1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971) using a Shimadzu 1010 spectrophotometer.

Journal of Management Studies, 20(6), 791-804.

10. *Chlorophyll *a** and *Chlorophyll *b** were determined by the method of Lichtenthaler and Sunda (1980).

Q. And that's the only way to get the information that you need?

1. The first step is to identify the problem. This involves understanding the current situation and what needs to be changed.
