*Ain Shams University
Faculty of Women for
Arts, Science and Education
Zoology Department*

Possible Therapeutic Role of Vitamin D plus Calcium and Some Hormones against Depression in Male Rat Model.

A thesis

Submitted in partial fulfillment of the Requirements for the
Degree of Ph.D. of Science in Zoology

By

Heba Abd El Raouf Mohamed Mousa

(B.Sc.,M.Sc.)Assistant Lecturer, Zoology Department, Faculty
of women Ain Shams University

Board of Scientific Supervision

Prof. Samiha M.Abd El Dayem

Prof.of Physiology,Zoology
Department Department- Faculty
Of women for Arts , Science and Education.
Ain Shams University.

Prof. Hanaa H. Ahmed

Head of Hormones
Medical Research Division
National Research Centre.

Dr. Fatma M. Aly Foda

Assist.Prof.of Physiology,
Zoology Depatement-Faculty of women
for Arts, Science and Education
Ain Shams University.

Dr.Abd El Razik H. Farrag

Assist. Prof. of Pathology,
Pathothology Department
Medical Research Division
National Research Centre.

Zoology Department-Faculty of women for Arts, Science and Education,
Ain Shams University.

(2014)

Arts, Science and Education
Zoology Department*

Approval sheet

Name : Heba Abd El Raouf Mohamed Mousa

Scientific Degree: Ph.D.(Physiology)

Title : Possible Therapeutic Role of Vitamin D plus Calcium and Some Hormones against Depression in Male Rat Model.

Board of scientific supervision

Prof. Samiha M.Abd El Dayem

Prof.of Physiology,Zoology
Department- Faculty of women
for Arts , Science and Education.
Ain Shams University.

Prof. Hanaa H. Ahmed

Head of Hormones Department
Medical Research Division
National Research Centre.

Dr. Fatma M. Aly Foda

Assist.Prof.of Physiology,
Zoology Depatement-Faculty of women
for Arts, Science and Education.
Ain Shams University.

Dr. Abd El Razik H. Farrag

Assist. Prof. of Pathology,
Pathothology Department
Medical Research Division
National Research Centre.

Qualification

Name : Heba Abd El Raouf Mohamed Mousa

Scientific Degree : ***M.Sc.(Physiology)***

Department : Zoology Department

Faculty : Faculty of women for Arts, Science
and Education.

University : Ain Shams University.

Graduation Year : 2009

جامعة عين شمس
كلية البنات للأدب و العلوم و التربية
قسم علم الحيوان

الدور العلاجي المحتمل لفيتامين د والكالسيوم وبعض الهرمونات ضد الإكتئاب المستحدث فى نموذج ذكور الجرذان

رسالة مقدمة توطئه للحصول على درجه دكتوراة الفلسفه فى العلوم (علم الحيوان)

من

هبة عبد الرؤوف محمد موسى
مدرس مساعد بكلية البنات للأدب و العلوم و التربية

لجنة الإشراف

أ.د/هناء حمدى احمد
أستاذ ورئيس قسم الهرمونات
شعبة البحوث الطبيه
المركز القومى للبحوث

أ.د/سميحه محمد عبد الدايم
أستاذ علم وظائف الأعضاء
قسم علم الحيوان- كلية البنات للأدب
والعلوم والتربية-جامعة عين شمس

أ.م.د/ عبد الرازق حسن فراج
أستاذ مساعد الباثولوجى
شعبة البحوث الطبيه
المركز القومى للبحوث

أ.م.د/ فاطمه مختار على فودة
أستاذ مساعد علم وظائف الأعضاء
قسم علم الحيوان- كلية البنات للأدب
والعلوم والتربية-جامعة عين شمس

قسم علم الحيوان – كلية البنات للأدب و العلوم و التربية
جامعة عين شمس

(2014)

جامعة عين شمس
كلية البنات للآداب و العلوم و التربية
قسم علم الحيوان

إسم الطالبة : هبة عبد الرؤوف محمد موسى

عنوان الرسالة : الدور العلاجي المحتمل لفيتامين د والكالسيوم وبعض الهرمونات ضد الإكتئاب المستحدث فى نموذج ذكور الجرذان.

الدرجة العلمية : دكتوراة الفلسفة فى العلوم (علم الحيوان)

لجنة الإشراف

أ.د/هناء حمدى احمد

أستاذ ورئيس قسم الهرمونات
شعبة البحوث الطبيه
المركز القومى للبحوث

أ.د/سميحه محمد عبد الدايم

أستاذ علم وظائف الأعضاء
قسم علم الحيوان- كلية البنات للآداب
والعلوم والتربيه- جامعة عين شمس

أ.م.د/ عبد الرازق حسن فراج

أستاذ مساعدالباثولوجى
شعبة البحوث الطبيه
المركز القومى للبحوث

أ.م.د/ فاطمه مختار على فودة

أستاذ مساعد علم وظائف الأعضاء
قسم علم الحيوان- كلية البنات للآداب
والعلوم والتربيه- جامعة عين شمس

تاريخ البحث :

الدراسات العليا :

ختم الأجازة:

تاريخ اجازة الرسالة:

موافقة مجلس الكلية:

موافقة مجلس الجامعة:

المؤهلات

الإسم : هبة عبد الرؤوف محمد موسى

الدرجة العلمية : ماجستير في العلوم (وظائف الأعضاء)

القسم : قسم علم الحيوان

الكلية : كلية البنات للآداب و العلوم و التربية

الجامعة : جامعة عين شمس

سنة التخرج : 2009

Acknowledgment

First and foremost, I fell always indebted to **Allah**, the most kind and the most merciful thanks to who made me able to accomplish this work.

