AIN SHAMS UNIVERSITY
FACULTY OF ENGINEERING
Electronics and Communication Engineering Department

Performance Analysis of OFDM Techniques used in Fourth Generation Mobile Communication Systems

A Thesis

Submitted in Partial Fulfillment of the Requirements
For the Degree of Doctor of Philosophy in Electrical Engineering
(Electronics and Communication Engineering)

Submitted By

Eng:Reem Hamed Abd El-Maqsoud Abd El-Hadi

Supervised By

Prof. Dr. Salwa Hussein El-Ramly
Associate Prof. Dr. Hesham Mohammed El-Badawy

Cairo – Egypt
October 2009

ACKNOWLEDGMENT

I would like to present my deepest gratitude to Professor Dr. **Salwa Hussein El-Ramly** for her precious help, valuable guidance and continuous support. Professor Dr. Salwa inspired me a sense of enthusiasm, optimism and motivation and she provided me with a lot of her wide knowledge and experience. Professor Dr. Salwa gave me much of her valuable time whenever I asked and she kept encouraging me to work harder. I am very lucky to have Professor Dr. Salwa as my Ph.D. supervisor. No words can express my appreciation to her. I will always be very grateful to her for my whole life.

I would like to express my heartfelt thanks to Dr. **Hesham Mohammed El-Badawy** for his inspiration, valuable guidance and his great efforts in supervising my Ph.D. thesis. Throughout my research period, he provided me with lots of valuable ideas and many stimulating suggestions. I will always appreciate his encouragement and support in our discussions. Really, I would like to thank Dr. Hesham for his guidance and support for me in my Ph.D and also as supervisor in my work.

I would like to express my great thanks to the name of Professor Dr. **Bahnasy Mohamed Nossier,** my x-supervisor for his great effort in guiding me in my Ph.D and in my work. It is actually a great opportunity to learn from his wide experience.

Finally, let me thank my family especially my husband, who gave me help and support along the way. And also I would like to thank my friends and my colleagues in my work for their help.

Table of Contents

List of figures..... **ix**

List of tables..... **xv**

List of abbreviations..... **xvi**

List of symbols..... **xx**

Chapter 1 : **INTRODUCTION**..... **1**

1.1 Introduction 1

1.2 Thesis Contributions..... 3

1.3 Thesis Organization..... 4

1.4 Conclusion..... 4

Chapter 2 : WIRELESS CHANNELS..... **5**

2.1 Introduction..... 5

2.2 Radio Communication Channels..... 6

2.2.1. Free-space propagation model..... 6

2.2.1.1 Reflection, Diffraction, and Scattering..... 7

2.2.2. Fading Channel Models..... 9

2.2.2.1 Rayleigh fading..... 12

2.2.2.2 Rician fading..... 12

2.2.2.3 Nakagami-*m* fading..... 13

2.2.3 Flat fading..... 14

2.2.4 Frequency-selective fading..... 15

2.3 Transmission Impairments..... 17
2.3.1 Attenuation..... 18
2.3.2 Delay Distortion..... 18
2.3.3 Noise..... 18
2.3.3.1 Thermal Noise..... 19
2.3.3.2 Cross Talk..... 19
2.3.3.3 Impulse Noise..... 19
2.3.3 Intermodulation..... 19
2.3.4 Inter Symbol Interference (ISI)..... 19
2.3.5 Doppler Shift..... 20
2.4 Conclusion..... 20
Chapter 3 : **OFDM IN WIMAX NETWORKS..... 21**
3.1. Introduction..... 21
3.2. Principles of OFDM..... 22
3.2.1. Signal characteristics..... 23
3.2.2. OFDM with a cyclic prefix..... 26
3.2.3. Channel noise and Doppler spread..... 28
3.3. OFDM Advantages and Disadvantages..... 29
3.3.1. OFDM Advantages..... 29
3.3.2. OFDM Disadvantages..... 30
3.4. OFDM Applications..... 30
3.5. OFDMA Technologies..... 31
3.5.1. Packet-switched air interface..... 32

