Properties of E. coli strains isolated from septicaemic rabbits and chickens

**Thesis
Presented by**

Azza Ali Hussin El- Tabiy
B.V.Sc., Zagazig University, 1986
M.V.Sc., Suez Canal University, 1994
Vet. Microbiology

**For The Degree Of
Ph.D. (Bacteriology, Immunology and Mycology)**

Under The Supervision Of

Prof. Dr.
Mohamed El- Sayed Enany
Professor and Chairman of
Microbiology Department
Faculty Of Veterinary Medicine
Suez Canal University

Prof. Dr.
Mervat Sayed Hanafi
Professor of Bacteriology and
Head of Serology unit
Animal Health Research Institute
Dokki - Giza

To
Suez Canal University
Faculty Of Veterinary Medicine
Department Of Microbiology
1998

قرار لجنة الحكم و المناقشة

قررت لجنة الحكم و المناقشة فى جلستها المنعقدة يوم السبت الموافق ١٥/٨/١٩٩٨م
ترشيح السيدة ط.ب/ **عزة على حسين النابغى** للحصول على درجة الدكتوراة فى
العلوم الطبية البيطرية تخصص (بكتريولوجيا - مناعة - فطريات) .

تحريراً فى ١٥/٨/١٩٩٨م

Acknowledgments

I am extremely grateful to my GOD.

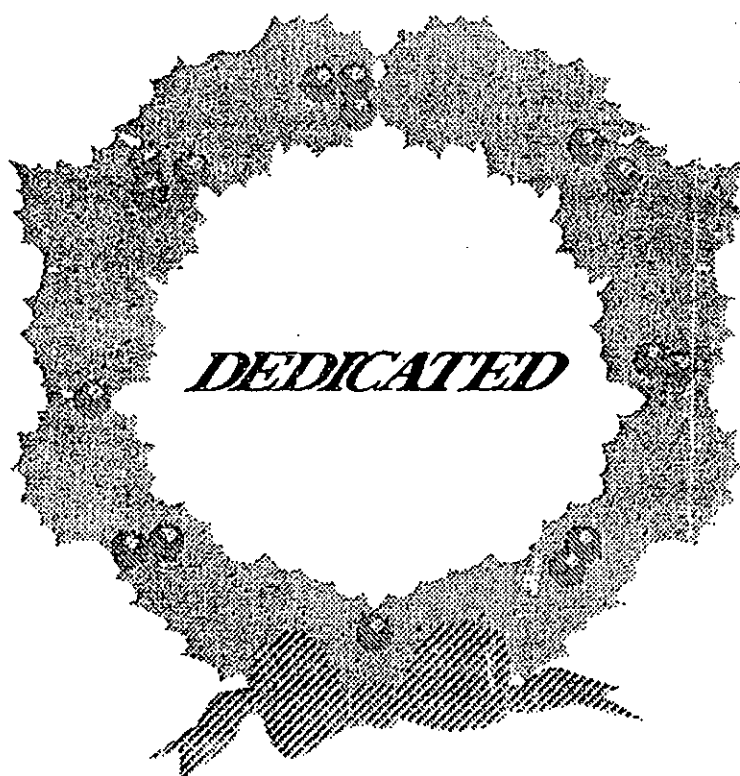

I wish to express my cardinal thanks and deep gratitude to Prof. Dr. Mohamed El- Sayed Enany, Prof. and Chairman of Microbiology Department, Faculty of Veterinary Medicine, Suez Canal University for supervising and planning the work, great help and valuable advice during the course of this research.

I am greatly indebted to Prof. Dr. Mervat Sayed Hanafi, Prof. of bacteriology and Head of Serology Unit, Animal Health Research Institute, Dokki- Giza, for supervising the work and for her sincere help during this work.

Thanks also expressed to Dr. Zienab Ibrahim Soliman, Researcher at Animal Health Research Institute, Dokki- Giza, Port- Said Lab. for Food Hygiene for her cooperation and great help.

Thanks to Dr. Aisha Ragab Ali Researcher at Animal Health Institute, Dokki- Giza for her great help in serological work.

Thanks to all members of Microbiology Department, Fac. of vet. Med. Suez Canal Univeresity.

