

Phytochemical and Biological Evaluation of Certain Traditional Hepatoprotective Plants

A THESIS

Submitted for partial fulfillment of the requirements for master degree in
Pharmaceutical Sciences
(Pharmacognosy)

Noha Mostafa Fathallah

BSc. Pharmaceutical Sciences, Faculty of Pharmacy, Cairo University (2008)

Under the Supervision of

Prof. Dr. Abdel-Nasser Badawy Singab

Dean of Faculty of Pharmacy,
Ain Shams University,
Professor of Pharmacognosy

Prof. Dr. Osama Mostafa Salama

Vice President,
Future University
Professor of Pharmacognosy

Dr. Mokhtar Mohamed Bishr,

Plant General Manager and
Technical Director, Arab Company for Pharm. and Medicinal Plants Mepaco

Pharmacognosy Department
Faculty of Pharmacy
Ain Shams University
2016

Approval sheet

Thesis entitled: Phytochemical and Biological Evaluation of Certain Traditional Hepatoprotective Plants.

Candidate: Noha Mostafa Fathallah

Approved by:

Prof. Dr. Abdel-Nasser Badawy Singab

Professor of Pharmacognosy.
Dean of Faculty of Pharmacy
Ain Shams University.

.....

Prof. Dr. Osama Mostafa Salama

Professor of Pharmacognosy.
Vice President
Future University.

.....

Prof. Dr. Fathi Kandeel M. El Feky

Professor of Pharmacognosy.
Faculty of Pharmacy
Alexandria University.

.....

Associate Prof. Dr. M. Mahmoud El Shazly

Associate Professor of Pharmacognosy.
Faculty of Pharmacy
Ain Shams University.

.....

Examining date:

Acknowledgements

Thanks to Allah, the source of all knowledge by whose abundant grace this work has come to fruition. With a lot of gratitude and appreciation, I wish to express my thanks to all those who helped in making this work possible.

I wish to express my appreciation and sincere gratitude to **Prof. Dr. Osama Mostafa Salama**, Professor of Pharmacognosy, Vice President, Future University, for suggesting the research point, indispensable advice and encouragement from the beginning of this work.

I would like to express my deep everlasting gratitude to **Prof. Dr. Abdel-Nasser Badawy Singab**, Professor of Pharmacognosy and the Dean of Faculty of Pharmacy- Ain Shams University, for supervision, fruitful advice, unlimited help, and for his effort in the presentation of this work.

Thanks and appreciation for **Dr. Mokhtar Bishr**, Plant General Manager and Technical Director, Arab Company for Pharm. and Medicinal Plants, for his constant valuable guidance, supervision and his effort in revising the thesis and presentation of this work.

I am grateful to **Prof. Dr. Farid Badria**, professor of pharmacognosy, Faculty of Pharmacy, Mansoura University, for performing the biological studies with great patience and sincere interest.

Special thanks and appreciation to **Dr. Wafaa El Kady** and all my colleagues in the department for their valuable advices and co-operation.

I would like to thank **my dear husband** for his continuous encouragement, support and patience.

Words are not enough to express my hearty gratitude, sincere appreciation and indebtedness to my great **mother, father and brother** for their great care, surveillance, affection, and love. They played a special role in my life. I owe them my life and success. May Allah make their life full of happiness and joy.

III- Techniques	26
- Aim of Work	30

Part 1

***Cichorium intybus*, L. Seeds**

- Introduction	33
----------------	----

Chapter one:

- Taxonomy and review of literature	
I- Taxonomy	35
II- Review of literature	42
III- Pharmacological activities	53

Chapter two:

- Phytochemical investigation of <i>Cichorium intybus</i> , L.	57
A- Investigation of <i>Cichorium intybus</i> , L. seeds lipoidal matter:	58
• Separation of the lipoid matter of the seeds extract of <i>Cichorium intybus</i> , L.	59
I- Unsaponifiable Matters	63
- Identification of Compound C1	64

- Identification of Compound C2	73
II- Fatty acids methyl esters	74
B- Investigation of <i>Cichorium intybus</i> , L. defatted powder:	75
• Separation and Identification of compounds	76
- Compound C3	82
- Compound C4	89
- Compound C5	97
- Compound C6	107
- Compound C7	112

Chapter Three:

- Biological evaluation of <i>Cichorium intybus</i> , L. seeds	118
I-Biological evaluation.	119
II-Histopathological evaluation.	125

Part two:

***Cassia tora*, L. seeds:**

- Introduction	139
----------------	-----

Chapter one:

- Taxonomy and review of literature	141
I- Taxonomy	142
II- Review of literature	149
III- Pharmacological activities	154

Chapter two:

- Phytochemical investigation of <i>Cassia tora</i> , L. seeds	158
A- Investigation of <i>Cassia tora</i> , L. seeds lipoid matter:	159
• Separation of the lipoid matter of <i>Cassia tora</i> , L. seeds	160
Unsaponifiable Matters	163
- Compound Ca 1	163
- Compound Ca 2	164
II- Fatty acids methyl esters	165
B- Investigation of <i>Cassia tora</i> , L. defatted powder:	169
• Separation and Identification of compounds	170
- Compound Ca 3	177
- Compound Ca 4	180
- Compound Ca 5	183
- Compound Ca 6	186
- Compound Ca 7	189
- Compound Ca 8	192
- Compound Ca 9	195
- Compound Ca 10	198

Chapter Three:

- Biological evaluation of <i>Cassia tora</i> , L. seeds.	200
I- Biological evaluation.	201
II- Histopathological evaluation.	207
