Arabic Summary	

List of Tables

Table	Page
(1) Comparison between the demographic data of the studied groups	33
(2) Comparison between T_3 , T_4 serum, level of the three studied groups	34
(3) Comparison between serum progesterone level of the studied groups (day 21 of the 1 st cycle).	35
(4) Comparison between total serum Ca level of the six studied groups before and after treatment	36
(5) Effect of calcium carbonate on symptoms of PMS (range 1-6) in group A_1	37
(6) Effect of calcium carbonate on symptoms of PMS (range 1-6) in group A_2	38
(7) Effect of calcium carbonate on symptoms of PMS (range 1-6) in group B_1	39
(8) Effect of calcium carbonate taken on symptoms of PMS in group B_2	40
(9) Effect of placebo taken on symptoms of PMS in group C_1	41
(10) Effect of placebo taken on symptoms of PMS in group C_2	42

Table		Page
(11)	Comparison of the percentage changes in PMS symptoms induced by different lines of treatment	44
(12)	Mean score of different symptoms before (I) and after (II) treatment during luteal phase of the 3 rd cycle in group A1	47
(13)	Mean score of different symptoms before (I) and after (II) treatment during luteal phase of the 3 rd cycle in group A2	50
(14)	Mean score of different symptoms before (I) and after (II) treatment during luteal phase of the 3 rd cycle in group B1	53
(15)	Mean score of different symptoms before (I) and after (II) treatment during luteal phase of the 3 rd cycle in group B2	56
(16)	Mean score of different symptoms before (I) and after (II) treatment during luteal phase of the 3 rd cycle in group C1	59
(17)	Mean score of different symptoms before (I) and after (II) treatment during luteal phase of the 3 rd cycle in group C2	62

List of Figures

Figure		Page
(1)	Effect of calcium carbonate (groups A1, A2, B1 & B2) and placebo (groups C1, C2) on symptoms of PMS (range 1-6)	43
(2)	Comparison of the percentage change in PMS symptoms induced by different lines of treatment	45
(3)	Comparison of the percentage change in PMS symptoms induced by different lines of treatment in the three successive treatment cycles	46
(4)	Mean score of depression, anxiety, breast tenderness, swelling of extremities and abdominal cramp before (I) and after (II) treatment during luteal phase of the third cycle in group A1	48
(5)	Mean score of backache, headache, fatigue, appetite change and insomnia before (I) and after (II) treatment during luteal phase of the third cycle in group A1	49
(6)	Mean score of depression, anxiety, breast tenderness, swelling of extremities and abdominal cramp before (I) and after (II) treatment during luteal phase of the third cycle in group A1	51
(7)	Mean score of backache, headache, fatigue, appetite change and insomnia before (I) and after (II) treatment during luteal phase of the third cycle in group A2	52
(8)	Mean score of backache, headache, fatigue, appetite change and insomnia before (I) and after (II) treatment during luteal phase of the third cycle in group B1	54

(9)	Mean score of backache, headache, fatigue, appetite change and insomnia before (I) and after (II) treatment during luteal phase of the third cycle in group B1	55
(10)	Mean score of depression, anxiety, breast tenderness, swelling of extremities and abdominal cramp before (I) and after (II) treatment during luteal phase of the third cycle in group B2	57
(11)	Mean score of backache, headache, fatigue, appetite change and insomnia before (I) and after (II) treatment during luteal phase of the third cycle in group B2	58
(12)	Mean score of depression, anxiety, breast tenderness, swelling of extremities and abdominal cramp before (I) and after (II) treatment during luteal phase of the third cycle in group C1	60
(13)	Mean score of backache, headache, fatigue, appetite change and insomnia before (I) and after (II) treatment during luteal phase of the third cycle in group C1	61
(14)	Mean score of depression, anxiety, breast tenderness, swelling of extremities and abdominal cramp before (I) and after (II) treatment during luteal phase of the third cycle in group C2	63
(15)	Mean score of backache, headache, fatigue, appetite change and insomnia before (I) and after (II) treatment during luteal phase of the third cycle in group C2	64
