ACKNOWLEDGMENT

=====

I would like to express my sincere gratitude to **prof. Dr. Galal Mohamed Amer**, Professor and Head of General Medicine Department, Faculty of Medicine, Menofia University for his kind supervision, guidance and encouragement during the conduction of this work.

I wish to express my deep thanks and gratitude to **Prof. Dr. Mohamed A. Ghoneim**, Professor of Urology and Director of Urology and Nephrology Center, Mansoura University and Pioneer of renal transplantation in Egypt for his continuous help, encouragement and patience.

I am especially grateful to **Prof. Dr. Mohamed A. Sobh**, Professor of General Medicine and Head of Nephrology Department, Urology and Nephrology Center, Mansoura Faculty of Medicine for his sincere supervision, effort and valuable directions.

I wish to express my sincere thanks and deep gratitude to **Prof. Dr. Farha El-Chenaway**, Professor of Clinical Pathology, Faculty of Medicine, Mansoura University for her suggestions, valuable advice and technical support.

I am deeply grateful to **Dr. Sanaa Gazareen**, Ass. Professor of general medicine, Menofia University for her continuous help and valuable suggestions.

I wish to convey my sincere gratitude to **Prof. Dr. Assem El-Sherif**, Professor of General Medicine, Suez Canal University for his help in the statistical analysis of the data present in this work.

I am especially grateful to **Dr. Easam El-Sawy**, Specialist of Clinical Pathology, Urology and Nephrology Center, Mansoura University for his great help in conducting the laboratory part of the work.

I am also grateful to **Dr. Ahmed Rabie El-Arbagy, Dr. Mahmoud Wageeh** , Lecturers of General Medicine, Faculty of Medicine, Menofia University for their valuable advices and enthusiastic support.

Valuable secretarial support has been provided by **Mrs. Hala El-Hadidi** and **Mrs. Hala Fathy** who have been skillful and patient in typing this work.

IgG	Immunoglobulin G
IgM	Immunoglobulin M
LKM	Liver-kidney microsomal antibody
M$\pm$SD	Mean $\pm$ Standard deviation
MU	Mega unit
NANBH	Non-A, Non-B hepatitis
NCR	Non-coding region
NIH	National institute of health
NM	Nanometer
NS	Non-Structural
PAS	Periodic acid-schiff
PCR	Polymerase chain reaction
RIBA	Recombinant immunoblot assay
RNA	Ribo deoxy nucleic acid
TCI	Total corrected increment
UTP	Urinary tract plain X-ray

LIST OF CONTENTS

=====

	Page
* Introduction and the aim of work	1
* Review of Literature	
- Introduction.....	2
- The hepatitis C virus	4
- Markers of HCV infection.....	7
• Tests for HCV antibodies.....	8
• Supplemental (confirmatory) antibody tests.....	12
• HCV RNA testing.....	14
- Serological diagnosis of acute hepatitis C.....	16
- Serological diagnosis of chronic hepatitis C.....	17
- Epidemiology and transmission of hepatitis C.....	19
• Transmission.....	19
• Intrafamilial transmission.....	20
• Vertical transmission.....	20
• Community-acquired transmission.....	22
• Hepatitis C and blood transfusion.....	22
• Hepatitis C in hemophilia.....	25
• Hepatitis C in intravenous drug addicts.....	26
- Hepatitis C virus infection in chronic liver disease and hepatocellular carcinoma.....	27
• Cryptogenic chronic liver disease.....	27
• Autoimmune chronic active hepatitis.....	28
• Alcoholic liver disease.....	32
• Hepatocellular carcinoma.....	33
• HBsAg positive chronic liver disease.....	35
- Clinical and histopathological aspects.....	37
• Acute hepatitis.....	37
• Chronic hepatitis.....	38
• Histopathological aspects.....	40

- Pathogenesis of hepatitis C.....	46
- Management of hepatitis C virus infection.....	49
• Acute hepatitis.....	49
• Chronic hepatitis.....	51
• Interferon in chronic hepatitis C.....	53
- Hepatitis C virus and nephrology.....	60
• Detection methods for hepatitis C virus infection.....	60
• Epidemiology of hepatitis C virus infection in nephrology.....	61
• Clinical implications of hepatitis C virus infection in nephrology.....	63
• Hepatitis C virus positive organ donors and renal transplantation	69
• Impact of hepatitis C infection on nephrological practice	70
• Treatment of hepatitis C in dialysis and renal transplantation	72
• Hepatitis C and renal diseases.....	73
 * Patients and Methods.....	 77
* Results	92
* Discussion.....	114
* Summary and Conclusion.....	130
* References.....	132
* Arabic Summary	

LIST OF TABLES

=====

	Page
Table (1): Controlled clinical trials of alpha interferon in chronic non-A, non-B type C hepatitis.....	55
Table (2): Clinical assessment of the degree of liver failure (Child-Pugh's Score).....	90
Table (3): Demographic and clinical characteristics of the 133 renal allograft recipients at commencement of the study.....	92
Table (4): Pre-transplant characteristics of 131 recipients according to their HCV RNA detected by PCR before transplantation.....	93
Table (5): Frequency (%) of positive results of different tests used to detect HCV infection in 133 potential kidney transplant recipients.....	94
Table (6): Hemodialysis and pre-transplant blood transfusion as risk factors of acquisition of HCV among potential kidney transplants	95
Table (7): Results of PCR test for HCV RNA in 131 recipients before transplantation and at last follow-up after transplantation.....	96
Table (8): The evolution of anti-HCV seroprevalence and HCV viremia during post-transplant follow-up period.....	97
Table (9): Antibody seroconversion among recipients with and without active HCV infection (PCR) throughout follow-up period.....	98
Table (10): Recipients who showed changes in HCV markers throughout follow-up period.....	99
Table (11): Post-transplant liver status (judged by ALT behaviour) in 131 recipients according to their viremic state (PCR).....	100
Table (12): HCV markers among kidney transplant recipients according to their liver function (judged by ALT activity) after transplantation	101
Table (13): Characteristics related to liver status (ALT behaviour) in renal allograft recipients before and after transplantation.....	102

Table (14): Frequency of acute cellular rejection episodes in the recipients according to their results of HCV RNA (PCR).....	103
Table (15): Frequency of chronic allograft rejection in recipients with and without hepatitis C viremia as detected by PCR.....	104
Table (16): Mean serum creatinine levels at comparable time points in renal allograft recipients according to their viromic state (PCR).....	105
Table (17): Mean values of creatinine clearance at comparable time points in all recipients according to their viremic state.....	106
Table (18): Frequency of post-transplant proteinuria in renal allograft recipients according to their viremia detected by PCR.....	107
Table (19): Mean cumulative corticosteroid doses for PCR positive and negative recipients at comparable time points.....	108
Table (20): Average maintenance doses of prednisolone and azathioprine in recipients according to their viremic state.....	109
Table (21): Impact of HCV infection as detected by PCR on azathioprine (aza) therapy.....	110
Table (22): Average maintenance doses of ciclosporin A in PCR positive and negative patients.....	111
Table (23): Mean ciclosporin A levels at comparable time points in recipients according to their viremic status.....	111
Table (24): Frequency of viremic and non-viremic recipients who received drugs that may affect CsA level.....	111
Table (25): Frequency of acute and chronic ciclosporin A nephrotoxicity in recipients with and without hepatitis C viremia.....	112
Table (26): Frequencies and causes of graft and patient losses in HCV RNA positive and negative recipients.....	113
