EFFECT OF TEMPERATURE AND LIGHT DURING INCUBATION ON HATCHING, GROWTH AND LAYING PERFORMANCE IN CHICKENS

٢١٢٤٠٠

By

Mahmoud Hassan Abdel-Samad

**B.Sc. Agric. (Animal Prod.); Faculty of Agric., Fayoum. Cairo Univ. 1981
M.Sc. Agric. (Poultry Breed.); Faculty of Agric., Fayoum. Cairo Univ. 1992**

THESIS

**Submitted in Partial Fulfilment of
The Requirements for the Degree of
Doctor of Philosophy**

In

**Agriculture Sciences
(Poultry)
Faculty of Agriculture at El-Fayoum
Cairo University**

1998

Approval Sheet

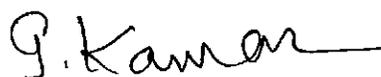

Effect of temperature and light during incubation
on hatching, growth and laying performance in
chickens

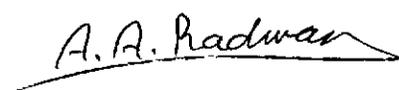

THESIS

By

Mahmoud Hassan Abdel-Samad

Approved as to style and contents by committee in
charge:

Prof. Dr : 

Prof. Dr : 

Prof. Dr : 

ASS. Prof. Dr : G. A. Arram

DATE : / / 1998

Dedication

**To my father, mother and wife
who gives me hope, confidence and a
great will to be, to maintain and to resist**

ACKNOWLEDGEMENT

ACKNOWLEDGEMENT

First and foremost, all praises and limitless thanks are devoted to almighty God who gave me inspiration and capabilities to complete this research work.

My deep gratitude is extended to Dr. M.A.Khalifa Professor of Poultry Breeding, Poultry Production Department, Faculty of Agriculture, Fayoum, Cairo University, for his continuous supervision and valuable advices throughout this study.

I am much indebted to Dr. G.A. Arram, Assistant Professor of Poultry Breeding, Poultry Production Department, Faculty of Agriculture, Fayoum, Cairo University, for his keen supervision, valuable advices, continuous encouragement, constructive criticism and constant interest throughout this work.

Deep thanks are also directed to Dr. N.A. Hataba, Professor, of poultry nutrition Animal Production Research Institute, Agriculture Research Center, Fayoum Poultry Research Station, Ministry of Agriculture for his supervision, Kind help and providing facilities to perform this research.

I'm greatly indebted to Dr. A.M. Abdel-Azim Lecturer of Poultry Physiology, Faculty of Agriculture, Fayoum, Cairo University, for his great help in the design of this study.

Also, I would like to thank the staff members of El-Takamoly Poultry Project, Fayoum, for their co-operation, assistance and facilities which rendered to me during the experimental trials.

Special thanks go to my wife for her tolerance and patience during the course of this work. I would like to thank all members of my family for their immense encouragement and continuous support.

- INTRODUCTION	1
- REVIEW OF LITERATURE	3
1- The effects of temperature	3
1-1. Growth and development of the embryo.....	3
1-2. Hatching time and hatchability.....	7
1-3. Growth and development after hatching.....	10
1-4. Rectal temperature.....	12
1-5. Feed intake and feed conversion.....	14
1-6. Egg production.....	14
2- The effects of light	16
2-1. Growth and development of the embryo.....	16
2-2. Hatching time and Hatchability.....	19
2-3. Growth and development after hatching.....	21
- MATERIALS AND METHODS	23
A- Body and egg production measurements.....	26
B- Feed intake and feed conversion.....	29
- RESULTS AND DISCUSSION	31
1- Growth and development of the embryo	31
2- Hatching time and hatchability	47
3- Growth and development after hatching	67
3-1- Body weight.....	67
3-2- Body temperature.....	76
3-3- Respiration rate.....	83
4- Chick mortality	90
5- Feed intake and feed conversion.....	96
6- Egg parameters	104
7- Egg Quality	115
7-1- Egg weight.....	115
7-2- Egg length.....	118
7-3- Egg width.....	121
7-4- Yolk height.....	124
7-5- Albumen height.....	127
7-6- Yolk diameter.....	129
7-7- Yolk weight % of Egg weight.....	132

