

Assessment of Docosahexaenoic Fatty Acid in the Serum of Asthmatic Children

Thesis

*Submitted for Partial Fulfillment of
Master Degree in Pediatrics*

By

Rania Hosni Hussin Hammady
M.B., B.Ch. (2001)

Under Supervision of

Dr. Malak Ali Shaheen

*Assist. Professor of Pediatrics
Faculty of Medicine
Ain Shams University*

Dr. Maha Mohamed Sallam

*Assist. Professor of Biochemistry
Faculty of Medicine
Ain Shams University*

Dr. Hala Abdel Al Ahmed

*Lecturer of Clinical and Chemical Pathology
Faculty of Medicine, Ain Shams University*

**Faculty of Medicine
Ain Shams University
2009**

قياس نسبة حمض دكوساهيكسانويك الدهنى فى مصل الأطفال المصابين بالربو الشعبى

رسالة

مقدمة من

الطبيبة/رانيا حسنى حسين حمادي

بكالوريوس الطب والجراحة ٢٠٠١

توطئة للحصول على

درجة الماجستير في طب الأطفال

تحت إشراف

الدكتورة/ملك على شاهين

أستاذ مساعد طب الأطفال

كلية الطب . جامعة عين شمس

الدكتورة/مها محمد سلام

أستاذ مساعد الكيمياء الحيوية

كلية الطب . جامعة عين شمس

الدكتور/ هالة عبدالعال أحمد

مدرس الباثولوجيا الإكلينيكية والكيميائية

كلية الطب . جامعة عين شمس

كلية الطب

جامعة عين شمس

٢٠٠٩

Acknowledgement

First and for most, I always feel indebted to "**ALLAH**" the most beneficent and the most merciful.

Words cannot express the depth of my gratitude to **Dr. Malak Ali Shaheen**, Assistant Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for her valuable suggestions, generous assistance, kind support and continuous encouragement throughout this work.

My great appreciation and thanks to **Dr. Maha Mohamed Sallam**, Assistant Professor of Biochemistry, Faculty of Medicine, Ain Shams University, for her unlimited help, kind support, valuable supervision, guidance and advice.

My great appreciation and thanks to **Dr. Hala Abdel Al Ahmed**, Lecturer of Clinical and Chemical Pathology, Faculty of Medicine, Ain Shams University, for continuous contributions in the laboratory part of this work.

I would like to express my appreciation to my family, and my colleagues who participated in one way or another in accomplishment of this work.

A great deal of my gratitude goes to all my patients and their parents wishing for them a very rapid and complete permanent recovery.

Rania Hosni Hammady

**This thesis is dedicated to
my dear Father, my great
mother,
lovely sisters and brothers;
Marwa,Safaa,
Mohamed and Ahmed
for their support, help and
continuous concern so that
I could complete this study.**

List of content

	Page
• <i>Introduction</i>	1
• <i>Aim of the work</i>	3
• <i>Review of literature</i>	4
 Chapter (1): Pediatric bronchial asthma	
Definition.	4
Prevalence, morbidity and mortality.	4
Social and economic burden of bronchial asthma	6
Factors influencing the development and expression of asthma	6
Triggers of asthma.	11
Mechanisms of asthma.	12
Classification of bronchial asthma.	16
Diagnosis of bronchial Asthma.	17
Differential diagnosis of brachial asthma.	21
Management of bronchial asthma.	23
New modalities in treatment of bronchial asthma.	32
Future trend in asthma therapy	35
 Chapter (2): Omega-3 fatty acids	
Definition.	36
Chemistry.	37
Metabolism and bioavailability	39
Daily requirement	40
Dietary Sources	41
Available forms of supplementations	43
Biological activities	43
Health benefits	47
Adverse effects	59
Possible Interactions	61
The omega-3 to omega-6 ratio	63

