

# **Biological control of the fungus *Drechslera* in rice and genetic engineering for host resistance gene**

## **Thesis**

**Submitted in partial fulfillment of the requirements for Master  
Degree in Microbiology  
(Microbiology)**

**BY**

**Shimaa Ahmed Gouda**

(B.Sc. Microbiology, 2012)

## **Supervisors**

**Dr. Khyreia Abd El-Ghany Youssef**

Professor of Microbiology, Microbiology  
Department, Faculty of Science,  
Ain Shams University.

**Dr. Naziha Mohamed Hassanein**

Professor of Mycology and Plant pathology,  
Microbiology Department, Faculty of  
Science, Ain Shams University.

**Dr. Tahsin Mansour Shoala**

Lecturer of Molecular Biology, Environmental Biotechnology Department,  
Faculty of Biotechnology, Misr University for Science and Technology.

**Department of Microbiology  
Faculty of Science  
Ain Shams University  
(2017)**

## Approval sheet

### **Biological control of the fungus *Drechslera* in rice and genetic engineering for host resistance gene**

**BY**

**Shimaa Ahmed Gouda**

B.Sc. Microbiology, Faculty of Science,  
Ain Shams University, 2012

#### **Supervisors**

**Dr. Khyreia Abd El-Ghany Youssef**

Professor of Microbiology, Microbiology Department,  
Faculty of Science, Ain Shams University.

**Dr. Naziha Mohamed Hassanein**

Professor of Mycology and Plant pathology, Microbiology  
Department, Faculty of Science, Ain Shams University.

**Dr. Tahsin Mansour Shoala**

Lecturer of Molecular Biology, Environmental Biotechnology  
Department, Faculty of Biotechnology, Misr University for  
Science and Technology.

#### **Examination committee**

**Dr. Lobna Abdel Aziz Moussa**

Professor of Microbiology, Microbiology Department,  
Agricultural Research Center

**Dr. Eman Mohamed Fawzy**

Professor of Microbiology, Biology Department,  
Faculty of Education, Ain Shams University

**Dr. Khyreia Abd El-Ghany Youssef**

Professor of Microbiology, Microbiology Department,  
Faculty of Science, Ain Shams University

**Dr. Naziha Mohamed Hassanein**

Professor of Mycology and Plant pathology, Microbiology  
Department, Faculty of Science, Ain Shams University

**Date of examination    /    /                      Approval date    /    /**

**University council approved    /    /**

## **ACKNOWLEDGEMENT**

*First and foremost, I feel always indebted to Allah,  
the most beneficent and merciful. I can do nothing  
without Him*

*I would like to express my deep gratitude and thanks to my dear supervisor Dr. **Naziha Mohamed Hassanein**, Professor of Mycology and Plant pathology, Department of Microbiology, Ain shams university, for her help, encouragement, continuous advice and her expert supervision to bring this thesis to more than satisfactory finish. She always patient, perfect in work organization and the best advisor. I am proud to be one of her students and I hope that she is satisfied with me.*

*A great thanks to Dr. **Khairia Abd El-Ghany Youssef**, professor of Microbiology, Department of Microbiology, Faculty of Science, Ain shams university for her supervision, support, encouragement, valuable advices and constant help.*

*A great thanks to Dr. **Tahsin Mansour Shoala**, Lecturer of Molecular Biology, Environmental Biotechnology Department, Faculty of Biotechnology, Misr University for Science and Technology for his supervision, support, encouragement, valuable advices and constant help.*

*Very special thanks to Dr. **Salah felefel**, head of fungicides research, plant pathology institute, Agriculture research center for his support, encouragement during my study.*

*A deep thank to **Microbiology Department** and all **my Colleagues** in microbiology department for their assistance, support and for providing a suitable environment during my work.*

# *Dedication*

*This thesis is dedicated with love to my family:*

*Father, mother, my husband yasser and my sister for their tired for me, continuous support, encouragement from the start of study*

Abstract	
<b>Chapter I: Introduction.....</b>	<b>1</b>
<b>Chapter II: Review of literature</b>	
1. Rice.....	7
1.1. Taxonomy of rice plant.....	7
1.2. Description of rice plant.....	8
1.3. Economic and medical importance of rice plant.....	9
1.4. Rice in Egypt.....	10
1.4.1. Varieties of Egyptian rice.....	11
1.4.2. Cultivation of Egyptian rice.....	12
2. Major diseases of rice.....	14
2.1. Major fungal diseases of rice .....	17
2.1.1. Rice blast disease.....	17
2.1.2. Brown leaf spot disease.....	18
2.2. Major bacterial diseases of rice.....	22
2.3. Major viral diseases of rice.....	23
3. Control (management) of rice diseases.....	24
3.1. Regulatory control.....	24
3.2. Cultural control.....	26
3.2.1. Pre-planting cp control measures.....	26