	<u>Page</u>
7-8- Shell weight % of Egg weight.....	136
7-9- Albumen weight % of Egg weight.....	138
7-10- Shell thickness.....	141
- SUMMARY AND CONCLUSIONS	146
A- During incubation period.....	147
B- During breeding period.....	150

List of Tables

	Page
Table 1: Mean \pm S.E. of embryo weight (gram) of Fayoumi (Fa) and Golden Montazah (GM) strains at incubation period and Duncan's new multiple range test.....	32
Table 2: "F" ratio of embryo weight data at each age of the two strains.....	35
Table 3: Distribution of embryonic malpositions and abnormalities of embryos as a fraction of total embryonic mortality in the two strains.....	37
Table 4: Embryo weight, heart and liver of embryos as percentages of egg weight at different incubation periods for Fayoumi strain.	41
Table 5: Embryo weight, heart and liver of embryos as percentages of egg weight at different incubation periods for Golden Montazah strain.	42
Table 6: Mean \pm S.E of shank length (cm) of embryos at different incubation periods for Fayoumi (Fa) and Golden Montazah strain (GM).	45
Table 7: Hatching as percentage of total eggs for Fayoumi (Fa) and Golden Montazah (GM) strains.	48
Table 8: Cumulative hatching as percentage of total eggs for Fayoumi (Fa) and Golden Montazah (GM) strains.	50
Table 9: Hatching as percentage of fertile eggs for Fayoumi (Fa) and Golden Montazah (GM) strains.	54
Table 10: Cumulative hatching as percentage of fertile eggs for Fayoumi (Fa) and Golden Montazah (GM) strains.	56
Table 11: Hatching as percentage of total hatchability for Fayoumi (Fa) and Golden Montazah (GM) strains.	59
Table 12: Cumulative hatching as percentage of total hatchability for Fayoumi (Fa) and Golden Montazah (GM) strains.	61
Table 13: Hatching weight (gram) in females in the two strains.	63
Table 14: Analysis of variance of hatching weight for females in the two strains.	65

	Page
Table 15: Mean \pm S. E. of body weight (gram) of the female Fayoumi chicks at different ages.	68
Table 16: Mean \pm S. E. of body weight (gram) of the female Golden Montazah chicks at different ages.	71
Table 17: "F" ratio of body weight data of the female chicks of the two strains at different ages.	74
Table 18: Mean \pm S.E. body temperature of female Fayoumi chicks at different ages.	77
Table 19: Mean \pm S.E. body temperature of the female Golden Montazah chicks at different ages.	79
Table 20: "F" ratio of body temperature data of the female chicks of the two strains at different ages.	81
Table 21: Mean \pm S.E. respiration rate of the female Fayoumi chicks at different ages.	84
Table 22: Mean \pm S.E. respiration rate of the female Golden Montazah chicks at different ages.	86
Table 23: "F" ratio of respiration rate data of the female chicks of the two strains at different ages.	88
Table 24: Chick mortality as percentage of total female chicks at different growth periods in the two strains.	91
Table 25: The Cumulative chick mortality as percentage of total female chicks at different growth periods in the two strains.	93
Table 26: Daily average feed intake by the females at growing periods of Fayoumi (Fa) and Golden Montazah (GM) strains.	97
Table 27: Analysis of variance for feed intake by the females at starting and growing periods of Fayoumi and Golden Montazah strains.	99
Table 28: Daily average feed conversion by the females at starting and growing periods of Fayoumi (Fa) and Golden Montazah (GM) strains.	100
Table 29: Analysis of variance for feed conversion by the females at starting and growing periods of Fayoumi and Golden Montazah strains.	102
Table 30: Daily average feed intake and feed conversion of Fayoumi (Fa) and Golden Montazah (GM) strains during the laying period (21-36 weeks).	103
