Acknowledgment

First of all, gratitude to God who guided and aided me in bringing this thesis to light, which has never crowned by success without the blessing of Allah to whom my faithful loyalty will remain forever beyond and compromised.

I would like to express my gratitude to my supervisor Dr. Ashraf Zin El Abden, Assistant professor of Chest Diseases, Faculty of Medicine, Assiut University, for his support, encouragements, teaching and discussion during the course of this work.

It is pleasure to express my sincere gratitude to Dr. Mohammad Galal, Assistant professor of Pathology, Faculty of Medicine, Assiut University, for his performance and supervising the practical part of this work and for his continuous encouragements and useful help.

I'm also grateful to my kind teacher Dr. Raufat Tala, Lecturer of Chest Diseases, Faculty of Medicine, Assiut University, for his valuable advice, constructive suggestion, excellent guidance and eminent supervision which tided me over the difficulties I met during this work

I'm greatly thankful to my Professor Ahmad Hamed Osman, Professor and Head of Chest Diseases and to all my teachers in Chest Department, Faculty of Medicine, Assiut University, for their very kind and useful advice and their continuous and valuable help.

Ali Abdel Azeem
