PHYSIOLOGICAL ADVERSE REACTIONS INDUCED
BY REPEATED ADMINISTRATION OF
PIRETANIDE IN ALBINO RATS

A THESIS
Submitted in Partial Fulfillment
For the M. Sc. Degree
(Comparative Physiology)

Presented By
Fatma Abdel-Azeem Youssef Sanad
(B. Sc. in Zoology)

Faculty of Science
Cairo University
2000

B

1-8-7

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ
لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ
أَنْتَ الْعَلِيمُ الْحَكِيمُ

صدق الله العظيم

سورة البقرة آية (٣٢)

APPROVAL SHEET

Title of the M. Sc. Thesis

PHYSIOLOGICAL ADVERSE REACTIONS INDUCED BY REPEATED ADMINISTRATION OF PIRETANIDE IN ALBINO RATS

Name of the Candidate:

Fatma Abdel-Azeem Youssef Sanad

Submitted to:

Faculty of Science, Cairo University

Supervision Committee:

1- Dr. Osama Abdel-Ghaffar Youssef

Assistant Professor of Comparative Physiology,
Zoology Department, Faculty of Science, Cairo University

O. Abdel-Ghaffar

2- Prof. Dr. Mohammed Mohammed Badawy

Professor of Biochemistry, National Organization for Drug Control and
Research, Cairo, Egypt

M. Badawy

Head of Zoology Department

K. S. Al-Badry
Prof. Dr. Kamal S. Al-Badry

Faculty of Science

To WHOM IT MAY CONCERN

This is to certify that **Fatma Abdel Azim Youssef Sanad**
Has attended and passed successfully the following post graduate
courses as a partial fulfillment of the requirements of the degree of
master of science. (Comparative physiology 1994)

- | | |
|--|---|
| 1-Neurophysiology. | 11-Metabolism of electrolytes. |
| 2-Nerve and muscle physiology. | 12-Biochemistry of hormones. |

Kamal S. Al-Badry
FACULTY OF SCIENCE
DEPARTMENT OF ZOOLOGY

*To whom I love for ever
and I am always in debt to them
for my existence and happiness in this life:
my dear parents.*

ACKNOWLEDGMENT

I would like to express my deepest gratitude and indebtedness to Dr. Osama Abdel-Ghaffar Youssef, Assistant Professor of Comparative Physiology, Zoology Department, Faculty of Science, Cairo University, for suggesting the point of investigation, planning the work, faithful supervision, continuous encouragement and criticizing the manuscript.

My cordial Thanks and great appreciation to professor Dr. Mohammed Mohammed Badawy, Professor of Biochemistry in National Organization for Drug Control and Research, for his sincere supervision, continuous encouragement, guiding the work and valuable advice.

CONTENTS

INTRODUCTION	1
MATERIALS AND METHODS	12
Analytical Techniques	14
I. Hematological Parameters	14
I.1. Enumeration of erythrocytes	14
I.2. Determination of hematocrit	14
I.3. Determination of hemoglobin	14
I.4. Determination of osmotic fragility	15
I.5. Enumeration of leukocytes	16
I.5.1. Total leukocyte count	16
I.5.2. Differential leukocyte counts	17
II. Biochemical Parameters	17
II.A. Inorganic Parameters	17
II.A.1&2. Determination of serum sodium and potassium	17
II.A.3. Determination of serum calcium concentration	18
II.A.4. Determination of serum magnesium concentration	18
II.A.5. Determination of serum inorganic phosphorus	19
II.A.6. Determination of serum chloride concentration	20
II.B. Organic Parameters	20
II.B.1. Determination of serum glucose concentration	20
II.B.2. Determination of liver glycogen content	21
II.B.3. Determination of serum total lipid concentration	23
II.B.4. Determination of serum total cholesterol concentration ...	23
II.B.5. Determination of serum total protein concentration	24
II.B.6. Determination of serum albumin concentration	25
II.B.7. Determination of serum globulin concentration ..	25
II.B.8. Determination of serum urea concentration	25
II.B.9. Determination of serum uric acid concentration	26
II.B.10. Determination of serum creatinine concentration	27
II.B.11. Determination of serum aspartate aminotransferase	28
II.B.12. Determination of serum alanine aminotransferase	29
III. Statistical Analysis	30

RESULTS	31
I. Hematological Parameters.....	31
II. Biochemical Parameters	64
II.A. Inorganic parameters	64
II.B. Organic parameters	83
DISCUSSION	133
I. Hematological Study	133
II. Biochemical Study	137
SUMMARY	157
REFERENCES	169
ARABIC SUMMARY.	

LIST OF TABLES

Table No.	Title	Page No.
(1)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on red cell count ($\times 10^6/\mu\text{l}$) of male albino rats.	32
(2)	Analysis of variance in red cell counts of male albino rats as influenced by daily administration (for five weeks) of piretanide at two therapeutic dosage levels.	35
(3)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on packed cell volume (%) of male albino rats.	36
(4)	Analysis of variance in packed cell volume of male albino rats as influenced by daily administration (for five weeks) of piretanide at two therapeutic dosage levels.	38
(5)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on hemoglobin content (g/dl) of male albino rats.	40
(6)	Analysis of variance in hemoglobin content of male albino rats as influenced by daily administration (for five weeks) of piretanide at two therapeutic dosage levels	42
(7)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on the osmotic fragility (% of NaCl) of male albino rats.	43
(8)	Analysis of variance in osmotic fragility of male albino rats as influenced by daily administration (for	

	five weeks) of piretanide at two therapeutic dosage levels.	47
(9)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on the total leukocyte count ($\times 10^3/\mu\text{l}$) of male albino rats.	48
(10)	Analysis of variance in total leukocyte counts of male albino rats as influenced by daily administration (for five weeks) of piretanide at two therapeutic dosage levels.	50
(11)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on the neutrophil count ($\times 10^3/\mu\text{l}$) of male albino rats.	52
(12)	Analysis of variance in neutrophil counts of male albino rats as influenced by daily administration (for five weeks) of piretanide at two therapeutic dosage levels.	54
(13)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on the eosinophil count ($\times 10^3/\mu\text{l}$) of male albino rats.	56
(14)	Analysis of variance in eosinophil counts of male albino rats as influenced by daily administration (for five weeks) of piretanide at two therapeutic dosage levels.	58
(15)	Effect of daily administration (for five weeks) of piretanide (at two therapeutic dosage levels) and its withdrawal on the lymphocyte count ($\times 10^3/\mu\text{l}$) of male albino rats.	59
(16)	Analysis of variance in lymphocyte counts of male albino rats as influenced by daily administration (for
