Typology and Focus of EFL Teachers' Written Feedback on Egyptian Students Writing Proficiency

Abstract

This thesis ventures to explore teachers' comments on students' writing. Written Corrective Feedback (WCF) is a reactive customized focus-on-form approach to direct learners' attention to form while performing a writing task, without breaking down the communicative mode. However, although there is a considerable amount of empirical research on the efficacy of WCF on Second Language (L2) students' writing accuracy, the results thereof are inconclusive, contradictory, and lacking theoretical base. Also there is limited research of WCF in the Arab region. The theoretical framework that informed the current study on the use of WCF in an English as a Foreign Language (EFL) writing context is Schmidt's (1990) Noticing Hypothesis. The sample consists of three types: 42 argumentative essays from an English for Specific Purposes (ESP) course, two EFL Egyptian teachers of similar teaching experiences, and 21 EFL Egyptian intermediate students from the German University in Cairo (GUC) class 2011. The analysis investigates the foci and types of the teachers' WCF on students' argumentative essays, and the efficacy of such foci and types on the writing accuracy of the students using the Researcher-Devised Taxonomy Tool (R-DTT), and the Number of Feedback Tokens Tool (NFTT). The study further highlights the teachers' beliefs behind their WCF practices and any potential mismatches thereof using the Teacher Questionnaire Tool (TQT). Finally, the students' responses

and preferences towards their teachers' WCF practices are also examined as potential factors affecting the aforementioned relationships using the Student Questionnaire Tool (SQT). Results show that the teachers use a comprehensive mixture of direct and indirect WCF. One teacher tends to use direct uncoded feedback, while the other tends to use indirect coded feedback. In relation to the foci of the teachers' WCF, the participating teachers provided feedback on all aspects of their students writing namely form, rhetoric and content. In relation to the efficacy of WCF, the results show the guardedly positive effect of direct comprehensive uncoded WCF on the students' writing accuracy and the inefficacy of the indirect comprehensive coded WCF on the students' writing accuracy. Direct uncoded WCF proved to be more accessible and easily assimilated by the cognitive processing of the Egyptian EFL students because they can notice their errors and correct them in the subsequent essays. In relation to teachers' beliefs, several mismatches appeared between their beliefs and their actual practices. In relation to students' responses, the students' preference of comprehensive direct feedback matched their teachers' practice, although the students are not always aware of their teachers' actual practices. The findings of the study have pedagogical implications for WCF practice, especially for EFL contexts.

Search terms used: 'cognitive linguistics'; 'second language acquisition'; 'feedback'; and 'writing'.