I would like to express my thanks and most profound gratitude to *Dr. Samiha M. Abdel Dayem*, Prof. of physiology, Zoology Department-Fculty of women for Arts, Science and Education. Ain Shams University, for her encouragement, effort and sincere advice. To her I owe great deal for sincere guidance.

No wards could express my sincere appreciation and deepest gratitude to *Dr. Hanaa Hamdy Ahmed*, Prof. of Hormones, Hormones Department, Medical Research Division, National Research Centre, for suggesting the point of research and her step by step guidance and her help in practical part, I owe her more than I can express for all the time she spent in revising every detail, in spite of her busy schedule. Words can not find their way to express my thanks to her expertise supervision and her encouragement and without her guide this work might not come to light.

I would like to express my thanks and most profound gratitude to *Dr. Fatma M. Ali Foda*, Assist. Prof. of physiology, Zoology Department-Fculty of women for Arts, Science and Education. Ain Shams University for her gently valuable advice and assistance, her continuous encouragement, her extremely kind supervision and critical revision of the thesis.

I am grateful to *Dr. Abd El Razik Hussien Farrag*, Assist. Prof. of Pathology, Pathology Department, Medical Research Division, National Research Centre, for his great help in histological examination.

I want to express my deep love and gratitude to my family especially my father, my mother and my brothers for their support until this thesis came to light.

Heba Abd El Raouf Mohamed

Dedication

*To my father and to
my mother may god
bless them both and
to my brothers*

شكر وتقدير

الحمد لله الذى هدانا لهذا وما كنا لنهتدى لولا ان هدانا الله .
اتقدم بخالص الشكر والتقدير الى اساتذتى الذين قاموا بالأشراف على هذه الرسالة وهم :

أ.د/ سميحه محمد عبد الدايم أستاذ علم وظائف الأعضاء – قسم علم الحيوان-
كلية البنات للأداب والعلوم والتربية – جامعه عين شمس.

أ.د / هناء حمدي احمد أستاذ ورئيس قسم الهرمونات- شعبه البحوث الطبيه-
المركز القومى للبحوث.

أ.م.د / فاطمه مختار على فودة أستاذ مساعد علم وظائف الأعضاء- قسم علم
الحيوان- كلية البنات للأداب والعلوم والتربية – جامعه عين شمس.

أ.م.د / عبد الرازق حسن فراج أستاذ مساعد الباثولوجى- شعبه البحوث الطبيه-
المركز القومى للبحوث.

كما اتقدم بخالص الشكر والأعزاز لزميلاتى بالقسم على الأهتمام والمساعدة.
واتقدم بالشكر الجزيل لكل العاملين بقسم علم الحيوان- كلية البنات- جامعه عين
شمس على مساعدتهم لى طوال مدة البحث.

واتقدم بشكر خاص لزميلاتى وجميع العاملين بقسم الهرمونات- شعبه البحوث
الطبيه- المركز القومى للبحوث على معاونتهم ومساعدتهم لى طوال فترة
البحث.

واخيرا وليس بأخرا اتقدم بكل الحب والعرفان لأسرتى التى لطالما احاطتنى
بالرعايه والحب والتشجيع.

List of contents

Introduction.....	1
Aim of the work.....	5
Review and Literature.....	6
1- Depression.....	6
A- What is depression?	6
B- Types of Depression.....	6
C- Causes of Depression	7
2- Reserpine.....	8
3- Forced Swimming Test (FST).....	9
4- Neurotransmitter and depression.....	10
5- HPA axis and Depression (Corticosterone & ACTH).....	15
6- Inflammation and depression.....	18
7- Growth factors and depression.....	23
8- Apoptosis and depression.....	26
A- B-cell lymphoma-2(Bcl-2).....	27
B- Survivin.....	29
9- Therapy for depression.....	29
A-Therapy for depression by melatonin.....	29
B- Therapy for depression by DHEA.....	37
C- Therapy for depression by Vitamin D and Ca.....	42
Materials and Methods.....	49
1-Materials.....	49
A-Chemicals and drugs.....	49
B-Experimental Animals	50
2-Methods.....	50
A-Experimental Design.....	50
Forced Swimming Test.....	52
B-Biochemical Analyses.....	53
i-determination of serotonin (5-HT) concentration.....	53
ii-Quantative determination of brain dopamine.....	56
iii-Determination of Adrenocorticotropin releasing hormone (ACTH).....	59