List of tables

Table No.	Table Title	Page No.
1	Factors influencing the development and expression of asthma.	6
2	Triggers of asthma.	11
3	Inflammatory cells in asthma airways.	13
4	Airway structural cells involved in the pathogenesis of asthma.	13
5	Key mediators of asthma.	14
6	Structural changes in asthma airways.	15
7	Mechanisms of airway narrowing in bronchial asthma.	15
8	Classification of asthma according to clinical features.	16
9	Questions to considered in the diagnosis of asthma.	17
10	Common asthma risk factors and actions to reduce exposure.	24
11	Level of asthma control.	25
12	Adequate Intake (AI) for omega-3 fatty acids	40
13	Some food sources of linoleic acid (18:2n-6)	41
14	Some food sources of EPA (20:5n-3) and DHA(22:6n3)	42

List of tables of the results

Table No.	Table Title	Page No.
1	The mean values of age, sex, weight and height in cases and controls	71
2	The mean values of DHA serum level in cases and controls before intake of DHA supplementations and after it	72
3	The means values of spirometric parameters of pulmonary function tests (PFTs) before intake of DHA supplementations in cases and controls	72
4	The mean values of spirometric parameters of pulmonary function tests (PFTs) after intake of DHA supplementations in cases and controls:	73
5	The mean values of DHA serum level in patients' subgroups before intake of DHA supplementations and after it	73
6	The mean values of spirometric parameters of pulmonary function tests before intake of DHA supplementations in patients' subgroups	74
7	The mean values of spirometric parameters of pulmonary function tests after intake of DHA supplementations in patients' subgroups	74
8	Statistical comparison between cases and controls as regard age	75
9	Statistical comparison between cases and controls as regard sex	75
10	Statistical comparison between cases and controls as regard body weight.	75
11	Statistical comparison between cases and controls as regard height.	76
12	Statistical comparison between cases and controls as regard family history of bronchial asthma	76
13	Statistical comparison between cases and controls as regard history of other allergic diseases	77

Table No.	Table Title	Page No.
14	Statistical comparison between cases and controls as regard serum level of DHA before intake of DHA supplementations	78
15	Statistical comparison between cases and controls as regard serum level of DHA after intake of DHA supplementations	79
16	Statistical comparison between cases and controls as regard spirometric parameters of pulmonary function tests (PFTs) before intake of DHA supplementations	80
17	Statistical comparison between cases and controls as regard spirometric parameters of pulmonary function tests (PFTs) after intake of DHA supplementations	80
18	Statistical comparison between the mean values of DHA serum level before and after intake of	82
19	Statistical comparison between the mean values of spirometric parameters of pulmonary function tests (PFTs) before and after intake of DHA supplementations in cases	82
20	Statistical comparison between the mean values of DHA serum level before and after intake of DHA supplementations in controls	83
21	Statistical comparison between the mean values of spirometric parameters of pulmonary function tests (PFTs) before and after intake of DHA supplementations in controls	83
22	Statistical comparison in patients' subgroups as regard serum level of DHA before and after intake of DHA supplementations	84
23	Statistical comparison in patients' subgroups as regard the mean values of FVC before and after intake of DHA supplementations	85

Table No.	Table Title	Page No.
24	Statistical comparison in patients' subgroups as regard the mean values of FEF (25–75%) before and after intake of DHA supplementations	86
25	Statistical comparison in patients' subgroups as regard the mean values of FEV1 before and after intake of DHA supplementations	87
26	Statistical comparison in patients' subgroups as regard the mean values of FEV1 ratio before and after intake of DHA supplementations	88
27	Statistical comparison between patients' subgroups as regard serum level of DHA before intake of DHA supplementations	89
28	Statistical comparison between patients' subgroups as regard serum level of DHA after intake of DHA supplementations	90
29	Correlation between FVC and DHA serum level in cases before DHA supplementation	91
30	Correlation between FVC and DHA serum level in cases after DHA supplementation	92
31	Correlation between FEV1 and DHA serum level in cases before DHA supplementation	93
32	Correlation between FEV1 and DHA serum level in cases after DHA supplementation	94

