ADVISORS COMMITTEE

Prof. Dr. Z. A. El-Haddad

Professor of Agriculture Engineering

Faculty of Agriculture, Moshtohor

Zagazig University (Benha Branch).

Prof. Dr. M. Y. El-Ansary

Professor of Agricultural Engineering

Faculty of Agriculture, Moshtohor

Zagazig University (Benha Branch).

APPROVAL SHEET

IMPROVING SURFACE IRRIGATION DESIGN AND MANAGEMENT

By

Mohamed Said Abd Alla Hassan El-Marazky

This

Thesis for Ph.D. degree has been approved by:

Prof. Dr. Abd El-Ghany Mohamed El-Gindy

*Prof. of Agric. Eng. – Dean of Faculty of Agric. – Ain
Shams Univ.*

Prof. Dr. Mahmoud Abd El-Aziz Hassan

Prof. of Agric. Eng. – Zagazig Univ.

Prof. Dr. Zakaria Abd El-Rahman El-Haddad

*Prof. of Agric. Eng. – Faculty of Agric.- Moshtohor –
Benha Branch-Zagazig Univ.*

Prof. Dr. Mohamed Youssef El-Ansary

*Prof. of Agric. Eng. – Faculty of Agric.- Moshtohor –
Benha Branch-Zagazig Univ.*

Committee in Charge

Date: 5/6/ 2005

ACKNOWLEDGEMENTS

I would like to express my deepest appreciation to the principle supervisor **Prof. Dr. Z.A. EL Haddad**, Professor of Agricultural Engineering, Department of Agronomy and Agricultural Mechanization, Faculty of Agriculture at Moshtohor, Zagazig University (Benha Branch) for his sport, encouragement, and guidance.

Deep grateful and appreciation to **Prof. Dr. M.Y. EL Ansary**, Professor of Agricultural Engineering, Department of Agronomy and Agricultural Mechanization, Faculty of Agriculture at Moshtohor, Zagazig University (Benha Branch) for his continuous supervision, fruitful suggestions and promoting the present manuscript.

I also owe a great deal to **Prof. Dr. A. M. El Berry**, Professor of Agricultural Engineering, Cairo University, Director of Agricultural Engineering Research Institute, for his invaluable guidance and continuous encouragement.

Special thanks to **Dr. Osama M. Kamel**, Extension Deputy Director of Agricultural Engineering Research Institute for helping me to finish my field experiments at Rice Mechanization Centre, Meet El Deebea, Kafer El Sheikh Governorate.

Special thanks to all my colleagues in Tractor Test Station at Alexandria who assist me during field experiments for their great support.

I wish to express my cordial feelings towards all staff members of Department of Agronomy and Agricultural Mechanization, Faculty of Agriculture at Moshtohor, Zagazig University (Benha Branch)

I wish to thank both **Dr. Abd El-wahed M. Aboukarima** and, **Dr. Abd El-haliem M. Zaytoon** Researchers, Agricultural Engineering Research Institute, Agriculture Research Centre, Ministry of Agriculture and Land Reclamation, for helping and supporting during stage of data analysis. Also, I am ever grateful for the **Eng. Mossa M. Soliman**, Manager of Tractor Test Station at Alexandria for helping me.

Finally, special thanks to my family for their great support, sacrifices, and unlimited patience during this study.

TABLE OF CONTENTS

List Tables

List of Figures

1. Introduction.....	1
2. Review of Literature.....	5
2.1. Surface irrigation.....	5
2.1.1. Advantages and disadvantages of surface irrigation...	6
2.2. Surface irrigation systems.....	8
2.2.1. Traditional irrigation system.....	8
2.2.2. Level basin irrigation.....	8
2.2.3. Border irrigation.....	10
2.2.4. Furrow irrigation.....	12
2.2.5. Improved systems.....	15
2.3. Hydraulic of surface irrigation systems.....	16
2.3.1. Surface roughness.....	18
2.3.2. Infiltration.....	21
2.4. Land leveling.....	25
2.4.1. Precision land leveling (with laser control and field slop).	25
2.4.2. Soil pulverization and clods.....	29
2.4.3. Degree of soil pulverization.....	29
2.5. Surface irrigation systems performance parameters	31
2.6. Factors affecting furrow and level basin design.....	38
2.6.1. Design and management of surface irrigation.....	38
2.6.2. Limiting length design method.....	43
2.6.3. Management and scheduling of irrigation systems.....	45
2.7. Influence of irrigation and cultural practices on crop yield.....	48
3. MATERIALS AND METHODS.....	53
3.1. Materials.....	53
3.1.1. Farm equipment used in tillage operations	53
3.1.1.1. Power units.....	53
3.1.1.2. Tillage implements.....	53

3.1.1.3. Planting and harvesting machines.....	54
3.1.2. Instruments.....	54
3.2. Methods.....	56
3.2.1. Soil type and its characteristics.....	56
3.2.2. Seedbed preparations.....	57
3.2.3. The spiles calibration for inflow rate determination...	58
3.2.4. Field experiments.....	59
3.3. Soil and water parameters.....	64
3.3.1. Soil mean weight distribution.....	64
3.3.2. Soil surface roughness.....	65
3.3.3. Infiltration rate.....	65
3.3.4. Soil moisture distribution pattern.....	66
3.3.5. Water consumptive use.....	67
3.3.6. Advance and recession time.....	67
3.4. Irrigation evaluation parameters.....	68
3.4.1. Irrigation water applied.....	68
3.4.2. Irrigation application efficiency.....	69
3.4.3. Water distribution efficiency.....	69
3.4.4. The low -quarter distribution uniformity.....	69
3.4.5. Water use efficiency.....	70
3.5. Yield and yield components.....	70
3.5.1. Summer crop (Corn)	70
3.5.2. Winter crop (Wheat).	71
3.6. Statistical analysis.....	71
4. RESULTS AND DISCUSSION.....	73
4.1. Influence of seedbed preparation treatments on soil properties.....	73
4.1.1. Soil mean weight diameter.....	73
4.1.2. Soil roughness.....	76
4.1.3. Infiltration rate.....	78
4.1.3.1. Kostiakov-Lewis intake parameters.....	83
4.1.3.2. Derivation of relationship between soil mean weight diameter and infiltration rate.....	86
4.1.3.3. The constant-depth term (f_0).....	87
4.2. Influence of inflow rate on irrigation performance....	90
4.2.1. Advance and rescission times.....	90
