**STUDIES ON THE INTEGRATED CONTROL OF
SUGARCANE STALK BORERS**

By

MAHMOUD MOHAMED IBRAHIM KHEWA

B.Sc. Agriculture (Pesticides), Faculty of Agriculture,
Alexandria Univ., 1973.

M.Sc. (Economic Entomology), Faculty of Agriculture,
Moshtohor, Zagazig Univ., 1986.

A Thesis Submitted in Partial Fulfillment of
the Requirements for the Degree
of

DOCTOR OF PHILOSOPHY

In

Economic Entomology

Plant Protection Department
Faculty of Agriculture, Moshtohor
Benha Branch, Zagazig University

2001

BV 191

Approval sheet
STUDIES ON THE INTEGRATED CONTROL OF
SUGARCANE STALK BORERS

BY

Mahmoud Mohamed Ibrahim Khewa.

B.Sc. Agric. Plant protection (Pesticides) Alex. Univ. 1973

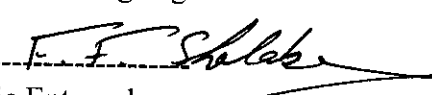

M. Sc. (Entomology) Moshtohor, Benha Branch, Zagazig Univ.
1986

This thesis for Ph.D. degree had been

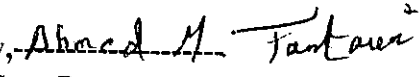

Approved by :

Prof. Dr. Yehia H. Fayad, 
Chief Researcher, Biological Control
Dept., Plant Protection Res. Inst., ARC.

Prof. Dr. Ezzat F. El-Khayat, 
Professor of Economic Entomology,
Plant Protection Dep., Fac. Of
Agri.,
Moshtohor, Benha Branch, Zagazig
Univ.

Prof. Dr. Fawzy F. Shalaby, 
Professor of Economic Entomology,
Plant Protection Dep., Fac. Of
Agri.,
Moshtohor, Benha Branch,
Zagazig Univ.

Prof. Dr. Mahmoud M. Assar, 
Professor of Economic Entomology,
Plant Protection Dep., Fac. Of Agri.,
Moshtohor, Benha Branch, Zagazig
Univ.

Prof. Dr. Ahmed M. El-Tantawy, 
Chief Researcher, Field Crop Pests
Res. Dept. Plant Protection Res. Inst., ARC

of Examination: 15/11/2001

STUDIES ON THE INTEGRATED CONTROL OF SUGARCANE STALK BORERS

By

MAHMOUD MOHAMED IBRAHIM KHEWA

B.Sc. Agriculture (Pesticides), Faculty of Agriculture,
Alexandria Univ., 1973.

M.Sc. (Economic Entomology), Faculty of Agriculture,
Moshtohor, Zagazig Univ., 1986.

Under the supervision of :

1- Prof. Dr. Fawzy Faiek Shalaby

Professor of Economic Entomology, Fac.
of Agric., Moshtohor, Benha Branch, Zagazig Univ.

2- Prof. Dr. Mahmoud Mostafa Assar

Professor of Economic Entomology, Fac.
of Agric., Moshtohor, Benha Branch, Zagazig Univ.

3- Prof. Dr. Ahmed M. El-Tantawy

Chief Researcher, Plant Protection
Res. Inst., Agric. Res. Center.

ACKNOWLEDGEMENT

First of all ultimate thanks to GOD

The author wishes to express his deep thanks and gratitude to **Dr. Fawzy Faiek Shalaby** and **Dr. Mahmoud Mostafa Assar**, Professors of Economic Entomology, Plant Protection Dept., Faculty of Agriculture at Moshtohor, Benha Branch, Zagazig University, for keen supervision, valuable guidance, fruitful criticism, and continuous encouragement, and also for their great effort in revising the manuscript.

The idea of studying new unconventional methods for controlling the sugarcane stalk-borers was suggested by **Dr. Ahmed Mohammadein El-Tantawy**, Chief Researcher, Field Crop Pests Res. Dept., Plant Protection Res. Institute, ARC, Egypt. To him the writer is indebted with thankfulness and gratefulness for close and kind supervision, valuable scientific suggestions, offering all the materials and facilities needed for achievement of this study, fruitful advices, and also for revising the manuscript.

Deep thanks are also due to **Dr. Gomaa El-Demirdash Khidr**, Chief Researcher, and head of Field Crop Pests Res. Dept., Plant Protection Res. Institute, ARC, for kindness and continuous encouragement throughout the whole period of study, and also for his valuable help in preparing and writing the manuscript.

The author is also grateful to **Dr. Al-Metwally Farrag Al-Metwally**, Chief Researcher, Field Crop Pests Res. Dept., at the same Institute, for his continuous encouragement, and for offering the financial support needed for transportation and achieving the practical part of this study.

Warmest and deepest thanks to all members of my family for their sentimental support and encouragement throughout the whole period of study, and for suffering a lot to give me enough time for the achievement of work carried out on sugarcane in Upper Egypt.

CONTENTS

	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	3
2.1- Importance of sugarcane stalk borers in Egypt and the world	3
2.2.1- Relative susceptibility of certain sugarcane varieties to borers	5
2.2.2- Effect of row spacing on sugarcane borers attack	8
2.2.3- Effect of sugarcane aging and planting date on borers attack	9
2.2.4- Forage maize as plant traps for controlling the pink borer, <i>Sesamia</i> spp., in sugarcane fields	11
2.3- Losses in cane quality and sugar yield (field and factory losses) caused by borers' infestation	13
2.4- Different control methods against sugarcane stalk borers	18
2.4.1- Chemical insecticides	18
2.4.2- Bio-insecticides	18
2.4.3- Female sex pheromones	22
2.4.4- Natural enemies	22
3. MATERIALS AND METHODS	26
3.1- Effect of certain agricultural practices on infestation rates by the main sugarcane borer, <i>Chilo agamemnon</i> Bles.	26
3.2- Losses in sugar yield (Factory losses) caused by <i>Chilo agamemnon</i> Bles.	27
3.3- Different methods for controlling sugarcane borers ..	28
4. RESULTS AND DISCUSSION	34
PART I	
4.1- Effect of certain agricultural practices on infestation rates by <i>Chilo agamemnon</i>	34

CONTENTS : Cont.

	Page
4.1.1- Relative susceptibility of certain sugarcane varieties to borers	34
4.1.1.1- During 1998	34
4.1.1.2- During 1999	40
4.1.2- Effect of distance between rows on rates of infestation in cane fields by <i>C. agamemnon</i> and canes' length and weight	49
4.1.3- Aging and planting date	57
Part II	
4.2- Losses in sugar yield (Factory losses) caused by <i>Chilo agamemnon</i> Bles.	63
4.2.1- Effect on juice weight	63
4.2.2-Effect on percentage of sucrose	67
.....	68
4.2.3- Effect on percentage of reducing sugar	
Part III	
4.3- Different control methods against sugarcane stalk borers	70
4.3.1- Assay different materials for controlling the lesser sugarcane stalk borers	70
4.3.2-Evaluation of <i>Sesamia cretica</i> pheromone in the field	79
4.3.3- Effect of <i>Trichogramma evanescens</i> as a biological control mean against <i>C. agamemnon</i>	99
5. CONCLUSION	105
6. SUMMARY	107
7. REFERENCES	114
8. ARABIC SUMMARY
