**Effect of a metalloproteinase (platelet
aggregation inhibitor, disintegrin like) from
Cerastes cerastes on male albino rats.**

Thesis

Submitted in partial fulfillment Of the requirement for the
Master degree in Basic Science (Biochemistry)

ACKNOWLEDGMENT

I would like to express my sincerest gratitude and thanks to professor Dr. Mohamed Farid El-Asmar, Professor of Biochemistry, Head of Research Unit of Natural Toxins, Faculty of Medicine, Ain Shams University. I thank him for suggesting this point of research, his supervision, valuable advices and encouragement during the course of this work.

Sincere thanks are due to Professor Dr. Fathy Mohamed Tash, Professor of Biochemistry, Faculty of Medicine, Ain Shams University, for his kind guidance and contribution in completing this work.

My deep appreciation goes to Professor Dr. Magda Mahmoud Hagag, Professor of Biochemistry, Faculty of Medicine, Ain Shams University, for her help, keen interest and valuable guidance throughout the course of this study.

I am also grateful to Dr. Ayman Ragaa Basheer, Lecturer of Biochemistry, Faculty of Medicine, Ain Shams University, for his keen supervision and continuous assistance and support.

I wish also to express my appreciation to professor doctor Moussa Shahin, Professor of Pathology, Faculty of Medicine, Ain Shams University, for his assistance and completing this work.

I wish also to express my appreciation to all members

of Blood Coagulation Unit, Biochemistry Department, Faculty of Medicine, Ain Shams University.

Also to all members of Oncology Diagnostic unit, Faculty of Medicine, Ain Shams University, for providing their equipments during maintenance of this work.

Finally to all staff members and colleagues in Biochemistry Department, Faculty of Medicine, Ain Shams University, I offer my thanks and gratitude.

This work was supported by grant no. 28 to professor M. Farid El Asmar, under the program of the National strategy for Biotechnology and Genetic Engineering. The program is administered by the Science and Technology Center at the Academy of Scientific Research and Technology.

List of Figures

List of Charts

Abbreviations

Aim of Work

Introduction

*Snake venom and platelets 1

*Effect of Snake Venoms on Tissues and Blood Enzymes: 3

-The Aminotransferases (Transaminases) 3

-Creatine Phosphokinase 5

-Lactate Dehydrogenase 8

-Glutamate Dehydrogenase 10

-Alkaline Phosphatase 12

-5'-Nucleotidase 13

-Gamma Glutamyl Transferase 15

Materials and Methods

-Crude venom 17

Protein Estimation 19

-Platelet aggregation and preparation of platelet rich plasma 20

***Fractionation of Crude *Cerastes cerastes* venom and Identification of Platelet Aggregation Inhibitory Compound**

(I) Gel filtration chromatography 22

II) Ion Exchange Chromatography 25

***Testing the purity of the platelet inhibitory fraction (A_{2c}) by:**

Contents (cont'd)

(I) Disc SDS PAGE (determination of the molecular weight of A ₂ c fraction)	28
(II) Determination of isoelectric point of A ₂ c.	31
(III) High Performance Liquid Chromatography (HPLC) of A ₂ c Fraction	33
*Estimation of the Coagulant Activity of A₂c Fraction :	
A- Plasma Recalcification Time	34
B) Prothrombin Time	35
*Effect of Active fraction on blood hemolysis:	
I. Direct hemolytic effect	36
	36
II- Indirect hemolytic effect	
*Haemorrhagic Activity of crude <i>Cerastes cerastes</i> Venom and A₂c fraction	38
*LD 50 Assay	39
*IC 50 Assay	41
*Effect of crude <i>Cerastes cerastes</i> venom and A₂c fraction on Experimental animals :	42
-Effect of Active Fraction On Serum Creatine phosphokinase enzyme level	44
-Effect of Active Fraction On Serum and tissue Transaminases	47
-Estimation of serum Urea	49
-Estimation of serum creatinine by colourimetric method	51

CONTENTS (Cont'd)

-Estimation of serum and tissue Alkaline phosphatase activity by colorimetric method	53
-Estimation of serum and tissue Lactate Dehydrogenase enzyme activity	55
-Estimation of serum and tissue Glutamate Dehydrogenase enzyme activity	57
-Estimation of serum and tissue Gamma Glutamyl Transferase enzyme activity	59
-Estimation of serum and tissue 5' nucleotidase enzyme activity	61
-Estimation of total serum proteins	63
-Estimation of serum Albumin:	65