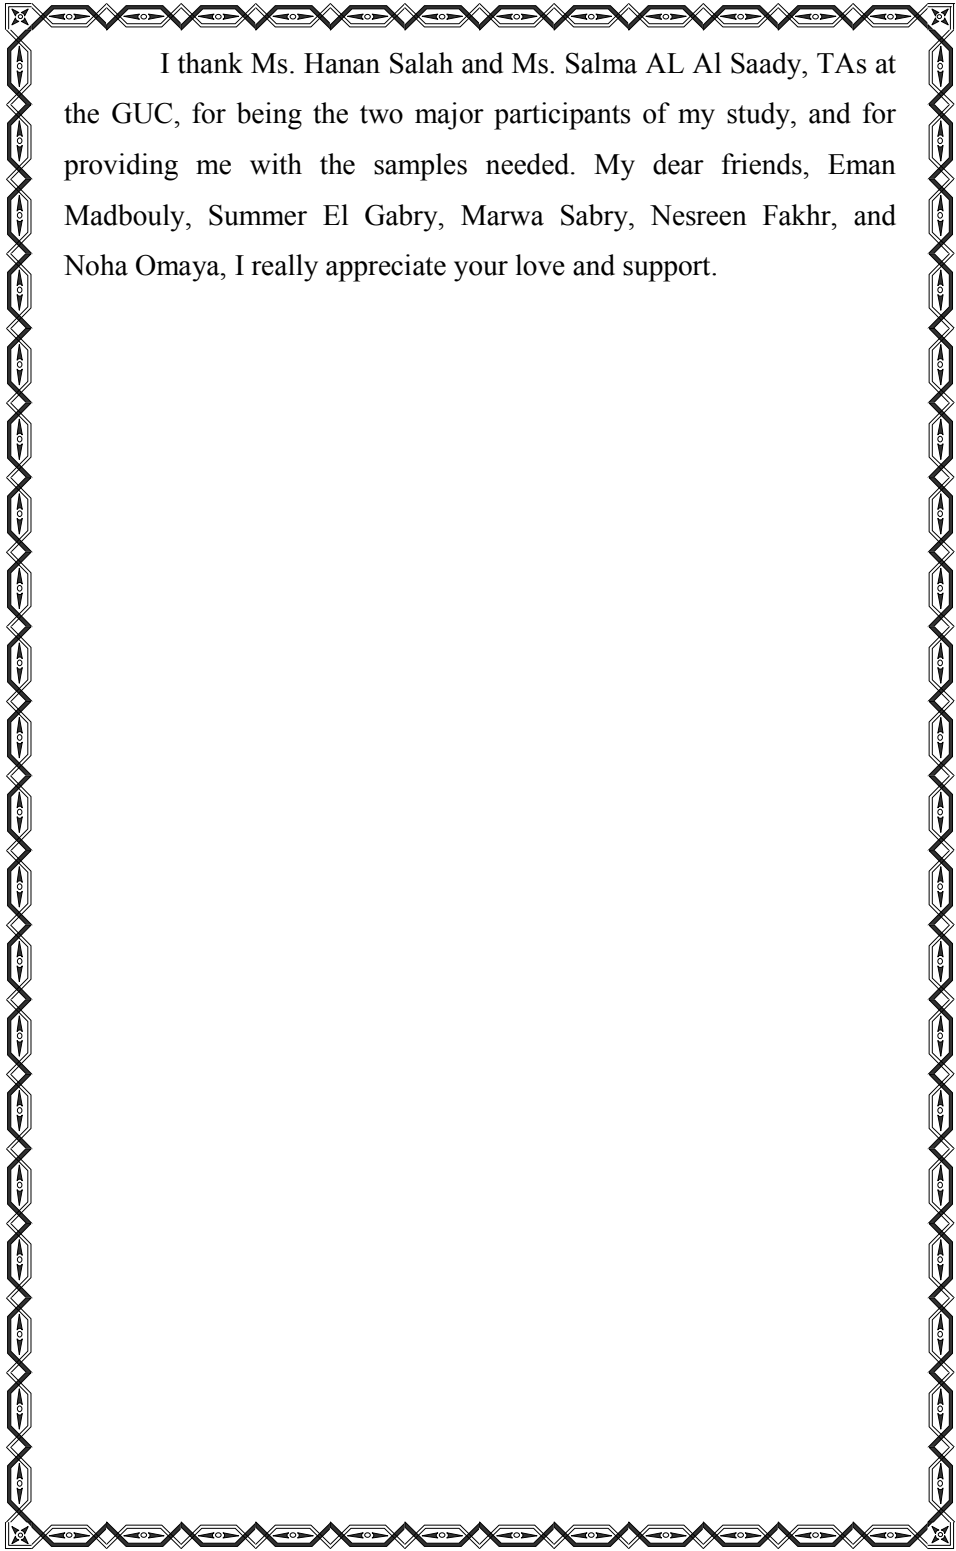

Acknowledgements

This thesis would have not been completed had it not been for Allah's countless blessings, so praise goes to Allah the Almighty. These blessings are my family members, my professors, and my friends whose support and encouragement is and will always be priceless.

Due respect and gratitude go to my dear supervisors, **Prof. Jeanette Atiya, Dr. Maha Hamed and Prof. Neveen Hassan.** My sincere prayers and deep gratitude go to my late supervisor, Prof Jeanette, God bless her soul; she is the main reason this soul is brought into life. Dr. Maha Hamed has exerted great efforts to help me achieve my goal; her devotion, deep knowledge and relentless feedback pushed me forward to produce this well written academic research. Prof. Neveen Hassan has saved this academic project from a potential downfall; her insightful instructions are highly appreciated.

The dream of being an MA holder was inspired by my dear parents, Major General Sherif Sabbahi and Abla Hasan. I have been always indebted to their sheer love and continuous support across all levels. I am also grateful to my beloved husband, engineer Mustafa Hazem and lovely kids, Joury and Aly. You have always been the source of my inner strength and stamina. Thank you, Mustafa, for always being there for me.

Many thanks go to my beloved sisters, Salma Sherif and Engy Sherif, and my in-laws Hazem Yousry and Faten Darwish for their sincere encouragement.

I thank Ms. Hanan Salah and Ms. Salma AL Al Saady, TAs at the GUC, for being the two major participants of my study, and for providing me with the samples needed. My dear friends, Eman Madbouly, Summer El Gabry, Marwa Sabry, Nesreen Fakhr, and Noha Omayya, I really appreciate your love and support.