3.2.1.1. Crop rotation.....	26
3.2.1.2. Deep plowing .....	27
3.2.1.3. Flooding.....	27
3.2.1.4. Fire and flaming.....	27
3.2.1.5. Sanitation.....	28
3.2.2. Pre- and post-planting cp control measures.....	28
3.3. Chemical control.....	29
3.3.1. Seed treatment.....	29
3.3.1.1. Seed disinfestations.....	29
3.3.1.2. Seed protection.....	30
3.3.2. Soil fumigation.....	30
3.3.3. Nematicide application.....	30
3.3.4. Fungicide and bactericide sprays.....	31
3.4. Biological control.....	32
3.4.1. Mechanisms of biological control.....	33
3.4.3.1. Direct antagonism.....	34
3.4.3.2. Indirect antagonism.....	37
4. Molecular studies on resistant genes of rice plants.....	39
4.1. Mechanism disease resistant genes on plant.....	39
4.1.1. Pathogenesis-related (PR) proteins.....	39
4.1.2. Antifungal proteins.....	41
4.2. Role of salicylic acid and hydrogen peroxide on gene expression.....	42
4.2.1. Salicylic acid (SA).....	42
4.2.2. Hydrogen peroxide (H <sub>2</sub> O <sub>2</sub> ).....	42
4.3. $\beta$ -1,3- glucanase genes.....	44

4.4. Plant biotechnology and fungal disease management.....	47
4.5. Quantitative real-time PCR.....	48
<b>Chapter III: Materials and Methods</b>	
1. Sample collection.....	50
1.1. Rice rhizosphere fungi.....	50
1.2. Diseased rice plant parts .....	50
2. Isolation and identification of rice rhizosphere fungi .....	50
2.1. Isolation of rice rhizosphere fungi.....	50
2.2. Identification of rice rhizosphere fungi.....	51
2.2.1. Identification of rice rhizosphere filamentous fungi.....	51
2.2.2. Identification of rice rhizosphere yeasts.....	51
3. Isolation and identification of rice pathogens .....	55
3.1. Isolation of rice pathogens.....	55
3.2. Identification of rice leaves and grains pathogens .....	56
4. <i>In vitro</i> antagonistic activity of rhizosphere fungi against rice plant pathogens .....	57
5. Green house study and pathogenicity test.....	58
5.1. Steralization of rice seeds .....	58
5.2. Preparation of seeds and pot treatments.....	58
5.3. Preparation of salicylic acid and hydrogen peroxide required for treatment.....	58
5.4. Preparation of pathogen and antagonist inoculum for cultivation.....	59
5.5. Treatment of plant with salicylic acid, hydrogen peroxide, pathogen and antagonist.....	59
5.6. Disease assessment, data collection and analysis.....	61

5.6.1. Disease incidence rating .....	61
5.6.2. Scoring of disease severity.....	61
5.6.3. Measurement chlorophyll content.....	63
5.6.4. Isolation and identification of <i>Drechslera spicifera</i> from infested rice plants.....	63
6. Molecular studies.....	63
6.1. RNA extraction.....	63
6.2. Determination of RNA yield and purity.....	64
6.3. Primer design.....	64
6.4. Quantitative real time PCR (QRT-PCR).....	65
6.5. QRT-PCR calculations.....	69
7. Media used for isolation and identification of rice rhizosphere fungi and rice pathogens.....	70
7.1. Media for isolation rice rhizosphere fungi.....	70
7.2. Media for identification rice rhizosphere fungi.....	71
7.2.1. Media used for the genus <i>Aspergillus</i> .....	71
7.2.2. Media used for the genus <i>Penicillium</i> .....	71
7.2.3. Media used for dematiaceous hyphomycetes.....	72
7.2.4. Media used for hyphomycetes.....	72
7.2.5. Media used for the genus <i>Fusarium</i> .....	72
7.3. Media used for isolation and identification of rice disease pathogen.....	72
8. Statistical analysis.....	73
<b>Chapter IV: Results</b>	
1. Isolation and identification of rice rhizosphere fungi .....	74
2. Isolation and identification of rice leaves and grains pathogens.....	84

3. <i>In vitro</i> antagonistic activity of the fungal isolates against brown leaf spot pathogens of rice .....	94
4. Green house study and pathogenicity tests.....	106
4.1. Effect of salicylic acid and hydrogen peroxide treatment on plant .....	106
4.2. Pathogenicity of <i>Drechslera spicifera</i> with different treatment on brown spot of rice plant.....	110
5. Molecular studies.....	123
5.1. Relative expression of $\beta$ -1,3-glucanase 1 ( <i>Gns1</i> ) in Shakha101 rice cultivar treated with hydrogen peroxide (H <sub>2</sub> O <sub>2</sub> ), salicylic acid (SA) in response to pathogenic fungus <i>Drechslera spicifera</i> (D) and antagonistic <i>Penicillium decumbens</i> (P) after 48 hours.....	123
5.2. Relative expression of $\beta$ -1,3-glucanase 1 ( <i>Gns1</i> ) in Shakha101 rice cultivar treated with hydrogen peroxide (H <sub>2</sub> O <sub>2</sub> ), salicylic acid (SA) in response to pathogenic fungus <i>Drechslera spicifera</i> (D) and antagonistic <i>Penicillium decumbens</i> (P) after 72 hours.....	125
5.3. Relative expression of $\beta$ -1,3-glucanase 5 ( <i>Gns5</i> ) Shakha101 rice cultivar treated with hydrogen peroxide (H <sub>2</sub> O <sub>2</sub> ), salicylic acid (SA) in response to pathogenic fungus <i>Drechslera spicifera</i> (D) and antagonistic <i>Penicillium decumbens</i> (P) after 48 hours.....	132
5.4. Relative expression of $\beta$ -1,3-glucanase 5 ( <i>Gns5</i> ) Shakha101 rice cultivar treated with hydrogen peroxide (H <sub>2</sub> O <sub>2</sub> ), salicylic acid (SA) in response to pathogenic fungus <i>Drechslera spicifera</i> (D)
