**EFFECT OF PLANTING DISTANCE AND TRAINING
SYSTEM ON THE YIELD AND FRUIT QUALITY
OF MANFALOUTY POMEGRANATES**

By

EZZ EL-DIEN GADALLA HUSSEIN GADALLA

B.Sc. Agriculture (Pomology), Fac. of Agric., Assiut University, 1986

THESIS

SUBMITTED IN PARTIAL FULFILMENT OF
THE REQUIRED FOR THE DEGREE OF
MASTER OF SCIENCE

IN

HORTICULTURE (POMOLOGY)

DEPARTMENT OF HORTICULTURE
FACULTY OF AGRICULTURE
ASSIUT UNIVERSITY

Supervised by:

Prof. Dr. Shehata E. El-Kassas
(Supervisor)
Dr. Ahmed M. El-Sese
Dr. Hassan A. Abdel-Galel
Assiut University

Examined by:

Prof. Dr. A.M. Eid*
Prof. Dr. H.M. Mahmoud**
Prof. Dr. Sh.E. El-Kassas**
* Minia University
** Assiut University

APPROVAL SHEET

Title: Effect of planting distance and training system on
the yield and fruit quality of Manfalouty
pomegranates

By

EZZ EL-DIEN GADALLA HUSSEIN GADALLA

This thesis has been approved by:

H. M. Marghout

Elkassab

Acknowledgement

ACKNOWLEDGEMENT

I would like to express my sincere thanks and appreciation to *Dr. Shehata El-Azab El-Kassas*, Professor of Pomology, Horticulture Department, Assiut University for supervising, suggesting the problem, providing facilities, technical advice and preparing this manuscript.

I am greatly indebted to *Dr. Ahmed Makhless El-Sese*, Associate Professor of Pomology and *Dr. Hassan A. Abd El-Galil*, Lecturer of Pomology, Horticulture Department, Assiut University for their sincere help, and valuable guidance during carrying out this study.

Many great thanks to the following Staff members of Horticulture Department (Pomology), Assiut University for their valuable advice and generous help

Dr. Mohamed A. Hussein, Prof. of Pomology.

Dr. Samir Z. El-Agamy, Prof. of Pomology.

Dr. Hamdy M. Mahmoud, Prof. of Pomology

Dr. Kamilia I. Ahmed, Prof. of Pomology.

Dr. T.K. El-Mahdy, Lecturer of Pomology.

Dr. F.M. Ahmed, Lecturer of Pomology

Dr. A.Y. Abdallah, Lecturer of Pomology

Dr. A.M. El-Salhy, Lecturer of Pomology

Dr. M.M. Harhash, Lecturer of Pomology

Dr. R.A.A. Mostafa, Lecturer of Pomology

Deep thanks are also due to all other Staff members of Horticulture Department (Pomology), Assiut University, for their generous help, and advice throughout the whole course of this study.

The author wishes to express his deep gratitude to my colleagues of pomology Department, Assiut University, together with every one offered his help to make the work possible.

I am indebted to my family for giving me love, continual support, encouragement, inspiration and making valuable suggestions.

ARABIC SUMMARY -----	-

LIST OF TABLES

Table No.		Page
1	Effect of planting distance and flowering period on the average weekly percentage of perfect flowers of Manfalouty pomegranate (based on total weekly perfect and male flowers) during 1992 and 1993 seasons	32
2	Effect of number of main stems per bush and flowering period on the average weekly percentage of perfect flowers of Manfalouty pomegranate (based on total weekly perfect and male flowers) during 1992 and 1993 seasons	34
3	Effect of planting distance and number of main stems per bush on the average weekly percentage of perfect flowers of Manfalouty pomegranate (based on total weekly perfect and male flowers) during 1992 and 1993 seasons.	38
4	Effect of planting distance and flowering period on the average weekly percentage of perfect flowers of Manfalouty pomegranate (from total perfect flowers/tree) during 1992 and 1993 seasons.	40
5	Effect of number of main stems per bush and flowering period on the average weekly percentage of perfect flowers of Manfalouty pomegranate (from total perfect flowers/tree) during 1992 and 1993 seasons.	42
6	Effect of planting distance and number of main stems per bush on the average weekly percentage of perfect flowers of Manfalouty pomegranate (from total perfect flowers/tree) during 1992 and 1993 seasons.	44
7	Initial fruit set (as percent) of Manfalouty pomegranate (relative to previous weekly labelled perfect flowers) as affected by planting distance during 1992 and 1993 seasons.	46
8	Initial fruit set (as percent) of Manfalouty pomegranate (relative to previous weekly labelled perfect flowers) as affected by number of main stems per shrub during 1992 and 1993 seasons.	48

		Page
9	Initial fruit set (as percent) of Manfalouty pomegranate (relative to previous weekly labelled perfect flowers) as affected by planting distance and number of main stem per bush during 1992 and 1993 sesons.	50
10	Initial fruit set of Manfalouty pomegranate fruits (relative to total perfect flowers/tree) as affected by planting distance during 1992 and 1993 seasons.	52
11	Initial fruit set of Manfalouty pomegranate fruits (relative to total perfect flowers/tree) in response to number of main stems per bush during 992 and 1993 seasons.	54
12	Initial fruit set of Manfalouty pomegranate fruits (relative to total perfect flowers/tree) as affected by planting distance and number of main stems per bush during 1992 and 1993 seasons.	55
13	Effect of planting distance and flowering period on weekly ultimate fruit retention (No. of harvested fruits of different weeks relative to weekly No. of perfect flowers) of Manfalouty pomegranate during 1992 and 1993 seasons.	57
14	Effect of number of main stems per bush and flowering period on weekly ultimate fruit retention (No. of harvested fruits relative to weekly No. of perfect flowers) of Manfalouty pomegranate during 1992 and 1993 seasons.	59
15	Effect of planting distance and number of main stems per bush on weekly ultimate fruit retention (No. of harvested fruits relative weekly No. of perfect flowers) of Manfalouty pomegrnate during 1992 and 1993 sesons.	61
16	Effect of planting distance and flowering period on weekly ultimate fruit retention (No. of harvested fruits/total No. of perfect flowers) of Manfalouty pomegranate during 1992 and 1993 seasons.	63
17	Effect of number of main stems per bush and flowering period on weekly ultimate fruit retention (No. of harvested fruits/total No. of perfect flowers) of Manfalouty pomegranate during 1992 and 1993 seasons.	66
