• Discussion	86
• Summary and Conclusion	96
• Recommendations	100
• References	101
• Arabic Summary	

List of Abbreviations

AD	: Atopic dermatitis
AR	: Allergic rhinitis
CAL	: Coronary artery lesions
CMPA	: Cow's milk protein allergy
EPD	: Enzyme potentiated desensitization
ERK	: Extracellular signal-regulated kinases
H ₂ O ₂	: Hydrogen peroxide
HCV	: Hepatitis C virus
HDMP	: High-dose methylprednisolone
HIV	: Human immunodeficiency virus
ICH	: Intracranial hemorrhage
IgE	: Immunoglobulin E
IL31	: Interleukin 31
IL31RA	: IL31 receptor A
ISAAC	: Asthma and Allergies in Childhood
ITP	: Immune Thrombocytopenic Purpura
IVIG	: Intravenous immunoglobulin
JNK	: Jun N-terminal protein kinase
KD	: Kawasaki disease

List of Abbreviations

MAPK	: Mitogen-activated protein kinases
MC	: Mast cell
MMR	: Measles-mumps-rubella
NIAID	: National Institute of Allergy and Infectious Disease
PBMC	: Peripheral blood mononuclear cell
RA	: Rheumatoid arthritis
STAT	: Signal transducer and activator of transcription
Th	: T helper cells
TNF	: Tumor necrosis factor
TPO	: Thrombopoietin
TRAs	: Trombopoietin receptor agonists
UV	: Ultraviolet
VZV	: Varicella-zoster virus

List of Figures

<u>No.</u>	<u>Figure</u>	<u>Page</u>
<u>1</u>	Th2 cytokines augment IL-31/IL-31RA interactions via STAT6-dependent IL-31RA expression.	25
<u>2</u>	IL-31 regulates (Dendritic cells) DC-mediated T cell responses in the course of atopic dermatitis.	27
<u>3</u>	Comparison between control group and patients group regarding IL31 level.	67
<u>4</u>	Comparison between control group and patients group regarding Score of allergy.	67
<u>5</u>	Comparison between acute and chronic ITP regarding age (years).	69
<u>6</u>	Comparison between acute and chronic ITP regarding duration of ITP.	69
<u>7</u>	This Figure Showing relation between history of allergy and allergy positive score.	74
<u>8</u>	Comparison between negative score and positive score regarding IL31 level.	76
<u>9</u>	Comparison between steroid responsive and steroid resistant regarding Duration of ITP.	78
<u>10</u>	This figure show: positive correlation between IL31 level and score of allergy.	82
<u>11</u>	Receiver operating characteristic curve (ROC) for IL-31 between control group and patients group.	84
<u>12</u>	Receiver operating characteristic curve (ROC) for score of allergy between control group and patients group.	85

List of Tables

<u>No.</u>	<u>Table</u>	<u>Page</u>
<u>1</u>	Comparison of newly diagnosed immune thrombocytopenic purpura (ITP) treatment regimens in children.	15
<u>2</u>	Treatment for children with persistent and chronic ITP.	16
<u>3</u>	Immunological functions of IL-31.	24
<u>4</u>	Descriptive statistics for the studied parameters in patients with ITP.	64
<u>5</u>	Descriptive statistic for the studied parameters in patients with ITP.	65
<u>6</u>	Descriptive statistic for the studied parameters in control group.	65
<u>7</u>	Comparison between patients group and control group regarding age, sex IL13 level, Ig E level and score of allergy.	66
<u>8</u>	Comparison between acute and chronic ITP patients regarding age-sex Duration of ITP (years).	68
<u>9</u>	Comparison between acute and chronic group regarding treatment, history of allergy, score of allergy.	70
<u>10</u>	Comparison between acute and chronic patients regarding IL31 level and IgE level.	71
<u>11</u>	Comparison between allergy negative and positive score regarding age, sex and duration of ITP.	72

<u>No.</u>	<u>Table</u>	<u>Page</u>
<u>12</u>	Comparison between allergy negative score and allergy positive score regarding type of ITP, treatment responsive, history of allergy.	73
<u>13</u>	Comparison between allergy negative score and allergy positive score regarding IL31 level and IgE level.	75
<u>14</u>	Comparison between steroid responsive and resistant regarding age, sex and duration of ITP.	77
<u>15</u>	Comparison between steroid responsive and steroid resistant regarding type of ITP, History of allergy and allergy score.	79
<u>16</u>	Comparison between steroid responsive and resistant regarding IL31 level and IgE level.	80
<u>17</u>	Correlation between IL-31 with the studied parameters (IgE, age duration of ITP and score of allergy).	81
<u>18</u>	Correlation between IgE with the studied parameters (Age years), duration of ITP and score of allergy.	83

Introduction

Aim of the Study

Review of Literature

Chapter (1)

Immune Thrombocytopenic Purpura

Chapter (2)

Interleukin-31

Chapter (3)

Allergy in Children

Patients and Methods
