

Etiological Classification of Recurrent Non-Infective Uveitis

Thesis

Submitted for partial fulfillment of Master Degree of Internal Medicine

By

Ahmed Yehia Hassan Mohamed Elmazaly

M.B., B.Ch.

Faculty of Medicine, Ain Shams University

Supervised by

Prof. Dr. Maged Mohamed Refaat

Professor of Internal Medicine, Allergy and Clinical Immunology

Faculty of Medicine, Ain Shams University

Dr. Azza Mohamed Ahmed Said

Assistant Professor of Ophthalmology

Faculty of Medicine, Ain Shams University

Dr. Dina Sayed Sheha

Assistant Professor of Internal Medicine, Allergy and Clinical Immunology

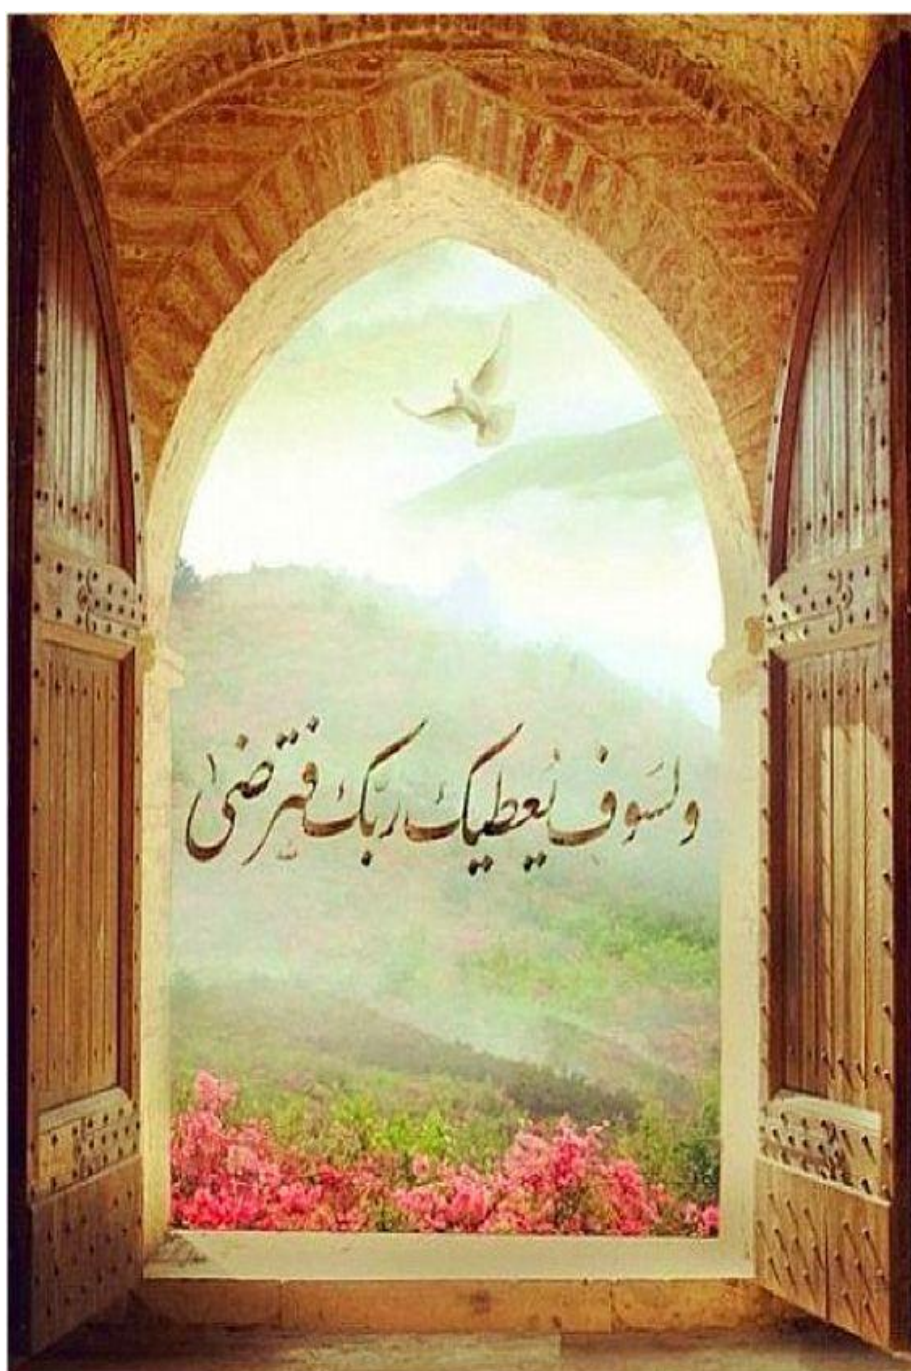

Faculty of Medicine, Ain Shams University

Faculty of Medicine

Ain Shams University

Cairo - Egypt

2016

Acknowledgements

First and for most thanks to *Allah*, who gave me the power to accomplish this work. I feel always indebted to *Allah*, the kindest and the most merciful.

This research project would not have been possible without the support of my supervisors. I wish to express my gratitude to my supervisor, *Prof. Dr. Maged Mohamed Refaat*, Professor of Internal Medicine, Allergy and Clinical Immunology who was abundantly helpful and offered valuable assistance, support and guidance.

Deepest gratitude is also due to the supervisor, *Dr. Azza Mohamed Ahmed Said*, Assistant Professor of Ophthalmology. I can't say thank you enough for her tremendous support and help.

Special thanks to *Ass. Prof. Dr. Dina Sayed Sheha*, Assistant Professor of Internal Medicine, Allergy and Clinical Immunology. Without whose knowledge and assistance this study would not have been successful.

Last but not least, I would like to thank *Mr. Essam Oun* who helped me a lot with statistical analysis of our study results.