List of figures

Figure No.	Figure title	Page No.
1	Prevalence of childhood asthma.	5
2	Common asthma triggers.	9
3	Pathogenesis of asthma; Interaction between host factors and environmental exposures.	10
4	The interaction between airway inflammation, clinical symptoms and pathophysiology of asthma.	12
5	Asthma pathophysiology.	16
6	Spirometry.	18
7	Peak flowmeter.	18
8	Impulse oscillometry.	19
9	Skin prick test.	20
10	Management approach based on control.	27
11	Types of inhaler used in treatment of asthma.	28
12	Types of spacers (without mask and with mask).	30
13	Acupuncture.	34
14	Classification of fatty acids.	36
15	Omega-3 and omega-6 major families of polyunsaturated fatty acids.	37
16	Sources of omega-3 fatty acids (food or supplementation).	38
17	Most important n-3 fatty acids in human nutrition.	39

Figure No.	Figure title	Page No.
18	Dietary Sources of omega-3 fatty acids.	41
19	Forms of omega-3 fatty acids.	43
20	Synthesis of eicosanoids from omega-3 and omega-6 fatty acids.	45
21	Omega-3 is anti-inflammatory and omega-6 is pro-inflammatory.	46
22	Relative risks of fatal coronary heart disease and nonfatal myocardial infarction, according to frequency of fish intake.	48
23	The effect of omega-3 fatty acids on blood pressure.	49
24	Relation between fish consumption and incidence of major depression.	51
25	Eye of child with retinopathy of prematurity.	52
26	Summary of health benefit of omega-3 fatty acids.	56
27	Mechanism by which omega-3 fatty acids decrease the inflammation in asthma.	60
28	High omega-6/omega-3 ratio in the diet is risk factors for asthma.	63
29	MIR Spirobank.	66
30	HPLC chromatogram showing the peak area of (DHA) injected standard.	69

List of figures of the results

Figure No.	Figure title	Page No.
1	Bar chart showing the prevalence of family history of bronchial asthma in cases and controls.	77
2	Bar chart showing the prevalence of other allergic diseases among cases and controls.	78
3	Error chart showing serum level of DHA before and after intake of DHA supplementation in cases and controls.	79
4	Error charts showing changes in the spirometric parameters of pulmonary function tests (PFTs) before and after intake of DHA supplementation in cases and controls.	81
5	Bar chart showing comparison between DHA serum level in the patients' subgroups before and after intake of DHA supplementation.	84
6	Bar chart showing comparison between the mean values of FVC before and after DHA supplementation in patients' subgroups in relation to controls.	85
7	Bar chart showing comparison between the mean values of FEF (25-75%) before and after DHA supplementations in patients' subgroups in relation to controls.	86
8	Bar chart showing comparison between the mean values of FEV1 before and after DHA supplementations in patients' subgroups in relation to controls.	87

Figure No.	Figure title	Page No.
9	Bar chart showing comparison between the mean values of FEV1 ratio before and after DHA supplementations in patients' subgroups in relation to controls.	88
10	Correlation between FVC and DHA serum level in cases before DHA supplementation	91
11	Correlation between FVC and DHA serum level in cases after DHA supplementation	92
12	Correlation between FEV1 and DHA serum level in cases before DHA supplementation	93
13	Correlation between FEV1 and DHA serum level in cases after DHA supplementation	94

Lists of abbreviation

ADHD	Attention Deficit Hyperactivity Disorder
ALA	Alpha Linoleic Acid
ARA	Arachidonic acid
BCG vaccine	Bacillus Calmette-Guerin vaccine
CAM	Complementary And Alternative Medicine
COPD	Chronic Obstructive Pulmonary Diseases
DHA	Docosahexaenoic Acid
EPA	Eicosapentaenoic Acid
FA	Fatty Acid
FA conc	Fatty Acid Concentration
FeCO	Fractionated expired carbon monoxide
FEF	Forced Expiratory Flow
FeNO	Fractionated expired nitric oxide
FEV1	Forced Expiratory Volume in 1 Second
FVC	Forced Vital Capacity
HDL	High density lipoprotein
HPLC	High Performance Liquid Chromatography
IBD	Inflammatory Bowel Disease
ICs	Inhaled Glucocortico steroid
IL-4	Interleukin-4
