**THE EFFECT OF PLANT DENSITY AND NITROGEN
FERTILIZER ON MAIZE SILAGE**

BY

Tamer Goma El-gaafarey

Thesis

Submitted in partial Fulfillment

of the Requirements for

the Degree

of

MASTER OF SCIENCE

In

(Field Crops)

Department of Crop Science

Faculty of Agriculture

Minufiya University

2007

Minufiya University
Faculty of Agriculture
Agronomy Department

APPROVAL SHEET

THE EFFECT OF PLANT DENSITY AND NITROGEN FERTILIZER ON MAIZE SILAGE

The Researcher: Tamer Goma El-gaafarey

Thesis Approved by:

Name	Position	Signature
Prof. Dr. El Sayed Hamed El-seidy	<i>Prof. and chief of Agronomy, Faculty of Agriculture, Tanta University</i>	<i>E.H. EL-seidy</i>
Prof. Dr. Mahmoud El-Desoky Ibrahiem	<i>Prof. of Agronomy, Faculty of Agriculture Minufiya University</i>	<i>Sbrakim</i>
Prof. Dr. Shaaban Ahmed El-Shamaraka	<i>Prof. of Agronomy, Faculty of Agriculture Minufiya University</i>	<i>Sham</i>
Prof. Dr. Farouk Metwalli Ali Nagy	<i>Chief Researcher in Forage Department –Field Crops Res. Inst. Agric. Res. Center</i>	<i>F. M. Ali</i>

Discussion date: / /2007

THE EFFECT OF PLANT DENSITY AND NITROGEN FERTILIZER ON MAIZE SILAGE

The Researcher: Tamer Goma El-gaafarey

Thesis Supervised by:

Name	Position	Signature
Prof. Dr. Abdel-Hamid A.Nawar	<i>Prof. of Agronomy, Faculty of Agriculture Minufiya University</i>	
Prof. Dr. Shaaban Ahmed El-Shamarka	<i>Prof. of Agronomy, Faculty of Agriculture Minufiya University</i>	
Prof. Dr. Farouk Metwalli Ali Nagy	<i>Chief Researcher in Forage Department –Field Crops Res. Inst. Agric. Res. Center</i>	
Dr. Naged Abdel –Azim Gaafar	<i>Agronomy Department, Faculty of Agriculture Minufiya university</i>	

Discussion date: 29/5 /2007

人

ACKNOWLEDGMENT

The author wishes to express his deepest gratitude and sincere appreciation to Prof. Dr. A. A.Nawar , professor of Agronomy .Department of Agronomy , Faculty of Agriculture ,Menufiya University , for his supervision planning, valuable advice and encouragement during the course of the study and preparation of the manuscript.

Grateful appreciation is also due to Prof. Dr. Shaaban Ahmed El-Shamaraka professor of Agronomy .Department of Agronomy, Faculty of Agriculture, Menufiya University for their supervision and valuable advice during the duration of this study.

Deepest gratitude is also offered to Prof.Dr. Farouk Metwalli Ali Nagy Chief Researcher, Forage Crops Department, Field Crops Institute, Agriculture Research Center (ARC), for suggestion the research problem and valuable advice through the course of the field work and during preparation of the manuscript.

Thanks are also due to Dr.Naged Abdel –Azim Gaafar Lecturer of agronomy Department Faculty of Agriculture Minufiya University for his encouragement during the course of the study and preparation of the manuscript.

The author wishes also to express deepest gratitude to all the staff members of the forage Research Team at Sakha Agriculture Research Station for their various facilities through different steps of this work.

Finally, I would like to thank my parents and me family for their patience, sacrifices and sincere encouragement during the course of this study.

CONTENTS	page
I-INTRODUCTION	1
II-REVIEW OF LITERATURE.....	3
III-MATERIALS AND METHODS.....	18
A- First Experiment.....	18
-Studies traits.....	20
- Yield components.....	20
- Forage and Silage qualities.....	21
B-The second experiment.....	22
-Treatments.....	22
- Studied traits.....	23
IV- RESULTS AND DISCUSSION.....	
A-First Experiment.....	24
<u>Experiment A-1 (MAIZE EXPERIMENT).</u>	24
A-Fresh and Silage yield (ton/fed).....	24
a-1- Effect of varieties, plant density, nitrogen level.....	24
a-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	27
B-Dry forage and Silage yield (ton/fed).....	32
b-1- Effect of varieties, plant density, nitrogen level.....	32
b-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	37
C- Fresh and dry leaves Percentage per plant.	43
c- 1- Effect of varieties, plant density, and nitrogen level.	43
c-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	47

D- Dry matter percentage of fresh forage and silage yield.	51
d- 1- Effect of varieties, plant density, and nitrogen level.	51
d-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	56
E- Forage and Silage qualities.....	62
E-1- Crude protein (CP) %.....	62
E -1-1- Effect of varieties, plant density, nitrogen level.	62
E-1-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	65
E- 2 - Crude fibers (CF) %	70
E -2- 1- Effect of varieties, plant density, nitrogen level.	70
E-2-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	73
E-3-Ether Extract percentage (E.E) %.....	76
E-3-1- Effect of varieties, plant density, nitrogen level.	76
E-3-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level	79
E -4 - Ash percentage %.....	83
E-4- 1- Effect of varieties, plant density, nitrogen level.	83
E-4-2- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	87
E- 5 - Nitrogen free extract (NFE) %.....	90
E-5- 1- Effect of varieties, plant density, nitrogen level.	90
E-5- 1- Interactions between varieties x plant density, varieties x nitrogen level and plant density x nitrogen level ...	94
E- 6 - Organic matter (OM) %.....	97
E-6- 1- Effect of varieties, plant density, nitrogen level.	97
