Acknowledgements

The researcher Nora Ebeid, acknowledges with great respect and admiration the contribution made by professor Kamal El Monofy, dean of the Faculty of Economics and Political Science and Dr. Salwa Gomaa, professor of public policy and the director of public administration research center. Professor Monofy's advice, guidance, encouragement and support made it possible for the researcher to enhance her academic background and carry her fieldwork.

Professor Gomaa's patience, instructions, corrections, democratic dialogues influenced the writer's background as well as her basic research capabilities. She gave the researcher needed care and attention.

The researcher is deeply indebted to the late professor Rachid, professor of public administration. He was a great man. He cared and shared. He cared to give her the chance to enrich her academic background by giving her the opportunity to spend 4 months at City University in the U.K. He shared with her all what he had about commercialization in non-profit making organizations.

My deep respect to Professor Gabballah, Secretary General of the Egyptian Supreme Council of Antiquities, for accepting to give me the honor of sitting at the examiners committee. An added thanks is due to the precious time he gave me to discuss some of the ideas presented in this thesis.

The researcher acknowledges with great admiration the contribution given by Dr. Walid El Shafei, chairman of SCORE group of companies, for his valuable advice on program preparation.

Last but not least is the deep appreciation for the facilities made, the support given, and the valuable input made by the Department of Arts Policy and Management at the City University, as well as by the senior staff at the museums visited in England, France, Italy, the Netherlands, and U.S.A. The information supplied, and opinions given in the interviews were so valuable and enlightening.