• Arabic Summary	

List of Abbreviations

Abb.	Full term
ACE	Angiotensin Converting Enzyme
AF	Autofluorescence
ANA	Antinuclear Antibodies
ANCA	Antineutrophil Cytoplasmic Antibodies
AU	Autoimmune Uveitis
BCVA	Best Corrected Visual Acuity
BD	Behçet disease
C	Complement
CBC	Complete Blood Count
CCP	Cyclic Citrullinated Peptides
CD	Cluster of Differentiation
CF	Counting Fingers
CME	Cystoid Macular Edema
CMV	Cytomegalo virus
CNV	Choroidal Neovascularization
Cregs	Complement regulatory proteins
CRP	C-Reactive Protein

List of Abbreviations (Cont.)

Abb.	Full term
Crpy	Complement related protein y
CT	Computed Tomography
ESR	Erythrocte Sedimentation Rate
FA	Fluorescein Angiography
DNA	Double Stranded Nucleic Acid
Fc	Constant Fragment
HLA	Human Leukocyte Antigen
HSV	Herpes Simplex virus
I-AU	Idiopathic Autoimmune Uveitis
ICG	Indocyanine Green
IL	Interleukin
IFN	Interferon
IOP	Intraocular Pressure
IRU	Immune Recovery Uveitis
IVIg	Intravenous Immunoglobulin
IVTA	Intravitreal Triamcinolone Acetonide
JIA	Juvenile Rheumatoid Arthritis

List of Abbreviations (Cont.)

Abb.	Full term
K-EDTA	Ethylene Diamine Tetra Acetic Acid
MHC	Major Histocompatibility Complex
MRI	Magnetic Resonance Imaging
NF-kB	Nuclear Factor Kappa light chain
No. (n)	Number
NSAIDs	NonSteroidal Anti Inflammatory Drugs
OCT	Optical Coherence Tomography
PCR	Polymerase Chain Reaction
PORN	Progressive Outer Retinal Necrosis
PPV	Pars Plana Vitrectomy
P-value	Probability Value
SUN	Standardization of Uveitis Nomenclature
SD	Standard Deviation
SDA-AU	Systemic Disease Associated Autoimmune Uveitis
SLE	Systemic Lupus Erythematosus
TB	Tuberculosis
Th	T helper

List of Abbreviations (Cont.)