TO MY FAMILY

Contents

	Page
1- Introduction.	1
2- Review of Literature.	4
I- Colibacillosis in rabbits and chickens.	4
II- Serotyping of <u>Escherichia coli</u> isolated from rabbits and chickens.	8
III- Virulence factors of <u>Escherichia coli</u> .	17
a- Haemolytic activity.	17
b- Haemagglutination activity.	21
c- Congo red uptake test.	27
IV- Pathogenicity test.	32
V- Antibigram of isolated <u>Escherichia coli</u> .	44
3- Material and Methods.	51
1- Material.	51
I- Samples.	51
II- Media used.	51
III- Solutions and Reagents used.	52
IV- Diagnostic antisera.	54
V- Pathogenicity test.	54
VI- Antibiotic sensitivity discs.	54
VII- Other equipments.	55
2- Methods.	56
I- Bacteriological examination.	56
II- Morphological examination.	56
III- Biochemical test.	56

	Page
IV- Serotyping of <u>E. coli</u> isolates.	59
a- Slide agglutination test using live organisms.	59
b- Slide agglutination test using heated cells.	60
V- Virulence factors.	61
a- Detection of haemolytic activity.	61
b- Detection of haemoagglutinating activity.	61
c- Congo red (CR) binding by <u>E. coli</u> isolates.	62
d- Pathogenicity tests.	62
e- Antibigram of isolated strains.	63
4- Results	64
4.1 Clinical examination of rabbits and chickens.	64
4.2 Bacteriological examination.	64
4.2.1 Morphological and cultural examination.	64
4.3 Biochemical characters.	64
4.3.1 Biochemical characters of <u>E. coli</u> isolates recovered from diseased rabbits and chickens.	64
4.3.2 Biochemical characters of <u>E. coli</u> isolates recovered from apparently healthy rabbits and chickens.	65
4.4 Prevalence rate of <u>E. coli</u> .	72
4.4.1 Prevalence rate of <u>E. coli</u> isolates recovered from diseased rabbits and chickens.	72
4.4.2 Prevalence rate of <u>E. coli</u> isolates recovered from apparently healthy rabbits and chickens.	72
4.4.3 Incidence and frequency distribution of <u>E. coli</u> recovered from different sites of diseased rabbits.	77

	Page
4.4.4 Incidence and frequency distribution of <u>E. coli</u> recovered from different sites of apparently healthy rabbits.	77
4.4.5 Incidence and frequency distribution of <u>E. coli</u> recovered from different sites of diseased chickens.	77
4.4.6 Incidence and frequency distribution of <u>E. coli</u> recovered from different sites of apparently healthy chickens.	77
4.5 Serological identification.	83
4.5.1 Serotyping of <u>E. coli</u> isolates recovered from diseased rabbits.	83
4.5.2 Serotyping of <u>E. coli</u> isolates recovered from diseased chickens.	83
4.5.3 Incidence and frequency distribution of <u>E. coli</u> serovares from diseased rabbits.	84
4.5.4 Incidence and frequency distribution of <u>E. coli</u> "0" serovares recovered from diseased chickens.	84
4.6 Virulence factors.	88
4.6.1 Detection of haemolytic activity.	88
4.6.2 Detection of haemagglutination activity of typable strains and haemagglutination inhibition by 1% D-mannose.	88
4.6.2.1 Haemagglutination activity of <u>E. coli</u> strains isolated from diseased rabbits using guinea pig RBCs.	88

4.6.2.2	Haemagglutination activity of <u>E. coli</u> strains isolated from diseased chickens using guinea pig RBCs.	90
4.6.2.3	Haemagglutination activity of <u>E. coli</u> strains isolated from diseased rabbits using chicken RBCs.	90
4.6.2.4	Haemagglutination activity of <u>E. coli</u> strains isolated from diseased chickens using chicken RBCs.	93
4.6.2.5	Haemagglutination activity of <u>E. coli</u> strains isolated from diseased rabbits using human RBCs.	93
4.6.2.6	Haemagglutination activity of <u>E. coli</u> strains isolated from diseased chickens using human RBCs.	96
4.6.3	Detection in vitro pathogenicity using congo red medium.	100
4.6.4	Results of in vivo pathogenicity tests.	100
4.6.4.1	Experimental infection of newly weaned rabbits with <u>E. coli</u> 078 and 025.	100
4.6.4.2	Experimental infection of one day old chicks with <u>E. coli</u> 078 and 025.	104
4.7	Antibiograms of <u>E. coli</u> serotypes isolated from diseased rabbits and chickens to different chemotherapeutic agents.	107