iv-Determination of corticosterone concentration.....	62
v-Estimation of interleukin-1 β (IL-1 β).....	64
vi-Estimation of interleukin-6(IL-6)	68
vii-Determination of tumor necrosis factor- α (TNF- α).....	71
viii-Determination of brain derived neurotrophic factor (BDNF).....	74
ix-Estimation of B-cell lymphoma 2 (Bcl-2).....	77
x-Quantitative determination of brain total protein.....	80
C- Immunohistochemical study.....	81
D- Histopathological examination.....	82
Statistical analyses.....	83
 Results.....	 84
Discussion.....	124
Summary and conclusion.....	163
Bibliography.....	167

List of Tables

Table (1): Effect of treatment with different hormones on the immobility time (seconds) of the reserpinized rats in the forced swimming test.....**88**

Table (2): Effect of treatment with different hormones on brain neurotransmitters (serotonin and dopamine) contents of the reserpinized rats.....**92**

Table (3): Effect of treatment with different hormones on serum ACTH and corticosterone levels of the reserpinized rats.....**97**

Table (4): Effect of treatment with different hormones on brain proinflammatory cytokines of the reserpinized rats.....**103**

Table (5): Effect of treatment with different hormones on brain neurotrophic factor (BDNF) and antiapoptotic mediator (Bcl-2) of the reserpinized rats.....**108**

List of Figures

Fig. (1): Effect of treatment with different hormones on the immobility time (seconds) of the reserpinized rats in the forced swimming test.....89

Fig. (2): Effect of treatment with different hormones on brain neurotransmitters (serotonin and dopamine) contents of the reserpinized rats.....93

Fig. (3): Effect of treatment with different hormones on serum ACTH and corticosterone levels of the reserpinized rats.....98

Fig. (4): Effect of treatment with different hormones on brain proinflammatory cytokines of the reserpinized rats.....104

Fig. (5): Effect of treatment with different hormones on brain neurotrophic factor (BDNF) and antiapoptotic mediator (Bcl-2) of the reserpinized rats.....109

Fig.(6):Photomicrograph for immuno-histochemical staining of brain tissue of rats in the negative control group using antibody against survivin showed weak reaction.....111

Fig.(7):Photomicrograph for immuno-histochemical staining of brain tissue of rats in the reserpinized group after 75days (positive control) using antibody against survivin showed weak reaction.....111

Fig.(8): Photomicrograph for immuno-histochemical staining of brain tissue of rats in the reserpinized group treated with low dose of melatonin using antibody against survivin showed weak positive reaction.....111

Fig.(9): Photomicrograph for immuno-histochemical staining of brain tissue of rats in the reserpinized group treated with high dose of melatonin using antibody against survivin showed weak positive reaction.....111

Fig.(10): Photomicrograph for immuno-histochemical staining of brain tissue of rats in the reserpinized group treated with low dose of

DHEA using antibody against survivin showed moderate positive reaction.....112

Fig.(11): Photomicrograph for immuno-histochemical staining of brain tissue of rats in the reserpinized group treated with high dose of DHEA using antibody against survivin showed moderate positive reaction.....112

Fig.(12): Photomicrograph for immuno-histochemical staining of brain tissue of rats in the reserpinized group treated with low dose of vitamin D and Ca using antibody against survivin showed mild positive reaction.....112

Fig.(13): Photomicrograph for immuno-histochemical staining of brain tissue of rats in the reserpinized group treated with high dose of vitamin D and Ca using antibody against survivin showed mild positive reaction.....112

Fig. (14): Micrograph of brain tissue section of control rat showing the highly active nerve cells (neurons) that having huge nuclei with relatively pale stain. The nuclear chromatin and prominent nucleoli are disappeared.The surrounding supporting cells (glial cells) have small nuclei with dense stain, and the condensed chromatin with no visible nucleoli.The background substances (neuropil) are shown in the cortex (H & E, Scale bar 20 μ m).....115

Fig. (15): Micrograph of brain tissue section of control rat showing the normal structure of hippocampus. The hippocampal neurons (Neurons) and vessels exhibited a regular arrangement with distinct edges (arrowhead), and clear nuclei and nucleolui (arrow). Glial cells and neuropil are appeared. No necrosis of pyramidal neurons is found (blue arrow)(H & E, Scale bar 20 μ m).....116

Fig. (16): Micrograph of brain tissue section from rat administered reserpine for 75 days showing neuronal damage (red arrow), and shrinkage (blue arrow). The basophilic neurons show core pyknosis (arrowhead) (H & E X 400, Scale bar 20 μ m).....116

Fig. (17): Micrograph of brain tissue section of rat in the reserpinized group after 75 days showing dark neurons of the hippocampus (arrows) and significant necrosis of pyramidal neurons (arrowhead) (H & E, Scale bar 20 μ m).....117
