APPROVAL SHEET

"UTILIZATION OF SOLAR ENERGY IN AGRICULTURAL FIELD"

UTILIZATION OF SOLAR HEATED AND
AMBIENT AIR FOR DRYING ROUGH RICE
FOR SEVERAL HARVEST PERIODS

By

Abd El-Fattah Abd El-Raouf El-Kewey

This thesis for Ph. D. Degree in
Agricultural Sciences (Agricultural Mechanization)

Has been approved by:

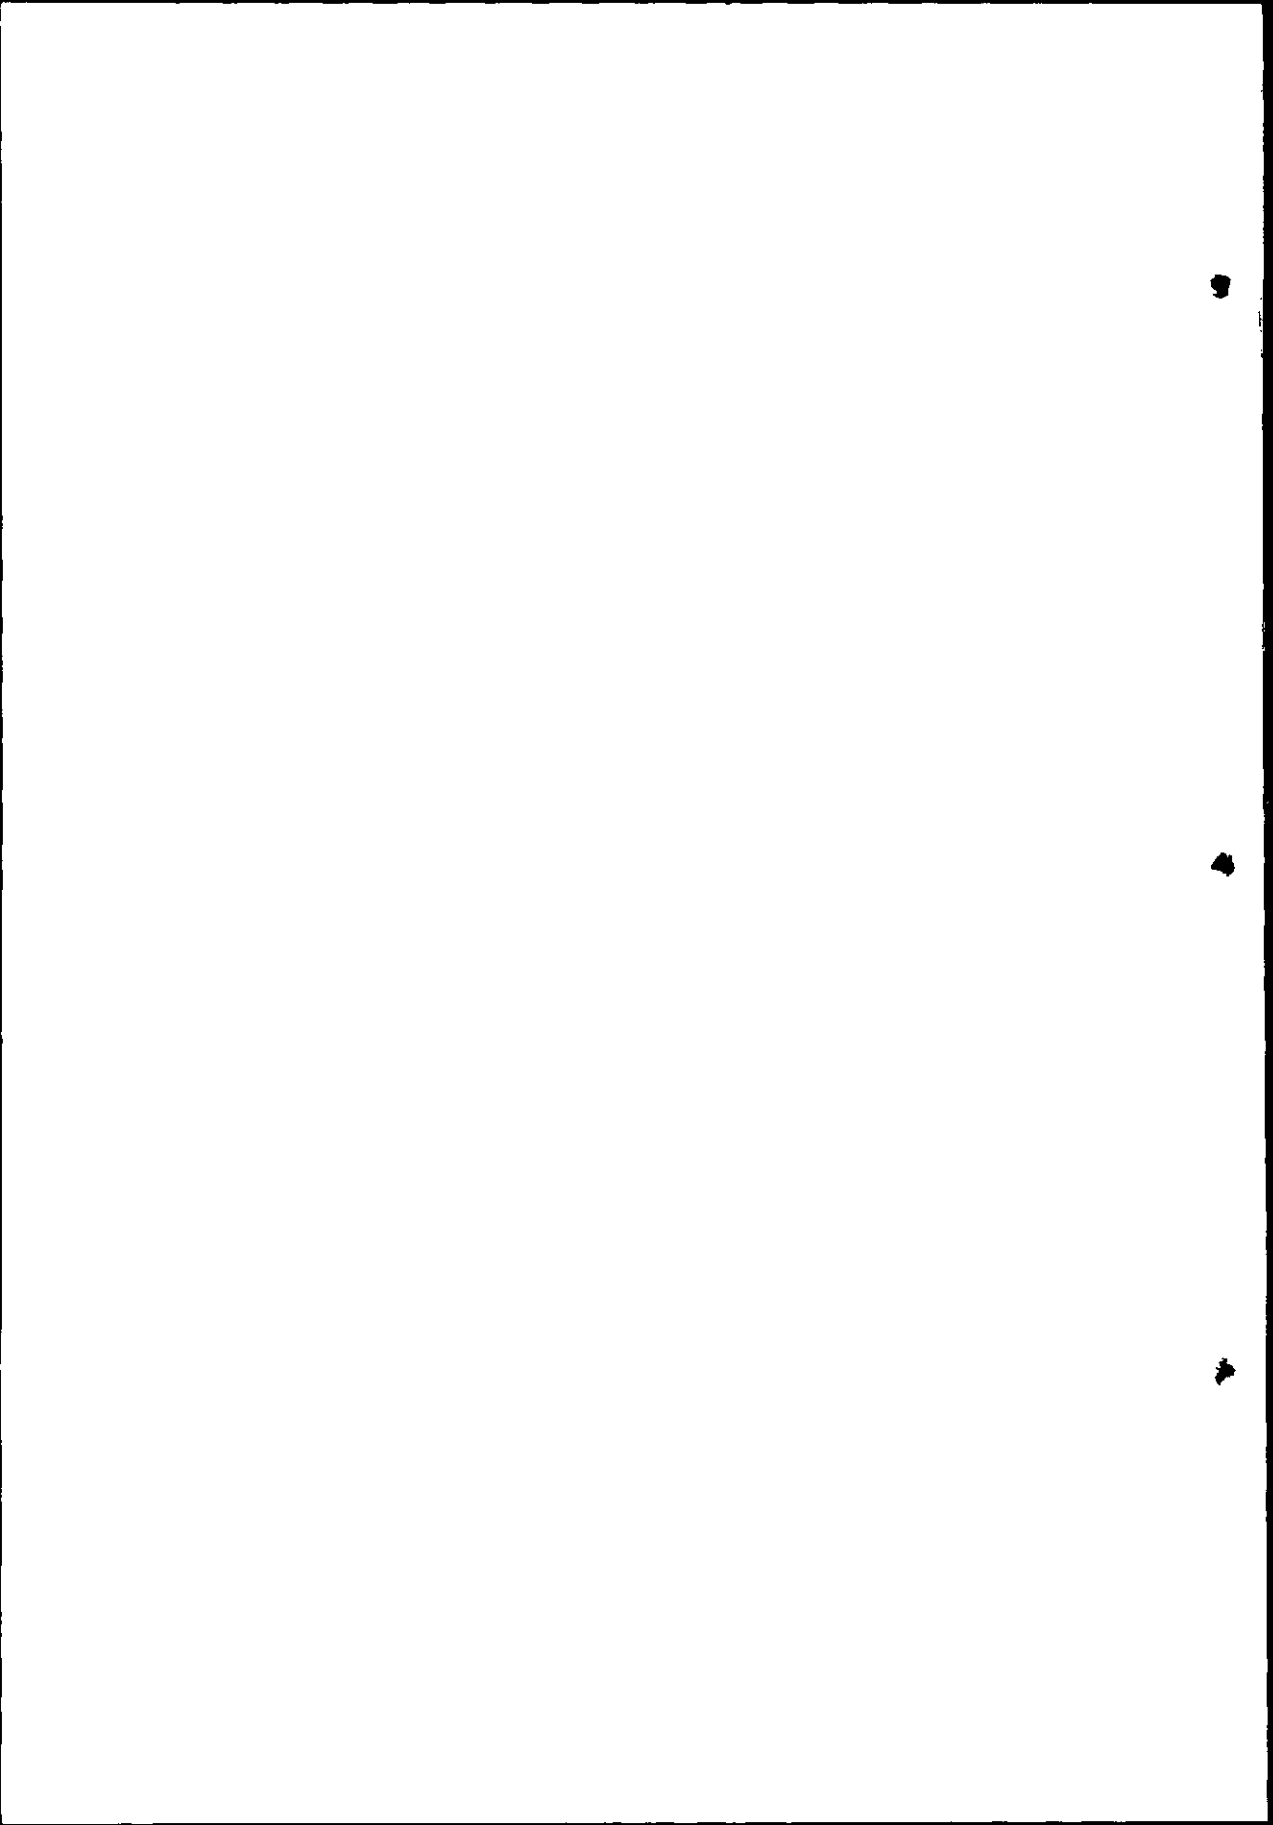

Prof. Dr. Samir A. Tayel *S. A. Tayel*
Professor of Agric. Eng., and Head of Agric. Eng.
Dept., Faculty of Agric., El-Azhar University.

Prof. Dr. Mamdouh A. Helmy *M. A. Helmy*
Professor of Agric. Eng., and Head of
Agric. Mech. Dept., Faculty of Agric.,
Kafr El-Sheikh, Tanta University.

Prof. Dr. Ismail A. Abd El-Motaleb *I. A. Abd El-Motaleb*
Professor of Agric. Eng., Agric. Mech.
Dept., Faculty of Agric., Kafr El-Sheikh,
Tanta University.

Dr. Fathy I. Hindey *F. I. Hindey*
Associate professor of Agric. Eng.,
Agric. Mech. Dept., Faculty of Agric.,
Kafr El-Sheikh, Tanta University.

Date: 19 / 1 / 2003

SUPERVISION COMMITTEE

Prof. Dr. Mamdouh A. Helmy

*Professor of Agric. Eng., and Head
of Agric. Mech. Dept., Faculty of Agric.,
Kafr El-Sheikh, Tanta University.*

Dr. Fathy I. Hindey

*Associate professor of Agric. Eng.,
Agric. Mech. Dept., Faculty of Agric.,
Kafr El-Sheikh, Tanta University*

Dr. Hussin M. H. Sorour

*Associate professor of Agric. Eng.,
Agric. Mech. Dept., Faculty of Agric.,
Kafr El-Sheikh, Tanta University*

ACKNOWLEDGMENT

Thanks to Allah for his gracious kindness in endeavors the author has taken up in his life.

The author wishes to express his deep sincere thanks and appreciation to Prof. Dr. Mamdouh Abbas Helmy, Professor and head of Agricultural Mechanization Department, Faculty of Agriculture, Kafr El-Sheikh, Tanta University, for his close and sincere supervision, fruitful guidance and suggestion valuable advice and generous effort that enabled me to undertake the present work.

