***Studies on the Production of Biodiesel from Non-Edible Oils
Using Different Catalysts***

*Thesis Submitted for
Ph.D. Degree of Science in Chemistry*

By

*Abdelghffar Sayed Ahmed Soliman
(M. Sc. 2010)*

Egyptian Petroleum Research Institute

*To
Chemistry Department
Faculty of Science
Ain Shams University
Cairo, Egypt*

2015

**Faculty of Science
Chemistry Department**

***Studies on the Production of Biodiesel from Non-Edible Oils
Using Different Catalysts***

Thesis Submitted for Ph.D. Degree of Science in Chemistry

**By
Abdelghffar Sayed Ahmed Soliman
(M. Sc. 2010)**

**To
*Chemistry Department-Faculty of Science
Ain Shams University***

Supervised by

Prof. Dr. Ahmed Ismail Hashem
*Prof. of organic Chemistry,
Faculty of Science-Ain Shams University.*

Prof. Dr. Afaf Radwan Taman
*Prof. Researcher of Analytical Chemistry,
Egyptian Petroleum Research Institute*

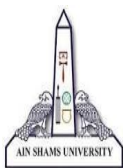

Prof. Dr. Seham Mohammed Elsabbagh
*Prof. Researcher of Organic Chemistry,
Egyptian Petroleum Research Institute*

Dr. Mohamad Abdelsalam Abbas
*Assis. Prof. Researcher of physical Chemistry
Egyptian Petroleum Research Institute*

Head of Chemistry Department

Prof. Dr. Hamed Ahmed Younes Derbala

2015

**Faculty of Science
Chemistry Department**

Approval Sheet

***Studies on the Production of Biodiesel from Non-Edible Oils
Using Different Catalysts***

By

***Abdelghffar Sayed Ahmed Soliman
(M. Sc. 2010)***

This Thesis for Ph.D. Degree has been Approved by:

Prof. Dr. Samira Taha Rabie

Prof. Researcher of Organic Chemistry, National Research Centre

Prof. Dr. Abdel Rahiem Ramadan Abd El-Ghany

Prof. of Organic Chemistry, Faculty of Applied Art, Helwan University

Prof. Dr. Ahmed Ismail Hashem

Prof. of Organic Chemistry, Faculty of Science, Ain Shams University

Prof. Dr. Afaf Radwan Taman

Prof. Researcher of Analytical Chemistry, Egyptian Petroleum Research Institute

ACKNOWLEDGMENT

ACKNOWLEDGMENT

Before all I should express my deep thanks to Allah, with his grace this work was accomplished.

I would like to express my deep thanks to Prof. Dr. Ahmed Ismail Hashem, (Professor of Organic Chemistry, Faculty of Science, Ain shams University) for his kind supervision, guidance, encouragement.

I am deeply grateful to Prof. Dr. Afaf Radwan Taman, Professor of chemistry, Egyptian Petroleum Research Institute for her supervision, fruitful discussion and valuable guiding. Many thanks for Prof. Dr. Seham Mohamed El-Sabagh, Professor of Chemistry, Egyptian Petroleum Research Institute for her help, supervision and support during the progress of this work, and Dr. Mohamed Abdelsalam (Assistant Prof. of Physical Chemistry, Egyptian Petroleum Research Institute) for giving me the honor of working under their supervision, suggesting the main idea, formulating the objectives, supplying the equipments and facilities required to accomplish the work and above all for their human understanding, unforgettable sincere encouragement.

I would like to express my thanks and gratitude to all staff members of the Egyptian Petroleum Research Institute for their notes and additions which made this work more valuable. I would

like to express my heart thanks and gratitude to all my friends for their help and moral support.

Finally, I really would like to thank those who helped me even by a word of support, those who really affected and still affecting my life everywhere.

Abdel-Ghfar Sayed Ahmed Soliman Dhmees

Abstract

Summary

1 INTRODUCTION	1
1.1 Economic Trends (Now and Future)	2
1.2 Non-edible vegetable oils resources	5
1.2.1 Egyptian Non-Edible Oil Resources	5
1.2.2 Advantages of Non-Edible Oils	8
1.3 Methods to Extract of Lipids	9
1.4 Methods of Modifying Oil to Biodiesel	12
1.4.1 Blending of Crude Oils	12
1.4.2 Micro-Emulsification	12
1.4.3 Pyrolysis	13
1.4.4 Transesterification	13
1.4.4.1 Biodiesel Production Process	14
1.4.4.2 Homogeneous Acid and Base Catalysis	18
1.4.4.3 Heterogeneous Catalytic Transesterification	20
1.4.4.3.1 Heterogeneous Base Catalysts	21
1.4.4.3.1.1 Blast Furnace Slag	23
1.4.4.3.2 Heterogeneous Acid Catalyst	25
1.4.4.3.2.1 Waste Carbon-Derived Solid Acids	28
1.4.4.4 Properties and Characteristics of Biodiesel	29
1.5 Oxidation Stability	35
1.5.1 Oxidation Reasons and Mechanism	35
1.5.2.1 Antioxidants	36
1.5.2.2.1 Basil as Source of Antioxidant	37
CHAPTER II Experimental	39
2.1 Introduction	39

2.2 Materials	39
2.3 Oil Extraction:	39
2.4.1 Synthesis of Acid Catalyst	41
2.4.2 Synthesis of Base catalysts	42
2.4.3 Catalysts characterization	44
2.5 Production of Biodiesel from Jatropha Oil	47
2.5.1 Pre- Esterification	47
2.5.2 Transesterification Reaction	48
2.5.2.1 Biodiesel characterization	49
2.6 Design of Experiments	49
2.7 Catalysts reusability and leaching tests	55
2.8 Physico-chemical Characterization	55
2.9 Natural Antioxidant extraction and evaluation	55
2.10 Oxidation stability	56
2.10.2 Rancimat method	57
2.1.3 Thermogravimetric analysis of biodiesel	58
CHAPTER III Results and Discussion	59
3.1 Extraction of Jatropha oil	59
3.2 Acid Catalyst characterization	60
3.3 Characterization of basic catalysts	66
3.4 Biodiesel production	78
3.4.1 Mathematical Modeling	78
3.4.2 Multi-Response Optimization based on composite Desirability	79
3.4.3 Parametric Influences and Analysis	81
3.4.5 Esterification	82
3.4.5.1 Experimental Design and Analysis of Variance (ANOVA) Sulfonated cake (Cake -SO ₃ H)	82
3.4.5.2 Experimental Design and Analysis of Variance (ANOVA) Sulfonated silica (Silica-SO ₃ H)	92

3.4.6 Transesterification	103
3.4.6.1 Experimental Design and Analysis of Variance (ANOVA) Slag I	103
3.4.6.2.1 Experimental Design and Analysis of Variance (ANOVA) SlagII	113
3.4.6.3.1 Experimental Design and Analysis of Variance (ANOVA) slag III.	124
3.5 Comparison between Slag- based catalysts	134
3.5.1 Lixiviation of catalyst	135
3.5.2 Catalysts reusability	136
3.6 Analysis of biodiesel	137
3.6.1 GC	137
3.6.2 FTIR for biodiesel	138
3.6.3 Proton nuclear magnetic resonance analysis	141
3.7 Physico-Chemical properties of jatropha and its biodiesel	145
3.7.1 Blending of petro-diesel fuel with biodiesel	146
3.8 Oxidation stability	148
3.8.1 The mechanism of auto oxidation	148
3.8.2 Effect of antioxidant	148
3.9 Thermogravimetric analyses	152
Conclusion	156
Future work	158
