Role of Gastric Mucosal Hepatocyte Growth factor in Ulcer Dyspepsia

Thesis submitted for partial fulfillment of the master
degree in internal medicine

Presented by

Deena Wagieh Abd El-Aziz

(M.B.,B.ch)

Faculty of Medicine, Ain Shams University.

Supervised by

Prof. Dr. Samy Abdallah Abd El Fattah

Professor of Internal Medicine

ACKNOWLEDGMENT

First of all to almighty **GOD**, the most kind and most merciful.

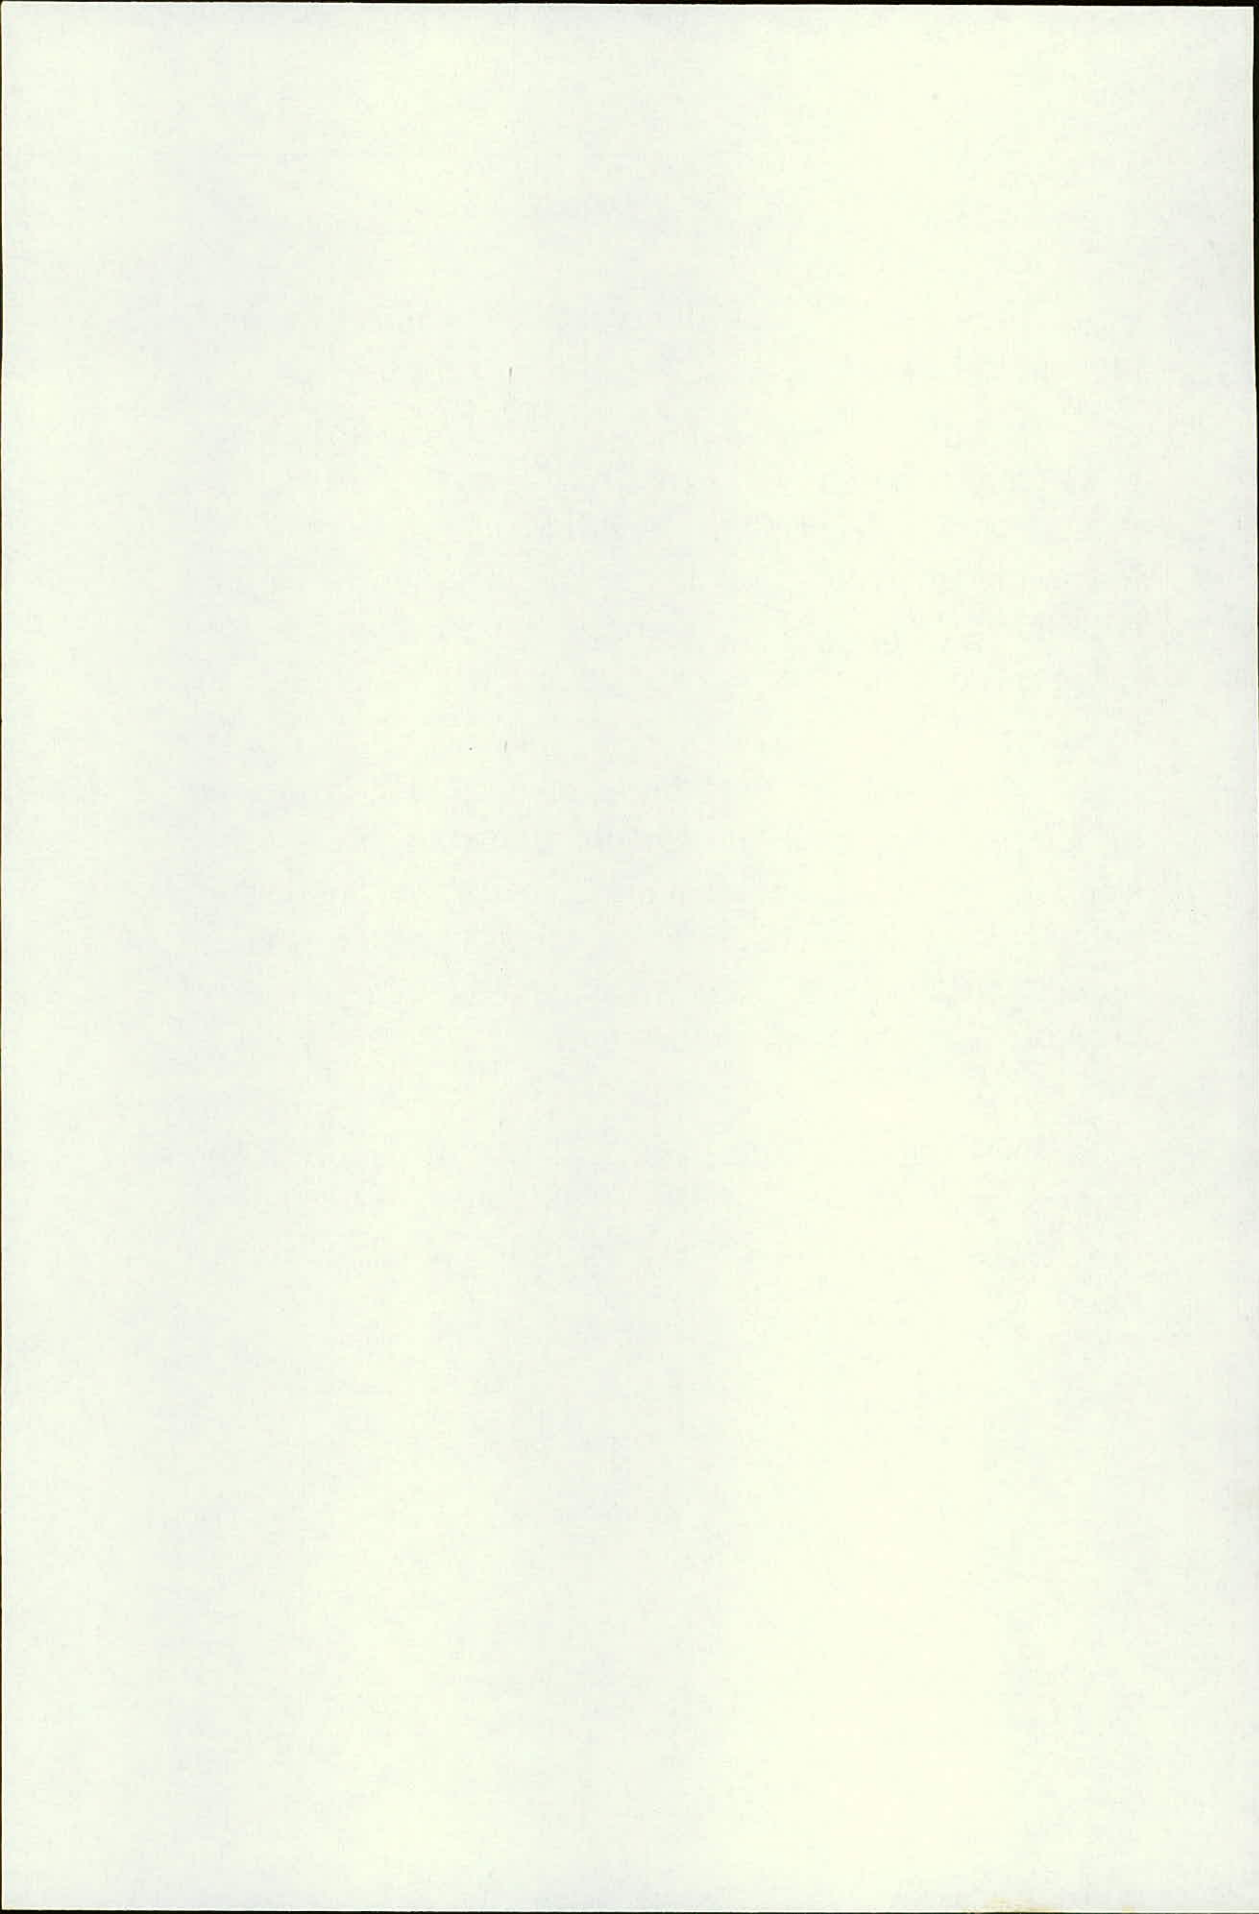

I am glad to take this opportunity to express my great appreciation to **Prof.Dr., Samy Abd El Fattah, Professor of Internal Medicine, Ain Shams University**, for his noble character and honorable behavior. Also his continuous help and encouragement throughout the progress of this work were of the utmost importance to me.

