Date of Examination

ACKNOWLEDGMENT

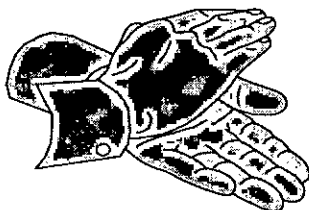

The author would like to thank Prof. Dr. Nazeer E. Milad Professor of Analytical Chemistry, Faculty of Science, Ain Shams University, and Prof. Dr. Monier M. Aly Nuclear Materials Authority (NMA) for supervising the present work and for their continuous encouragement.

The author is deeply indebted to Prof. Dr. Laila A. Guirguis for suggesting the problem, fruitful discussions all through the work and for revising the manuscript. I feel very grateful for her sincere guidance and critical suggestions.

I feel indebted to many colleagues in NMA particularly in analytical chemistry department and XRD lab for their kind help.

Special thanks are due to Prof. Dr. Ferial M. EL-Bedewy, head of the central laboratories, EGSMA, for the invaluable assistance in SEM studies.

I would finally direct my deep appreciation and obligation to my wife and my parents for their cordial sacrifices and encouragement.

List of Figures	IV
List of Tables	VI
Abstract	VIII
CHAPTER I	
1. Introduction	
1.1 Historical Review.....	1
1.1.1 Uranium recovery from phosphoric acid produced by hemidihydrate process.....	1
1.1.2 Effect of Preparatory History on Uranium Concentrates.....	5
1.1.2.1 Ammonium Uranate (AU).....	7
1.1.2.2 Ammonium Uranyl Carbonate (AUC).....	9
1.1.2.3 Uranium Peroxide (UO_4).....	14
1.1.2.4 Uranium Tetrafluoride (UF_4).....	17
1.1.2.5 Uranium Oxides (UO_3 and U_3O_8).....	22
1.2 Objects of the Present Work.....	27
CHAPTER II	
2. Recovery of Uranium during Hemidihydrate Phosphoric Acid Production	
2.1 Production of Phosphoric Acid by Wet Methods.....	28
2.2 Characteristics of Input Phosphate Ore.....	30
2.2.1 Sieve analysis.....	30
2.2.2 Chemical analysis.....	30
2.2.3 Mineralogical Composition of Input Ore.....	33
2.2.3.1 X-ray diffraction analysis.....	33
2.2.3.2 Infrared analysis of input ore.....	33
2.3 Hemidihydrate Phosphoric Acid Preparation and Uranium Distribution.....	39
2.3.1 The hemihydrate section.....	39
2.3.1.1 Feeding part.....	39
2.3.1.2 Reaction part.....	41
2.3.1.3 Filtration part.....	41
2.3.2 Dihydrate section.....	41
2.3.2.1 Feeding part.....	41
2.3.2.2 Hydration or transformation part.....	41
2.3.2.3 Filtration part.....	42
2.3.3 Acid consumption.....	42
2.3.4 Effect of grain size.....	42
2.3.5 Effect of defoamer.....	43

II

2.3.6 Effect of process water.....	43
2.3.7 Effect of return acid.....	43
2.3.8 Effect of solid/liquid ratio.....	44
2.3.9 Characteristics of HDH phosphoric acid product.....	44
2.4 Characteristics of Gypseous Product.....	46
2.5 Uranium Distribution of the Studied Hemidihydrate Phosphoric Acid Process.....	49
2.6 Uranium Recovery from the Washing Acid of the Hemidihydrate Process by Solvent Extraction.....	53
2.6.1 Washing phosphoric acid pre-treatment.....	53
2.6.2 Cooling and desaturation of the acid.....	53
2.6.3 Clay treatment.....	53
2.6.4 Adsorption through activated carbon.....	54
2.7 Extraction of Uranium from Phosphoric Acid.....	56
2.7.1 Extractant preparation.....	57
2.7.2 Experimental procedure.....	57
2.7.3 Factors influencing extraction from the wash acid.....	58
2.7.3.1 Oxidation state.....	58
2.7.3.2 Solvent Extraction.....	58
2.7.4 The Effect of TBP on the Extraction Coefficient of Uranium Capryl Pyrophosphoric Acid and Uranium-Amyl Pyro- Phosphoric Acid Extraction System.....	61
2.7.4.1 Stability of the solvent.....	63
2.7.4.2 Effect of temperature.....	63
2.7.4.3 Effect of mixing and settling time.....	63
2.7.4.4 Effect of aqueous to organic phase ratio on the extraction process.....	63
2.8 Uranium stripping and precipitation.....	66

Chapter III

3. Preparation and Characteristics of NuclearPure Uranium Concentrates and Conversion to Oxides

3.1 Uranium Concentrates.....	68
3.1.1 Uranium Precipitation as Ammonium Uranyl Carbonate (AUC).....	68
3.1.1.1 Identification Characterization and Purity of AUC.....	69
3.1.1.1.1 Complete Chemical Analysis.....	69
3.1.1.1.2 Scanning electron microscope (SEM).....	72
3.1.1.1.3 Tap density.....	74
3.1.1.1.4 X-Ray diffraction Pattern.....	74
3.1.1.1.5 Infrared Spectroscopy.....	74
3.1.2 Uranium Precipitation as Uranyl Peroxide.....	78
3.1.2.1 Experimental procedure.....	79

III

3.1.2.2 Effect of initial pH on uranium peroxide precipitation.....	79
3.1.2.3 Influence of reaction pH.....	80
3.1.2.4 Effect of temperature and time.....	80
3.1.2.5 Scanning electron microscope (SEM) study.....	81
3.1.2.6 Tap density.....	81
3.1.2.7 X-Ray diffraction analysis.....	83
3.1.2.8 Infrared spectroscopy for uranium peroxide sample.....	83
3.1.3 Uranium Precipitation as Ammonium Uranate(AU).....	85
3.1.3.1 Identification, characterization and purity of ammonium uranate (AU).....	85
3.1.3.1.1 Complete chemical analysis.....	85
3.1.3.1.2 Scanning electron microscope (SEM)	86
3.1.3.1.3 Tap density.....	86
3.1.3.1.4 X-Ray diffraction pattern.....	86
3.1.3.1.5 Infrared spectroscopy.....	88
3.1.4 Uranium precipitation as uranium tetrafluoride hydrate.....	90
3.1.4.1 Identification, characterization and purity of $UF_4 \cdot 3/4H_2O$	91
3.1.4.1.1. Complete Chemical Analysis.....	91
3.1.4.1.2 Scanning electron microscope.....	91
3.1.4.1.3 Tap density.....	91
3.1.4.1.4 X-Ray diffraction pattern.....	93
3.1.4.1.5 Infrared spectroscopy.....	94
3.2 Uranium Concentrate Conversion to Uranium Oxides U_3O_8 and UO_3	96
3.2.1 Preparation of U_3O_8 and $UO_3 \cdot 2H_2O$	96
3.2.2 Identification, characterization and purity of uranium Oxides.....	96
3.2.2.1 Chemical Analysis.....	96
3.2.2.2 Scanning electron microscope.....	97
3.2.2.3 Tap density.....	98
3.2.2.4 X-Ray diffraction pattern.....	98
3.2.2.5 Infrared spectroscopy.....	99
3.3 Proposed flow sheet.....	103
