ACKNOWLEDGEMENT

First of all thanks to **ALLAH** for granting me the ability and strength to complete this work.

I wish to express my deepest thanks, gratitude and profound respect to my **Prof. Dr. Abdel- Rahim Saad Shoulah**, Professor of Community Medicine and Dean of Faculty of Nursing, Benha University for providing me with the great opportunity to study in an excellent academic environment. Thanks you very much for your continuous advice, excellent guidance and skillful comment that have been necessary for me to proceed through the doctoral program and to complete this process. Your thoughts and teaching is going to be everlasting value and will continue guide me through my future professional career.

No words can describe my sincere thanks about the effort and help of my **Prof. Dr. Sabah Saad Al-Sharkawi**, Professor of Pediatric Nursing and Dean of Faculty of Nursing, Ain -Shams University, for her great support, facilities, careful supervision and continuous advice and guidance throughout the work, which were the cornerstone to complete this work and without her it could not have been accomplished as she helped me to overcome many difficulties. I consider myself fortunate to work under her supervision.

Last but not least, I would like to express my deepest thanks to all those who helped me directly or indirectly during the preparation of this work and accomplishing my thesis.
