MINERALOGY OF TUSHKA SOILS IN RELATION TO ITS ORIGIN, GENESIS AND PROPERTIES

BY

NABIL MOHAMED ABD-ELLATEEF AHMED BAHNASAWY

B.Sc.Agric. (Soils) Asuit University (1991)

A Thesis

**Submitted in partial fulfillment of
the requirements for the degree
of Master of Science
in
Soil Science**

**Department of Soils
Faculty of Agriculture, Moshtohor
Zagazig University (Benha)**

2002

Bo EN

10896

APPROVAL SHEET

MINERALOGY OF TUSHKA SOILS IN RELATION TO ITS ORIGIN, GENESIS AND PROPERTIES

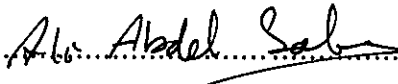

BY

NABIL MOHAMED ABD-ELLATEEF AHMED BAHNASAWY
B.Sc.Agric. (Soils), Asuit University (1991)

This thesis for M. Sc. degree has been approved by:

Prof. Dr. A. S. Tag El-Deen 
Prof. of Soil Sci., Desert Research Center

Prof. Dr. H. H. Hassona 
Prof. of Soil Sci., Soils, Water and Environmental Res. Inst.

Prof. Dr. A. A. Abdel-Salam 
Prof. of Soil Sci., Moshtohor, Zagazig University

Prof. Dr. R. S. Abd-El Aal 
Prof. of Soil Sci., Moshtohor, Zagazig University

Date of Examination: // 6 / 2002

MINERALOGY OF TUSHKA SOILS IN RELATION TO ITS ORIGIN, GENESIS AND PROPERTIES

BY

**NABIL MOHAMED ABD-ELLATEEF AHMED
BAHNASAWY**

B.Sc.Agric. (Soils), Asuit University (1991)

Under the supervision of :

Prof. Dr. A. A. Abdel-Salam. *Ali Abdel Saleh*

Prof. of Soil Sci., Moshtohor, Zagazig University

Prof. Dr. A. S. Tag El-Deen *Aly Tag*

Prof. of Soil Sci., Desert Research Center

Dr. O.H.M El-Hussieny *Omar El-Hussieny*

Lecturer of Soil Science, Faculty of Agriculture,

Moshtohor, Zagazig University

(- 777)

ACKNOWLEDGMENT

The author wishes to express his deep appreciation and gratitude to **Prof. Dr. Ali A. Abdel-Salam**, professor of Soil Science, Faculty of Agriculture, Moshtohor, Zagazig University (Benha Baranch); **Prof. Dr. Aly S. Tag El-Deen**, Professor of Soil Science, Desert Research Center and **Dr. Omar H. M. El-Hosainy**, Lecturer of Soil Science, Faculty of Agriculture, Moshtohor, Zagazig University (Benha) for their supervision, guidance and continuous encouragement during the execution of this work.

Acknowledgment is also due to **Dr. Mohamed E. Abdel-Rahman**, Assistant Prof. of Soil Science, Desert Research Center for his advice through this work.

Thanks are also due to the Staff members of the Desert Research Center (DRC), for their valuable assistance during the execution of this work.

Special thanks are due to my mother, my breathers, my wife and my daughter, Nadeen, who encouraged and supported me during the course of my work

CONTENTS

INTERODUCTION.....	1
1. REVIEW OF LITERATURE.....	2
1.1. Climatology.....	2
1.2. Geology and Geomorphology.....	3
1.3. Topography.....	4
1.4. Heavy and light minerals of soils in south valley.....	5
1.5. Clay mineralogy of south valley.....	8
1.6. Amorphous materials.....	11
1.7. Trace elements in the soils of Egypt.....	12
1.7.1. Fe, Cu, Zn and Mn in relation to their bearing minerals.....	12
1.7.2. Copper and zinc status in some salts affected soils of Egypt.....	12
1.8. Cations exchangeable capacity, organic matter, CaCO ₃ , pH and salinity of south valley.....	13
1.9. Morphology and classification soils of Tushka and Dakka lake Nasser Reign.....	13
2. MATERIALS AND METHODS.....	16
2.1. Field work.....	16
2.2. Laboratory work.....	16
2.2.1. Particle size distribution.....	16
2.2.2. Chemical analysis.....	16
2.2.3. Mineralogical analysis.....	19
A: Microscopic examination.....	19
B: X-Ray diffraction.....	20
3. RESULTS AND DISCUSSION.....	22
3.1. Soil profile description.....	22
3.1.1. Soils of the level sand terrain.....	22
3.1.2. Soils of the undulating terrain.....	22
3.1.3. Soils of the hilly terrain (upland).....	22
3.2. soil characteristics.....	22
3.2.1. Particle size distribution (table 1).....	22

3.2.2. Calcium carbonate (table 1)	25
3.2.3. Soil reaction (pH) (table 2)	25
3.2.4. Organic matter (table 2)	25
3.2.5. Gypsum (table 2)	26
3.2.6. Saturation percentage (table 2)	26
3.2.7. Soil salinity (table 2)	26
3.2.8. Soluble ions (table 2)	30
3.2.9. Sodium adsorption ratio (SAR) (table 2)	30
3.3. Cation exchange characteristics	30
3.3.1. Cation exchange Capacity (table 3)	30
3.3.2. Exchangeable Cations (table 3)	30
3.3.3. Exchangeable sodium percentage (ESP) (table 3)	33
3.3.4. Total surface area (table 3)	33
3.4. Amorphous materials (table 4)	33
3.5. Mineralogy of the sand fraction.	38
3.5.1. Light minerals	38
3.5.2. Heavy minerals	41
3.5.3. Genesis of the studied soils	50
3.5.4. Uniformity of soils materials	50
3.6. Mineralogy of the clay fraction	53
3.6.1. Soils of the level sand terrain	53
3.6.2. Soils of the Undulating Terrain	57
3.6.3. Soils of the Hilly Terrain (Upland)	61
3.7. Status of trace elements Fe, Mn, Zn and Cu	61
3.7.1. Iron	61
3.7.2. Manganese	67
3.7.3. Zinc	69
3.7.4. Copper	70
3.8. Relationship between Fe, Mn, Zn and Cu elements and soil minerals.	75
3.8.1. In soils of the level sand terrain	75
3.8.2. In soils of undulating terrain	77
3.8.3. In soils of hilly terrain (upland)	77