Abb.	Full term
TLR	Toll like receptors
TNF-a	Tumor Necrosis Factor-a
Tregs	regulatory T cells
UBM	Ultrasound Biomicroscopy
VA	Visual Acuity
VKH	Vogt Koyanagi Harada
X^2	Chi-Square test

List of Figures

Fig. No.	Title	Page No.
1	Anatomy of the eye	5
2	A human eyeball in horizontal section demonstrating the three regions of the uvea with their characteristic pigment deposition	6
3	Severe HLA-827-associated iridocyclitis with a plasmoid aqueous and hypopyon	8
4	Exudate (black arrow) on pars plana (snowbank) in a patient with pars planitis	9
5	Fundus photography of optic neuritis in a patient with chorioretinitis	10
6	Widespread sectoral iris transillumination in chronic herpes simplex uveitis	15
7	Wide field fundus photography of circumferential acute retinal necrosis with multiple posterior extensions and occlusive arteriolitis	17
8	Progressive outer retinal necrosis	18

List of Figures (Cont.)

Fig. No.	Title	Page No.
9	Fundus photography of cytomegalovirus retinitis in vascular distribution characterized by fluffy white retinal infiltration and small area of retinal hemorrhage	20
10	Fundus photography shows old retinochoroiditis scar in congenital toxoplasmosis	22
11	Anterior segment photograph shows non pigmented keratic precipitates spread over the whole corneal endothelium which characterize Fuchs' heterochromic uveitis	23
12	Rubella retinopathy	24
13	VKH syndrome, Poliosis (white color of eye lashes) is noticed	33
14	Severe band keratopathy in a patient with lupus-associated chronic uveitis	45
15	Frank endothelial dystrophy in a 45-year-old patient with Fuchs' heterochromic uveitis, showing a few keratic precipitates in addition to endothelial changes	46

List of Figures (Cont.)

Fig. No.	Title	Page No.
16	Optical coherence tomography of two patients showing gross uveitic macular edema, accompanied by underlying serous foveal elevation	50
17	The inferior retina is elevated by shifting fluid in a patient with end-stage lupus and necrotizing choroidopathy	52
18	Multiple chorioretinal spots from infection with West Nile Virus are subtle on colour photography but prominent on autofluorescence imaging	62
19	Inflammatory ciliary body effusion and detachment detected on ultrasound biomicroscopy (UBM) in a patient with sarcoidosis with hypotony	64
20	Optical coherence tomogram through fovea in patient with cystoid macular oedema	66

List of Figures (Cont.)

Fig. No.	Title	Page No.
21	Hypothetical pathogenetic model of autoimmune uveitis, loosely inspired to that proposed by Dr. Caspi. The potential therapeutic targets and the available drugs that can potentially be used in relation to each critical checkpoint are indicated	67
22	Oral ulcers of old male patient	96
23	Cutaneous vasculitis over the shin of the tibia of old male patient	97
24	Vitiligo in middle aged female	100

List of Graphs

Graph No.	Title	Page No.
1	Geographical distribution of the present study population	92
2	Presenting complain and clinical features of Behçet patients in the present study population	95
3	Ocular complications among study population in relation to gender	106

List of Tables

Table No.	Title	Page No.
1	Standardization of Uveitis Nomenclature (SUN) working group anatomic classification of uveitis	11
2	SUN grading system for anterior chamber (AC) cell and flare sensitivity. The presence or absence of hypopyon should be noted separately in addition to the AC cellular activity grade	12
3	SUN working group clinical classification of uveitis	13
4	Review of systems via history with Uveitis associated diseases	26
5	Systemic diseases with uveitis association and corresponding laboratory tests	36
6	Some uveitis syndromes are associated with the possession of certain HLA types	58
7	Mean age (years) of 100 patients diagnosed with AU	90
8	Prevalence of AU among males and females in correlation with age groups	91