The author wishes also to express his appreciation and sincere gratitude to Dr. Fathy Ibrahim Hindy, Associate Prof. in Aric. Mech. Dep., Fac. of Agric., Tanta University for his supervision, continuous scientific help, valuable consulting, generous, encouragement and revising manuscript.

Many thanks to Dr. Hussin Mohamed Hussain Sorour, Associate Prof. in Aric. Mech. Dept., Fac. of Agric., Tanta University for his scientific assistance, supervision and continuous encouragement.

Sincere appreciation and thanks to Prof. Dr. Shawky Abd El-Raouf El-Kewey, Professor of plantpathology, potany Dept., Fac. of Agric., Kafr El-Sheikh for his continuous help, guidance, valuable consulting, generous and encouragement.

Many thanks are extended to Prof. Dr. Azmy M. El-Berry, Director of Agric. Eng. Res. Institute and Dr. Osama Mohamed Kamel, Institute Agential for Training and Extension and all staff of Rice Mechanization Center and Agric. Mech. Dept., Fac. of Agric., Kafr El-Sheikh for their helpful comments and encouragement.

Finally, I would like to express my deep thanks and appreciation's to my brothers, my wife, my daughters for their understanding, patience, loving and encouragement, also, to all that assisted me by any way to finish the present work.

CONTENTS

	<i>Title</i>	<i>Page</i>
1.	INTRODUCTION.	1
2.	REVIEW OF LITERATURE.	3
2.1.	Grain drying	3
2.1.1.	Importance of the drying process.	3
2.1.2.	Thin-layer drying	4
2.1.3.	Deep-layer drying	7
2.2.	Methods of drying.	8
2.2.1.	Natural drying (sun drying).	9
2.2.2.	Artificial drying.	9
2.2.3.	Low temperature grain drying.	9
2.2.4.	In-bin (in-storage) drying system application.	10
2.3.	Using of solar energy for drying process.	12
2.3.1.	Solar heated air drying.	12
2.3.2.	Greenhouse as a solar dryer or solar collector.	13
2.4.	Factors affecting the drying process.	15
2.4.1.	Drying air temperature.	16
2.4.2.	Drying air relative humidity.	17
2.4.3.	Air flow rate.	17
2.4.4.	Drying date.	18
2.5.	Effect of drying system on the quality of rice grains.	18
2.6.	Drying costs and economical feasibility of solar grain drying methods.	19
3.	MATERIALS AND METHODS.	22
3.1.	Materials.	22
3.1.1.	Rough rice grain.	22
3.1.2.	Solar greenhouse.	22
3.1.3.	Grain bins.	22
3.1.4.	Measuring instruments.	25
3.1.4.1.	Disk solarimeter.	25
3.1.4.2.	Grain bulk and air temperatures.	25
3.1.4.3.	Air temperature and relative humidity.	28
3.1.4.4.	Air flow meter.	28
3.1.4.5.	Grain moisture content.	28
3.1.4.6.	Energy required for fans operation.	28
3.1.4.7.	Hardness meter.	28
3.1.4.8.	Rice grain husker.	28
3.1.4.9.	Grain crack meter.	28
3.1.4.10.	Rice grader.	28

3.1.4.11.	Whitening machine.	31
3.1.4.12.	Milling quality meter.	31
3.2.	Methods.	34
3.2.1.	The measurements related to weather conditions.	34
3.2.1.1.	Available solar energy.	34
3.2.1.2.	Useful heat gain.	34
3.2.1.3.	Greenhouse efficiency in heating air.	35
3.2.2.	The measurements related to drying process.	35
3.2.2.1.	Determination of moisture content.	35
3.2.2.2.	Calculation of drying rate.	36
3.2.2.3.	Equilibrium moisture content estimation.	36
3.2.2.4.	Determination of moisture ratio.	37
3.2.2.5.	Calculation of removed water.	37
3.2.2.6.	Estimation of energy required for drying process.	38
3.2.3.	Tests related to grain quality.	38
3.2.3.1.	Germination test.	38
3.2.3.2.	Fungi growth test.	38
3.2.3.3.	Grain crack percentage.	39
3.2.3.4.	Hardness test.	39
3.2.3.5.	Milling quality tests.	39
4.	RESULTS AND DISCUSSION.	40
4.1.	Weather conditions.	40
4.1.1.	Air temperature.	40
4.1.2.	Relative humidity.	44
4.1.3.	Solar energy.	44
4.1.4.	Useful heat gain.	48
4.1.5.	Efficiency of the greenhouse.	53
4.2.	Drying process.	53
4.2.1.	Grain bulk temperature.	53
4.2.2.	Grain moisture content.	57
4.2.3.	Drying rate.	62
4.2.4.	Moisture ratio.	66
4.2.5.	The removed water from grains.	71
4.3.	Grain quality tests.	75
4.3.1.	Total yield.	75
4.3.2.	Head yield.	75
4.3.3.	Broken milled rice.	77
4.3.4.	Cracked grains.	79
4.3.5.	Grain hardness.	79
4.3.6.	Germination rate.	79
4.3.7.	Grain whiteness degree.	81
4.3.8.	Transparency.	81