3.5.2. OFDMA Physical layer advantages..... 32

3.5.3. MAC and link layer advantages..... 33

3.6. OFDM in 4G Mobile Communication (Mobile WiMAX)..... 34

3.6.1. IEEE 802.16..... 35

3.6.1.1. THE IEEE 802.16 ARCHITECTURE..... 35

3.6.1.2. IEEE 802.16 STANDARDS..... 35

3.6.2. Mobile WiMAX Networks..... 39

3.6.2.1. Salient Features of WiMAX..... 42

3.6.2.2. Medium Access Control (MAC)..... 45

3.6.2.2.1. The Service Specific Convergence Sublayer (SSCS).. 47

3.6.2.2.2. MAC Common Part Sublayer MAC (CPS)..... 47

3.6.2.2.3. Privacy Sublayer..... 47

3.6.2.3. Physical layer..... 48

3.6.2.3.1. Channel Coding..... 50

3.6.2.3.2. Symbol mapping..... 54

3.7 Conclusion..... 54

Chapter 4 : INTERCARRIER INTERFERENCE AND CHANNEL ESTIMATION IN OFDM..... 55

4.1 Introduction..... 55

4.2 OFDM Sensitivity..... 56

4.2.1 Frequency offset..... 56

4.2.2 Time-varying channel..... 60

4.2.3 Phase noise..... 61

4.2.4 Receiver timing errors..... 61

4.2.5 Peak-to-average power ratio..... 63

4.3 Synchronization and System Architecture..... 64

4.3.1 Timing and Frame Synchronization..... 65

4.4 Channel Estimation in OFDM..... 66

4.4.1 Block-Type Pilot Channel Estimation..... 69

4.4.1.1 LS Estimator..... 69

4.4.1.2 LS Estimator..... 69

4.4.1.3 Modified MMSE Estimator..... 71

4.4.1.4 Estimation with Decision Feedback..... 73

4.4.2 Comb-Type Pilot Channel Estimation..... 74

4.4.2.1 LS Estimator with 1D Interpolation..... 74

4.4.2.1.1 Linear Interpolation (LI)..... 75

4.4.2.1.2 Second-Order Interpolation (SOI)..... 75

4.4.2.1.3 Low-Pass Interpolation (LPI)..... 75

4.4.2.1.4 Spline Cubic Interpolation (SCI)..... 75

4.4.2.1.5 Time Domain Interpolation (TDI)..... 75

4.4.3 ML Estimator..... 76

4.4.4 Computational complexity..... 77

4.5 Inter Carrier Interference In OFDM..... 78

4.5.1 ICI Reduction methods..... 78

4.5.1.1 Frequency-domain equalization..... 78

4.5.1.2 Q-Tap Equalizer..... 80

4.5.1.3 Time-domain windowing..... 81

4.5.1.4 Partial transmits sequences & selected mapping..... 83

4.5.1.4.1 Partial transmit sequences..... 83

4.5.1.4.2 Selected mapping..... 83

4.5.1.5 Self-cancellation scheme..... 84

4.5.1.6 Maximum Likelihood Estimate (MLE) Scheme..... 85

4.5.1.7 Extended Kalman Filtering EKF Scheme..... 86

4.5.1.8 ICI cancellation using auto-regressive modelling..... 86

4.5.1.9 Tone Reservation..... 87

4.6 Conclusion..... 92

Chapter 5 : PERFORMANCE ASSESSMENT FOR MOBILE WIMAX NETWORKS..... 93

5.1 Introduction..... 93

5.2 System Model..... 93

5.2.1 The Transmitter..... 94

5.2.2 Channel Model..... 95

5.2.3 The Receiver..... 96

5.2.4 Channel Estimation Criteria..... 98

5.3 Bit Error Rate for BPSK..... 101

5.4 Bit Error Rate for QPSK..... 105

5.5 Bit Error Rate for 16 QAM..... 108

5.6 Bit Error Rate for 64 QAM..... 113

5.7 Numerical Results..... 121

5.7.1 System Validation..... 121

5.7.2 BER Analytical Results..... 123

5.8 Conclusion..... 137

Chapter 6 : PERFORMANCE OF ADAPTIVE MODULATION IN MOBILE WIMAX NETWORKS..... 138

6.1 Introduction..... 138

6.2 Modulation Adaptation Enhancement 138

6.2.1 Mobile WiMAX for N=256..... 138

6.2.1.1 Uplink Physical Layer..... 139

6.2.1.2 Downlink Physical Layer..... 147

6.2.2 Mobile WiMAX for N=1024..... 153

6.2.2.1 Uplink Physical Layer..... 153

6.2.2.2 Downlink Physical Layer..... 163

6.3 Conclusion..... 162

Chapter 7 : CONCLUSION AND FUTURE DIRECTIONS..... 163

7.1 Conclusion..... 163

7.2 Future Directions..... 165

Publications Extracted from the Thesis..... 170

References..... 171
