....	198
7.4.4. Tectonic setting.....	199
7.5. Concluding Remarks.....	212

CHAPTER EIGHT: MINERAL CHEMISTRY

8.1. Mineral Chemistry of Chlorite	213
8.1.1. Introduction.....	213
8.1.2. Chemical classification and origin of chlorite.....	214
8.1.3. Compositional variations as a function of bulk rock composition and metamorphic grade.....	215

8.1.4. Concluding remarks.....	216
8.2. Mineral Chemistry of Biotite.....	222
8.2.1. Introduction.....	222
8.2.2. Composition and origin of biotite.....	222
8.2.3. Oxidation and K-mobility.....	223
8.2.4. Compositional variation of biotite as a function of metamorphic grade.....	224
8.2.5. Biotite formation and its relation to the chlorite...225	225
8.2.6. Concluding remarks.....	225
 CHAPTER NINE: SUMMARY AND CONCLUSIONS	
9.1. The Um Esh Olistostromal Melange.....	233
9.2. The Muweilih Conglomerate.....	234
9.3. The Hammamat Molasse.....	236
 REFERENCES.....	 240