Nevertheless, **Prof. Dr., Mohsen Maher, professor of Internal Medicine, Ain Shams University**, was very kind, helpful and understanding, being such a decent person, who was encouraging, always keeping an eye on the progress of this work and helped in every possible way to complete this work.

Last but not least, I would like to express my deepest gratitude to **Prof. Dr., Thanaa Helal, Professor of Pathology, Ain Shams University**, for her practical work.

Deena Wagieh

Introduction and Aim of work	1
Review of Literature:	
<i>Chapter I: Peptic Ulcer</i>	3
▪ Histophysiology of the Stomach	3
▪ Definition	4
▪ Epidemiology of Peptic Ulcer	6
▪ Pathogenesis of Peptic Ulcer	7
▪ Types of Peptic Ulcer	27
▪ Clinical Presentation	35
▪ Investigations	41
▪ Treatment	50
<i>Chapter II: Hepatocyte Growth Factor</i>	75
▪ General characteristics and tissue distribution	75
▪ Biological activity	78
▪ HGF and tumor propagation	80
▪ Molecular processing	81
▪ Sources of HGF	83
▪ Effects of HGF on different cell types	85
▪ HGF receptor	87
▪ Role of HGF and its receptor Met during peptic ulcer healing	88
▪ Gene expression of HGF during the healing of gastric mucosal lesions	92
▪ Gastric mucosal HGF in peptic ulcer disease and helicobacter pylori gastritis	95
Subjects and methods	98

Arabic Summary	

List of Abbreviations

<i>BAO</i>	Basal acid output
<i>bFGF</i>	Basic fibroblast growth factor
<i>Cag-A</i>	Cytotoxin associated gene A
<i>CBD</i>	Common bile duct
<i>CNS</i>	Central nervous system
<i>COX-1</i>	Cyclo oxygenase – 1 enzyme
<i>COX-2</i>	Cyclo oxygenase – 2 enzyme
<i>DU</i>	Duodenal ulcer
<i>ECL and D cells</i>	Fundic endocrine cells
<i>EGF –r</i>	Epidermal growth factor – receptor
<i>ELISA</i>	Enzyme – linked immunosorbent assay
<i>GIT</i>	Gastrointestinal tract
<i>GU</i>	Gastric Ulcer
<i>H. pylori</i>	Helicobacter Pylori
<i>H2- receptor</i>	Histamine 2 – receptor
<i>HCC</i>	Hepatocellular carcinoma
<i>HCL</i>	Hydrochloric Acid
<i>HGF</i>	Hepatocyte Growth Factor
<i>hHGF</i>	Human hepatocyte growth factor
<i>HSV</i>	Highly selective vagotomy
<i>IgA</i>	Immunoglobulin – A
<i>IgG</i>	Immunoglobulin – G
<i>IL –1α</i>	Interleukin –1 alpha
<i>IL –1β</i>	Interleukin –1 beta
<i>KD</i>	Kilodalton
<i>MEN I</i>	Multiple endocrine neoplasia type I
<i>NSAID</i>	Non- Steroidal anti-inflammatory drugs
<i>NUD</i>	Nonulcer dyspepsia
<i>PAO</i>	Peak acid output
<i>PGA</i>	Pepsinogen A
<i>PGs</i>	Prostaglandins
<i>PPI</i>	Proton pump inhibitor
<i>PPV PG</i>	Pylorus and pyloric vagus preserving gastrectomy
<i>rh HGF</i>	Recombinant human hepatocyte growth factor

List of Abbreviations (ii)

<i>RUT</i>	Rapid urease test
<i>SGOT</i>	Serum glutamic oxaloacetic transaminase
<i>SGPT</i>	Serum glutamic pyruvic transaminase
<i>sIgA</i>	Secretory Immunoglobulin – A
<i>TBD</i>	Tripotassium dicitrato bismuthate
<i>TGF -α</i>	Transforming growth factor – alpha
<i>U/S</i>	Ultrasound
<i>Vac-A</i>	Vacuolated-associated cultured epithelial cells-A
<i>WBCs</i>	White Blood Cells
<i>ZES</i>	Zollinger-Ellison Syndrome
