ASSESSMENT OF NUTRITIONAL STATUS FOR ADULT CANCER PATIENTS

By

MOHAMED ABD EL RAHMAN SALIH

B.Sc. (Nutrition and Food Science)

Faculty of Home Economics

Helwan University

1993

THESIS

Submitted to Nutrition and Food Science Department in Partial Fulfillment of the Requirement for the Master of Science Degree in Nutrition and Food Science

Department of Nutrition and Food Science

Faculty of Home Economics

Menoufia University

1999

UNDER THE SUPERVISION OF

Dr. **Mona Abd El Kader**: Mona Abdel-Kader

Professor and Head of Nutrition and Food Science Department.

Faculty of Home Economics, Helwan University.

Dr. **Hussein Mostafa Khaled**: H.M. Khaled

Professor of Medical Oncology.

National Cancer Institute, Cairo University.

APPROVAL SHEET

TITLE OF THESIS:

Assessment of nutritional status for adult cancer patients.

DEGREE:

Master degree of nutrition and food science.

NAME OF STUDENT:

Mohamed Abd El Rahman Saleh

This thesis for the master degree has been approved by the following committee:

Dr. Nona Abdel-Kader

Dr. M.M. El Sayed

Dr. Reda Yunis

Date 25/ 8/ 1999

ACKNOWLEDGMENT

At first I would like to give my thanks to God who helped me to accomplish this work. I would like to express my greatest thanks, appreciation and gratitude to Dr. Mona Abd El Kader for her supervision, valuable help, guidance and continuous encouragement.

My great thanks and gratitude is also offered to Dr. Hussein Khaled for his highly supervision, costly guidance, and facilities he offered to me in his department of National Cancer Institute. My deepest thanks are also given to the staff of physicians and nurses for their sincere help.

I would like to express sincere appreciation and acknowledgment with thanks to Dr. Amal Aiad Sarhan "Lecturer of Public Health (Nutrition) in Nutrition Institute" for her willing cooperation, sincere help, guidance, continuous encouragement and assistance throughout this work.

I would like to thank the stuff of Electricity Hospital included physician, nurses, laboratory technician and staff of Nutrition Department for their valuable help and encouragement, I would like also to thank my family for continuous encouragement and help, especially my parents.

Table of contents

	Page
Introduction	1
Aim of the study	3
Review of literature	4
* Nutrition factors and cancer	4
* Nitrates, nitrites and nitrosamines	12
* Artificial sweeteners	13
* Other additives	14
* Method of food preparation	14
* Definition of cancer	15
* Classification of cancer	15
* Type of malignancy	18
Material and methods	36
*Subjects	36
*Patients	36
*Sample size and experimental design	36
1- 24-hours dietary recall	37
2- Food pattern	37
3- Food evaluation (good, bad)	37
4- Evaluation of hospital diet	37
5- Socioeconomic status	38
6- Anthropometric measurements	38
7- Blood chemistry	39
8- The questionnaires	39
Results and discussion	40
*Social status	43
*Economical status	44
*Anthropometric measurements	45
*Blood analysis	62
*Medical sheet	67
*Acceptability of hospital diet	70
*Analysis of dietary intake	72
Recommendations	81
Summary	83

	Page
References	88
Appendices	100
Arabic summary	١

LIST OF TABLES

Table		Page
1	Sample size and experimental design	36
2	Distribution of the patients studied according to their personal characteristics	41
3	Distribution of patients according to their age and sex	42
4	Relationship between type of malignancy and social status of patients	46
5	Relationship between type of malignancy and economical status of patients	47
6	Percent distribution of different cancer patients among weight categories according to percent of standard weight	49
7	Mean triceps skin fold and percent of reference standard	52
8	Mean triceps skin fold of different groups compared to different weight categories	55
9	Mean arm circumference and percent of reference standard	56
10	Mean arm circumference of different groups compared to different weight categories	58
11	Mean arm muscle circumference and percent of reference standard	59
12	Mean arm muscle circumference of different groups compared to different weight	61

Table **LIST OF TABLES (CONTINUED)** Page

	Categories	
13	Distribution of patients according to their blood analysis	63
14	Distribution of patients according to symptoms of different type of malignancy	68
15	Distribution of in-patients according to their opinion about the hospital diets	71
16	Mean energy and nutrients intake as a percent of RDA for different type of malignancy patients	73
17	24 hours recall	103
18	Diet history	104
19	Frequency of food groups consumed by patients according to type of malignancy	109

LIST OF FIGURES

Figure		Page
1	Mean triceps skin fold and percent of reference standard	53
2	Mean arm circumference and percent of reference standard	57
3	Mean arm muscle circumference and percent of reference standard	60
4	Distribution of patients according to their blood analysis	64, 65, 66
5	Mean energy and nutrients intake as a percent of RDA for different type of malignancy patients	74, 75, 76

LIST OF ABBREVIATIONS

ABS	Absolute
AC	Mid-upper arm circumference
AIAS	Aminoimidazoazarenes
AMC	Mid-upper arm muscle circumference
BHT	Butylated hydrexytoluene
CM	Centimeter
DNA	Deoxyribo nucleic acid
EBV	Epstein-barr virus
EFNEP	Expanded food and nutrition education program
F	Female
FR	Food restriction
GR.	Gram
HB	Hemoglobin
HRT	Hormonal replacement treatment
KCAL	Kilo calories
KG	Kilo gram
LMPH	Lymphocyte
